HAS NEW DEVICE TO RECORD QUAKE

Greater Accuracy Is Also
Promised by Savant.

Washington.—The Georgetown uni-
versity seismological observatory,
which in the last 15 years has given
the world first news of many earth-
quakes, now assures the public that
its reports in the future will be even
more dependable.

The university today has among its
instruments a new seismograph,
known as the Galtsin vertical seismo-
graph, the only one of its kind on this
side of the Atlantic.

The special features of this delicate
piece of apparatus are magnetic registra-
tion and photographic recording,
whereby the element of friction in the
other types of machines is entirely
eliminated. Accordingly, the machine
will permit of the recording of many
more of the world's quakes and permit
of a more accurate interpretation of
the writings of a shaking earth.

Doctor Sieberg of the Jena seismo-
logical station places the number of
quakes felt sensibly or instrumentally
the world over from 9,000 to 10,000
yearly. Of these in the past only from
90 to 110 have been annually recorded
of Georgetown. Father Francis A.
Tondorf, director of the observatory,
hopes that this number may now reach
from 300 to 400.

When it first was founded in 1911
the Georgetown observatory had only
one seismograph—of the Weichert
type. It carried a stationary mass of
80 kilos. The rocking during wind-
storms of the south tower of the Healy
building, in whose base the instru-
ments were at first placed, necessitated
their removal to a cave beneath the
quadrangle.

Further Tondorf inaugurated the
work at Georgetown when, in 1910,
the International Seismological society
requested the Jesuit order, with many
colleges in the United States, to estab-
lish a chain of stations in this coun-
try.

Pilot Willing to Be Target for "Death Ray"

Walter Sutter of Ellensburg, N. J.,
an experienced army pilot, who has
come forward expressing his willing-
ness to fly a plane into the path of
Grindell Matthews' "Death Ray" an-
nounces that the ray will not bring him
down in his plane even at the usual
height of 1,000 feet. He also states
that an experienced flyer would not
have his plane wrecked by the ray
without some sort of a struggle.

Refugee Family Tells of Hardships in Mexico

Norfolk, Va.—Deprived of their
ranch and property accumulated in 19
years of hard work and forced by the
Mexican revolution to flee penniless
and without food, Wilhelm von Wal-
denfels and his family of four have
arrived here en route to Germany.

They brought a harrowing tale of
flight from their home in the interior
of Tabasco, a 48-hour trip down the
Grijalva river to Frontera in a dilap-
dated sailboat steered by a Mexican
girl; of lost direction and the piling
of the craft on the rocks and the fight
against drowning and, finally, of the
long journey afoot from Frontera to
Vera Cruz.

At Vera Cruz the refugees, hungry
and sick, had their first bit of good
luck in the presence in the harbor of
a steamer. They had no money, but
Captain Grashoff, a fellow country-
man, waved aside the question of
passage.

Declares New Glands Give Sheep More Wool

Liege, Belgium.—Dr. Serge
Voronoft, famous French sur-
geon, addressing a scientific con-
gress here, claimed it would be
possible to increase the yield of
wool by applying his gland trans-
plantation operation to sheep.

Although the operation cannot be
performed successfully on all
sheep, he said, he hoped to be
able to create a special breed by
operation on the direct descend-
ants of a certain number of
picked specimens.

The experiment was already
being made, he announced, on a
flock of 3,000 sheep in Algeria,
and also on a number of goats.

MOREHOUSE GIVES PLAN TO PROTECT PEOPLE FROM WILD-CAT PROMOTERS

American Bankers Association Official Who Has Exposed
Fraudulent Schemes for Robbing Savers Draws
Up Set of Rules to Foil Crooks.

By W. R. MOREHOUSE,
Public Relations Commission, American Bankers Association.

ARTICLE NO. IV

THE solution to the great problem of protecting savings
depositors from losing their money in fraudulent schemes
is largely in the hands of our bankers. If they will co-operate
with those who save they can make it hard for
these plunderers to continue business. Hasten
the day when our bankers without exception will
gladly welcome interviews with depositors who
contemplate making investments, will urge an
investigation or recommendation in the stead of little-
known securities investments of unquestioned
responsibility. In every case where customers
call at the bank excited and nervous over some
scheme where by investing a few hundred dollars
they expect to make thousands any banker will
at once sense the situation.

The banker knows that the depositor is being
rushed off his feet, with "Hurry, hurry and
get in on the big clean-up!" and it remains for the banker to
caution the depositor against such tactics. In order to prevent
this all that our bankers have to do is to suggest that their cus-
tomers make it a rule always to bring
high-pressure salesmen to the bank to
be interrogated regarding their pro-
posals. This will break up sales
nine times out of ten, for high pres-
sure salesmen invariably avoid being
questioned too closely by bankers
who know investments.

