This is a funny world in which we
live. When two trains come together
that is called a collision, but when
two kids come together we call them
twins.

The jokesmiths of the country ap-

"IT HAS PROVEN ITSELF ECONOMICAL, EFFICIENT AND WHOLLY DEPENDABLE."

Pendleton, Oregon, Nov. 25, 1925.

Gentlemen:
The hillside combine which I pur-
chased this year through the dealer
at Pendleton has proven so satisfac-
tory that I am glad to acknowledge
the merit of this new Case machine.

During the harvest just closed I cut
and threshed 300 acres with my ma-
chine. We were just nine days in the
field, which will show you that we
made good time and had no trouble.
My grain went 41 bushels to the acre.
The machine saved it and cleaned it
splendidly. I consider that it did
better work than any combine that I
have ever been around and I have
worked on, owned and operated a
number.

I found the engine had plenty of
power, and it was economical in both
gasoline and oil consumption. The
header deserves special mention for
the way it picked up and saved the
down grain, and I can say that the
leveling device is more than satisfac-
tory from the way in which it
handled on one sidehill that is half
pitch or better.

I am well pleased with my Case
combine and am frank to say that I
am glad that I bought one, for it has
proven itself economical, dependable
and wholly efficient. Arthur Suhl.

J. C. McKean, manager of the

vesters to get first hand information.
