Business Men Say: 'Advertising Pays'

COLD SPELL HITS MORO

Winter descended upon Sherman county Sunday night when an icy wave traveling southward out of Canada visited all the Pacific coast points as far south as central California.

The storm started with a light snowfall which began early Sunday morning with few intermissions until Monday afternoon. The snow was extremely dry and light and the driving winds caused it to form many drifts in the roads through which cars had slight difficulty in forcing their way. The Moro experiment station reported that the moisture contents for the first day only equalled .8 of an inch.

Monday afternoon at 2 p. m. the experiment farm reported a temperature of two below zero which was increased to six below during the night. Tuesday night the reading had changed to nine above zero. Very little damage to growing grain is expected to result from the storm and in numerous instances the farmers are glad the storm arrived, especially with an accompanying blanket of snow to protect the grain from the succeeding cold.

The storm caused the old settlers to cast back in memory to other cold weather days that have visited Sherman county. The best remembered being that of 18 years ago when 32 degrees below was registered on a number of thermometers in Moro. The coldest record at the experiment station was that on December 11, 1919, when 20 below was registered, about eight years after the station was established. The next coldest day was on December 24, 1924, when all the growing grain in Sherman county, as well as practically all eastern Oregon, was frozen out. This last was the result of the extreme range of temperature from close to 60 above zero to 10 below on the day the storm hit eastern Oregon.

MORO STUDENTS AT O. A. C.

Moro is represented by eight of the 3420 students at the college this school year, Sherman county having 18 students. The total registration, including summer session and short course students, is nearly 5000. The extension service in addition takes the college to tens of thousands of Oregonians.

Commerce is the most popular course for Moro students, as four are registered in that school. Agriculture is second with three. Electrical engineering is last with one.

Edmund Stephens, junior in agriculture, and a member of Sigma Alpha Epsilon, national social fraternity, is pledged Alpha Zeta, honorary fraternity in agriculture. This honor is given to students who make unusual scholarship records in the school of agriculture, and Stephens is one of eleven students to receive the honor for this year.

Other students from Moro are Owen Searcy, junior in commerce, and president of Theta Nu Phi, local social fraternity; Opal Powell, sophomore in commerce; Mark Henkle, sophomore in agriculture, and a member of Acacia, national Masonic fraternity.

Harold Bryant, sophomore in electrical engineering, a member of Sigma Alpha Epsilon, national social fraternity, is manager of freshman basketball.

Hollis Bull, sophomore in agriculture, and a member of Gamma Nu, local social fraternity, is also a member of the Agricultural club, an organization of students in the school of agriculture to further their interests.

Morris Searcy, freshman in commerce, and a pledge of Theta Nu Phi, local social fraternity, is going out for track next term with hopes of making his class squad. Byron Peetz, freshman in commerce, is also at O. A. C. this year.

FIVE CARS A MINUTE

A Chevrolet built every 12 seconds of the working day during this year. This is a production record which has shattered all previous marks in the three-speed automobile field. This month the Chevrolet motor company closes its greatest year with an output of 728,697 cars. The total is 40 per cent over last year's achievement.

Daily production for this make of motor car has averaged 2,450 cars. The highest monthly average was reached in September when the day's build reached 3,381 units. Output for the year far exceeds that of the first ten years of Chevrolet production, 1912 to 1921 inclusive.

April, May and June set new high production marks. July was restricted somewhat but in August it was snapped up to 76,551 units, only 690 fewer cars than were built in June. June was the record period until outdistanced by September.

With a greatly increased production program for 1927, Chevrolet enters the new year with every promise of setting still higher marks in the three-speed transmission field.

Oregon farmers are alert for new and more profitable crops, particularly deficiency crops not now grown in Oregon but for which there is a demand. In development of these new enterprises county agents are lending material assistance, states A. L. Ballard, state county agent leader.

A garment is kept in shape more easily if always placed on a hanger when not in use.

FARMER RELIEF IN CONGRESS

Senator McNary Again Places Relief Measure Before Congress

A revised version of the McNary-Haugen price stabilization bill was introduced in the senate Tuesday by Senator McNary, chairman of the senate agricultural committee.

The measure provides a \$250,000,000 revolving fund to stabilize prices of wheat, cotton, corn, rice and hogs by exporting surplus crops and retains the equalization fee provision, criticized by President Coolidge.

The new bill changes administration of the equalization fee so cooperative organizations would carry out the provision on money borrowed from the revolving fund and the provision of the old bill referring to price levels and price standards has been eliminated.

Rice has been included in the bill by urgent request of southern rice growers. Senator McNary explains this by stating that market conditions for rice are comparable with those of wheat. The tariff on rice is effective only in years of small crops.

The new draft omits the provision in the old bill which deferred collection of an equalization fee on cotton for three years and until congress should authorize its imposition. The provision for stabilizing cotton for three years with government funds is also omitted. This removes all ground for criticism on the score of granting a subsidy to cotton.

The bill also contains the plan for stabilizing the five basic commodities through use of a stabilization fund drawn from each with a credit plan for stabilizing all farm commodities insofar as it can be done through the wise extension of credit to cooperatives and is not in any particular a price fixing device, plan or proposal.