Rules to Follow
Our bankers should urge this in-
vestment slogan: "Investigate before
you invest. Consult your banker first,
and so indelibly impress it on the
minds of their depositors that they
will always be guided by their bank-
er's advice in making investments.
Salient points which should be kept
before the investing depositor are:

(1) There are three cardinal points
to all good investments, namely safety
of principal, certainty of income and
saliability.
(2) Safety of principal is more im-
portant than a high yield; the promise
of big returns is usually a sign of a
risky speculation.
(3) It is like taking a leap in the
dark to invest in promotions which
are an unknown quantity and for this
reason a thorough investigation
should always be made.
(4) It is morally wrong, if not
criminal, so, for any person to invest
in any proposition he feels is a skin-
game, or which is tainted by trickery
or fraud or opens the way for a fa-
vored few to "get in on the ground
floor," clean up and get out from under
before the scheme collapses. Usually
the depositor finds he is not in on
the ground floor, there is no chance
for him to clean up before the scheme
collapses and so he loses all that he
has invested.

(5) If a promotion is as good as
claimed, it would not be necessary for
high-pressure salesmen to resort to all
sorts of questionable methods. It
would not be necessary to rush a vic-
tim off his feet and sign him up before
he could interview his banker, but he
could be given time to consult others
before investing.
(6) The only reason high-pressure

pirates go to those who are inexperi-
enced in finance for funds is because
they can palm off on them so-called
investments which in the eyes of men of
experience are valueless.
(7) The glib-talking promoter is not
a true friend of the savings de-
positor but is a wolf in sheep's cloth-
ing. He will resort to any kind of
trickery to exchange a certificate of
stock for the depositor's cash, his glit-
tering promises are fictitious and he
is planning how he can entrap his vic-
tims and relieve them of their savings
and not how he can make good di-
vidends for them.

(8) For every oil well that pays
dividends there are many dry holes
and abandoned drilling rigs, and for
every profitable mine there are many
abandoned shafts, and for every suc-
cessful promotion there are a thousand
failures, and because of these
facts the savings depositor's chance of
winning is too small to justify the
great risk involved.
(9) Savers should steer clear of
stock, shares or units in world-revolu-
tionizing inventions which are peddled
in front of empty stores or sold from
house to house or through the mails.
(10) Every novice investor should
remember that, as in all lines of busi-
ness, black sheep have invaded the in-
vestment field. They must be shunned,
while investment firms and salesmen
of responsibility and integrity should
be supported.

Let our banks unite in a movement
designed to protect the depositor
against the schemes of the wild-cat
promoter—in a movement that will
save our savings depositors from de-
spair and from poverty as a result of
having lost all—in a movement that
will turn into legitimate investment
channels the millions of dollars which
are now wasted on fraudulent schemes
of one kind or another.
The best service a bank can render a novice in-
vestor is to keep him from making
poor investments by helping him to
make good ones.

FINANCIAL POLICIES

By JOHN T. ADAMS,
Chairman of the Republican National Committee

The Re-
publican party has
always been a
party of honest
money and sound
financial poli-
cies. Its record
in this regard is
a matter of
history.

The close
of the Civil
war found the United States govern-
ment with a large outstanding
bonded indebtedness incurred in
order to save the Union. Her pa-
per currency was worth only 38
cents on the dollar. At this time
began the divergence of the finan-
cial policies of the Republican and
Democratic parties.

The Democratic party demanded
that the obligations of the govern-
ment be paid in depreciated paper
currency. The Republican party,
in the platform of 1868, at the con-
vention which nominated Grant,
incorporated the plank which stated:
"We denounce all forms of re-
pudiation as a national crime; and
the national honor requires the
payment of the public indebtedness
to all creditors at home and abroad,
not only according to the letter,
but the spirit of the laws under
which it was contracted."

In the first act of Congress
signed by President Grant, the
United States government removed
all doubts of its purpose to dis-
charge its honest obligations to
public creditors in honest money.

MAKES PLEA FOR THIEF WHO HAD MENACED LIFE

Banker Shattuck Asks
Mercy for Man Who
Had None for Him.

Paris.—At the end of a trail of ven-
geance that led half way around the
world and cost two lives, hundreds
of thousands of dollars, Albert R. Shat-
tuck, American millionaire, found-
er.

The story goes back to a day in
1922, when the soft-spoken banker in
the Shattuck home on Washington
square, New York, turned with a start
upon his employees, and blew sharply
on a whistle.

The gardener and one of the kitchen
boys dropped their masks of servility
and became snarling bandits, like their
chief. Three other apaches, waiting
outside, were admitted. Revolvers and
ugly knives were whipped out.

No Hesitation to Kill.
The astonished banker, his wife and
four loyal servants were driven down
to the cellar at the pistol's point.
There, Murrey insisted Mrs. Shattuck
violate. Only the certainty that the
apache would not hesitate to kill re-
strained the white-haired millionaire
from violence. Into an airtight wine
vault the bandits forced their victims,
with curses and degrading remarks.

The door was slammed shut upon
them and locked.
Death was but a few hours away for
all, as the air was bad and scarce.

Upstairs, the bandits swiftly ran-
sacked the house, took jewelry valued
at \$70,000 and made away scattering
them over the world.

Some were caught, but Murrey dis-
appeared.

Inside the vault, Shattuck alone
kept his head. With a dip's edge
and a broken penknife, the banker at-
tacked the hinges of the heavy steel
door. Loosening the screws with the

Driven Down to the Cellar at the
Pistol's Point.

almost difficulty, he pried the door
open and tottered, with his wife in
his arms, into the cellar, just as every
one was on the point of collapse.

From that day, Shattuck swore ven-
geance upon Murrey. He did not talk
of it much, but private detective
agencies learned quietly that there
was no limit to the reward if they
could trap the apache.

Murrey was heard of first in this
country, then in that, hurried day
and night, but always eluding pursuit.

Shattuck kept on the trail. It led to
the Indies, then to Europe, then to
Africa. Still the bandit kept ahead of
the international police put on his
track. Justice became the banker's one
aim. Some called it vengeance. Then
Murrey was trapped. A woman was
the leader in the deed—his sweetheart,
with whom he kept in touch through-
out the flight.

Trapped With Sweetheart.

Growing bolder, the bandit came to
Paris, or rather to a little villa out-
side the city, where his sweetheart
used to meet him.

One day the gendarmes of Paris fol-
lowed her to the villa and a revolver
battle ensued before Murrey threw up
his hands. One was mortally wounded.
First an attempt was made to have
the apache king taken to New York,
but it was decided the French charges
against him were more serious.
The jury found Murrey guilty as
charged, resisting an officer with violence,
which resulted in the fatal
wounding of the police. The judge
sentenced him to die on the guillotine.

The Shattucks, their long pursuit
ended, wrote to Doumergue:
"Justice cannot ignore pity. This
man has expressed regret for his
crimes. We believe he is sincere."

Sought to End Life

Where Son Is Buried

North Bergen, N. J.—Charles Alex-
ander attempted suicide on the grave
of his son in Fairview cemetery, be-
coming to police, who found his body
stretched on the grass-covered mound
which indicates the spot of his son's
interment.

The police state Alexander went to
the cemetery and remained at the
grave throughout the night. It is said
poison was used by the brooding man
in his suicidal attempt. Physicians at
a local hospital declared he will re-
cover.

Edgar was the son's name. Seven
years ago, at the age of nine, the boy
was killed in a railroad accident.

STRAIGHT TALKS WITH AUNT EMMY

On How to Lose Your Inheritance

"It is so hard for me to get along
on what John left me," complained
Mrs. Norris to Aunt Emmy. "Junior
wants to get a job, but I always want
him to go to college."

"Yes, yes, I know," interrupted
Aunt Emmy, "but what about this
mining stock?"

"I'm coming to that. You see I
thought I could invest some of those
bonds John left, they yield such a
tiny income, in something that would
bring real money."

"So when the telephone rang
money, so when the telephone rang
that day and a man, he had the
nicest voice, said he had been referred
to me by a friend and wanted to talk
over some gilt-edged investments. I
told him to come right up."

"His name was Mr. Stanhope. He
was so nice. He told me all about the
big money people are making in plat-
inum mining. He said he could
let me have some stock in a wonder-
ful mine, and that the company would
buy the stock back if I ever wanted
my money."

"Have you a statement signed by
one of the officers of the mining com-
pany to the effect that the company
will repurchase your stock?" asked
Aunt Emmy.

"Why no—"

"Well, you will have trouble get-
ting your money back. A company
cannot be compelled to buy its own
stock back."

"Oh, I don't know. Anyhow, I got
out my bonds and showed them to him—"

"What, you keep your bonds in the
house instead of at the bank!" ex-
claimed Aunt Emmy.

"Why, yes, but in a box that locks—"

and Mr. Stanhope said that he was
surprised that a woman with the
good business judgment I had should
be getting such a small income as
those bonds paid—scarcely anything,
he said that I should make my money
harder for me. He knew I must
have good business judgment, he said,
because I brought my children up so
beautifully. He offered to take the
bonds and change them for his stock."

"Oh, Lord!" exclaimed Aunt Emmy,
"did he give you a receipt?"