If enacted it will include the American farmer in the American standard of living.

BELSHE CAR WRECKED

When driving to Hood River last Sunday to visit with his mother, O. L. Belshé had the misfortune to go into a skid on a hairpin turn on the Rozena loops causing his Hupmobile eight to go over the bank for a drop of about 60 feet. The car turned over and over not less than six times in its roll down the mountain side, breaking off a 6-inch oak tree in its fall and coming to a stop amongst brush with its four wheels in usual place on the ground.

Mr. Belshé was in company with Mrs. Belshé and reports say that both were sitting on the seat cushion when the car came to a stop, but that all the tools, tire chains, etc., stored under the seat were scattered all over the interior of the car. The steel top of the enclosed model saved both from serious injury.

The car was purchased new last fall and was insured for \$2000. The exact damage to the car is not known with the exception of one door, being torn off and some of the glass broken.

25th WEDDING ANNIVERSARY

The 25th wedding anniversary of Mr. and Mrs. George W. Howell was celebrated December 12 at their home in Kent, Oregon, with forty relatives and friends attending.

George W. Howell and Rachel E. McKay were married at the home of the bride's parents at Lewisville, Washington, December 11, 1901. They came to Kent in October 1904, taking a homestead nine miles south of Kent, near the Bakeoven district.

There were eight children born to them, all of whom were present at the anniversary celebration. G. Marvin Howell, wife and son G. Marvin Jr.; Mrs. Faye Beyer, eldest daughter, and husband and two daughters, Irene and Thelda; Harold, Harry, Bernice, Thelma, Dale and Millard.

Other relatives present were Mr. and Mrs. W. A. Young and three children; Mr. and Mrs. William Mitchell and five children; Mr. and Mrs. Roy P. Barnett and three children; Mr. and Mrs. Arthur Coatsy and small daughter Dorothy; Misses Nellie, Mattie, and Maude McKay, nieces of Mrs. Howell; Roy and Jay McKay, nephews of Mrs. Howell.

A bounteous dinner was served at one o'clock in the afternoon.

TEACHERS ANNUAL MEET

The Oregon state teachers' association will hold its annual meeting at Portland on December 28-29-30. Speakers of national reputation have been secured to speak at the general sessions. These include Dr. Henry Suzzallo of Seattle, Miss Jean Soules of Spokane, G. N. Child of Salt Lake, and Dr. E. S. Evenden of Columbia university.

Topics scheduled for discussion include: adequate revenue and the equalization of taxation for education in Oregon; unification of small high schools; teachers retirement fund; professional and financial status of the teachers in the elementary school; Oregon state course of study; free text books for Oregon children; detection and correction of pupils' errors; reorganization of the state board of education.

Grease spots are sometimes removed from clothing by covering the spot thickly on both sides with starch, which is left on for several hours when it may be removed with a soft brush.

MISS PERKINS SURPRISED

Ninety invited guests gathered Wednesday afternoon at the L. L. Peetz residence to honor Miss Dorothy Perkins, teacher in Moro schools, whose approaching marriage to Mr. Forrest Peetz of this city is expected to be solemnized at the home of Mrs. Don Yantis, sister of Miss Perkins, in The Dalles on Christmas day.

The affair was announced to be a miscellaneous shower for Miss Perkins by friends of the bride-to-be who sponsored the occasion. Guests upon arrival were each given a piece of paper upon which were to be written their names, after which the written names were transferred to art linen squares and embroidered by each guest before arrival of the guest of honor.

To say that Miss Perkins was most agreeably surprised would mildly express her pleasure when she and her companion teacher Yields arrived from duties at the school house. Upon her entrance she was first apprized of the purpose of the afternoon when showered with the completed linen squares which will be used as blocs for a quilt later.

Miss Perkins had been lead to believe that the afternoon was one of the usual Dorcas society social affairs at which she had been requested to favor those present with a violin selection.

The gifts were truly miscellaneous and included many useful and beautiful articles consisting of silverware, needle work, luncheon sets, pyrex ware, aluminum pieces and glassware.

Refreshments served consisted of chocolate, cheese chips, and fruit salad. The last item was an imitation candle using sliced pineapple for the saucer, banana for the candle stick and a preserved red cherry for the flame.

Guests from out of town were Mrs. Wm. Perkins and Mrs. Don Yantis, mother and sister of the bride-to-be, and Mrs. L. Barnum, all from The Dalles.

A few stitches of white thread taken through a spot on a woolen garment makes the spot easier to find when the garment is washed.

Twelve members of the O. A. C. faculty, headed by Dr. W. J. Kerr, president, are listed in the 1927 'Who's Who in America.' Dr. Kerr is a member of a national scholastic honor society and a social fraternity and is credited with a long list of offices and positions filled, his present position having continued since 1907.

To wash a sweater so it retains its original size and shape is possible. Length, width, neck size, and around-arm size are measured. The sweater is placed on a padded table and stretched to its original measurements being pinned in place if necessary. A heavy turkish towel makes a good pad to use. It will stay in place on the table better if stretched over a sheet.

SERVICE

We stand ready to serve you no matter where your loved ones have passed away. Our complete and modern equipment makes all parts of the country accessible. We offer a thoroughly reliable and far reaching service.