"Why, of course, he was the nicest
man. But Junior said after he left
that he didn't like him. He said he
looked slick. Boys are so funny.
Well, I got the platinum stock but Mr.
Barnes at the bank says it's no good.
He must be mistaken. But I want my
bonds back so I came to you for help.
And you're always so lucky about your
investments."

"Not lucky, just sensible," corrected
Aunt Emmy. "Why, oh why, don't
you consult your banker, who under-
stands finance before you risk your
money? This is not your first loss.
Remember that piece of land you
bought that was under water?"

"That was different," said Mrs. Nor-
ris blushing, "and anyway, Mr. Stan-
hope is honest, I can tell that."

"If he were honest, he would not
have promised you the things he
promised. Reputable houses don't
send out representatives who make
promises about repurchase of stock.
Why don't you 'phone your Mr. Stan-
hope?"

"I did, but he's out of town. I've
written, too, but I suppose I shall
have to wait until he gets back. It's
been several weeks now, so he should
be back soon."

Just then the evening paper came.
Aunt Emmy glanced at it, then read it
attentively. Her expression grew se-
rious. She handed the paper to Mrs.
Norris. On the front page was an ac-
count of a financial scandal. The
house that sold Mrs. Norris her min-
ing stock was involved and the men
who ran the business had been indicted
for fraud.—A. B. Ayres.

Cause for Thanks

"I met a real optimist the other
day," said the physician, "a fellow to
whom I certainly owe my hat. He had
lost a leg in a railroad accident, and
when they picked him up the first
thing he said: 'Thank God it was the
leg with the rheumatism!'"—Harper's
Magazine.

Trainer of Boxers Gives Diet Hints

To Kid Howard of Chicago and his
new system of training and condition-
ing. Sammy Mandell, the present
lightweight boxing champion of the
world, gives a great
deal of the credit
for his meteoric
rise to stardom in
the world of pugil-
ism. When Mandell
first started fight-
ing, he was small,
weak and undevel-
oped, but after
turning himself
over to Howard it
was only a short
time before he took
the decision from
Sid Terris of New
York that resulted
in him being recog-
nized as the boss
of the lightweight.

Sammy Mandell.

Howard's system
is unique in that
it works no hardship on the athlete
who is in training. Unlike the sys-
tems that have been used for years,
this prominent and successful trainer
of men makes conditioning more of a
pleasure than a distasteful necessity.
Instead of demanding that his men eat
only certain things he advises them to
eat what they want and when they want
it as long as it is cooked in a proper
manner. Mr. Howard, in a recent in-
terview on the subject of diet and con-
dition, said, in part: "Years ago it was
a task, and an unpleasant one, for a
boxer or a wrestler to train for a bout
because he was forced to literally
starve himself unless he wanted to eat
steaks and chops at all times. I re-
member that when I was training for a
match, I was so truly tired of steaks
that I choked every time that I ate
one but it was steak or nothing. I ad-
vised my men to diet at all times but it
is perfectly possible for them to diet
and, at the same time, to enjoy their
food. My only 'don't' is the one re-
garding the setting of such combina-
tions as fresh milk and cheese, and
fruit with cream. In fact, I advocate
the use of evaporated milk entirely.
Vegetables are fine and the more that
the athlete eats the better he will be
for it. Pastry, of certain kinds, such as
homemade pies, cakes and cookies, if
made correctly, and with pure butter,
evaporated milk and pure lard, are
very beneficial. Steaks and chops are
ideal. Taken as a whole, any food,
with a few exceptions, is all right if
properly cooked and eaten without
gorging."

And one has to look at Howard,
who is the most religious user of his
own system, to realize that it is a suc-
cess.

HUGE GROWTH IN SCHOOL SAVINGS

New York.—School savings in the
United States for the year 1924-1925
increased in aggregate bank balance
by \$5,500,000, with a growth of \$30,000
in the total number of pupils partici-
pating. It is shown in reports made to
the American Bankers Association,
which declares that the returns en-
courage belief in the permanence of
school savings as a part of the edu-
cational program in the public schools.

During the year the number of re-
porting school savings systems in-
creased from 653 in 742 districts to
780 in 1,557 districts, the number of
schools from 9,080 to 10,163, the num-
ber of pupils participating from 2,236,
326 to 2,869,497, the deposits from
\$14,991,535.40 to \$15,961,560.72 and the
bank balances from \$20,435,144.64 to
\$25,913,431.15, says W. E. Albright,
in charge of the Association's savings
activities.

First Manual Training School.
Finland holds the honor of the
earliest use of handwork as an agency
in education, having developed a plan
for teaching handwork in primary
schools between 1808 and 1809. Sweden
followed in 1872, France in 1873, Eng-
land in 1880 and Germany in 1887. In
the United States the first steps in this
direction were taken in New York city
in 1878.
