A valuable knowledge of the reliability
and integrity of businesses is the reward
of the steady reader of advertisements.

The reader of advertisements knows that he has the most
reliable guide to markets that exists in the world today.

The Kitchenette Brings "Flapper" Hog into Vogue

The "flapper hog" is in vogue. Scientific facts have recently been brought forth by experimenters in animal husbandry with reference to the changing of various types of hogs, and in connection with these statements packer representatives have requested that producers change to a type of hog that best meets all the requirements of the consumers of pork.

It is a known fact that the type of hog which brings the highest market prices is that in greatest demand. This demand originates in the home, and the present day home is characterized as "kitchenette." The housewife seeks small cuts of high quality, but with little waste, which she commonly calls excess fat. Fat meat has gone out of style and, as some meat men say, what we need is a hog "of flapper style."

The consumer demand calls for a pig of modern weight, around 225 pounds, which is well finished but not wasteful, nor does it carry an abundance of fat intermingled with the lean. Furthermore, packers are desirous of purchasing hogs that will yield a large percentage of the cuts most in demand. Another reason for objecting to heavy fat animals is that the foreign demand for lard has decreased.

Thus, because of this particular demand, which originates in the home and is passed on to the packers, the livestock men of this country are endeavoring to produce in sufficient numbers the hog that is commonly known as "the present day pig," which will be prolific, hearty, economical and profitable feeders, and yet yield a well finished carcass of desirable weight, but not too fat or wasteful, and cutting out a large percentage of loin, ham, and bacon. Furthermore, these cuts must be of fine quality lean which exists in large proportion when compared to the amount of external and internal fat.

WILL LOOK AFTER THEMSELVES

She: Women will look after themselves.

He: What's the matter—aren't the men looking after them enough to satisfy them?

COOLIDGE RECEIVES OVATION IN HAVANA

Cheering Throngs Greet the
President When He Lands
in Cuba.

Havana. — On the shores where American forces planted freedom, President Coolidge landed triumphantly Sunday amid the greatest demonstration Cuba ever has accorded the visiting head of a foreign nation.

He was honored at the head of a great and friendly country by Cubans of high and low estate, who, led by their own president, Gerardo Machado, poured out a full measure of homage to the man who came with a message of good will not only for their country, but all other nations of the western hemisphere.

Landing from the battleship Texas, on foreign soil for the first time since he took office, Mr. Coolidge was met by the Cuban chief executive and his cabinet and taken to the national palace through streets literally seething with a mass of wildly cheering Cubans.

With all the prestige the American presidency conveys to the nations of the new world, President Coolidge made an appeal at the opening session of the Pan-American conference for peace and good-will in the western hemisphere.

Mr. Coolidge lifted his hand in a sign of admonition and urged the delegates of 21 Central and South American countries to adopt the doctrine of adjusting their differences, not by resort to force, but by the application of the principles of justice and equity.

He was acclaimed as the head of the most powerful nation of the new world, but his speech was filled with terms of conciliation and helpfulness in which he placed the United States as merely one country among many seeking the way toward a closer and more complete intercontinental harmony.

RADIO TELEVISION IS DEMONSTRATED

Schenectady, N. Y. — The magic wand of science, passing over the factory of the General Electric company here, disclosed to a small group of radio engineers, scientists and newspaper men a vision of the future of radio broadcasting—a future designed to bring to broadcast fans the sight as well as the sound of the radio performers.

Sitting in comfortable chairs in three Schenectady homes, several miles from the company's broadcasting studio, the visitors were enabled to both hear and see the studio program.

"Simple twists of the dials on the home television sets" brought to these men the minute reproduction of the characters who appeared before the microphone, even to the curl of cigarette smoke from their lips and the blinking of their eyes. The sound of their voices was heard in the usual way through a loud speaker supplementing the visual apparatus.

LUMBER PRODUCTION FALLS

About 2 Billion Feet Lower Than
Previous Year.

Washington, D. C. — Based upon telegraphic reports from eight regional lumber manufacturing associations which represent approximately 40 per cent of the total business, the National Lumber Manufacturers' association estimates the production of last year at 5,000,000,000 board feet, about 2,000,000,000 feet less than in 1926, and nearly 10,000,000,000 feet under the record year, 1920.

The actual figures obtained from reporting mills were 14,279,000,000 feet last year, against 15,266,000,000 feet in the previous year, when about 5 per cent additional mills were included in the statistics.

The Southern Pine association reported production of 3,470,000,000 feet, West Coast Lumbermen's association 2,243,000,000 feet, the Western Pine association 1,472,000,000 feet, California White and Sugar Pine association 1,185,000,000 feet.

Canada Ends Strangler's Crime Wave.

Winnipeg, Man. — Earl Nelson, "strangler killer," was hanged in the courtyard of the Provincial jail here. He paid the penalty for killing Mrs. Emily Patterson, and was believed guilty of more than a score of strangulation murders in the United States and Canada. Nelson was believed to have been the mysterious "gorilla" who spread terror along the Pacific coast and in Detroit and Toledo, where women were strangled to death.

More Money Asked for Aviation Work.
Washington, D. C. — The senate received from President Coolidge a request for \$475,000 for additional air navigation facilities next year.

E. P. EASTERBROOK

Lieut. Col. E. P. Easterbrook, who has been named chief of chaplains with the rank of colonel, to succeed Col. J. T. Axton, who retires April 6.

COMMITTEE REJECTS WILBUR'S NAVY PLANS

Washington, D. C. — Secretary Wilbur's recommendation that no definite date be set for completion of the administration's \$740,000,000 new warship construction program was rejected by an overwhelming vote by the house naval committee.

Thumbs likewise were turned down by the committee on another proposal by the naval secretary that the president be empowered to suspend the proposed construction "either in part or in whole at any time he might deem it advisable."

Fifteen members voted against the secretary on the first proposal with one, McClintic, democrat, Oklahoma, recording himself as present. The secretary's second request was rejected 15 to 1, McClintic voting to support the navy department head.

After the meeting four republican members, Chairman Butler, Britten of Illinois, Darrow of Pennsylvania, and Andrew of Massachusetts, interpreted the committee's action as a positive expression in favor of "actual iron and steel" ships instead of a possible "paper fleet."

BRIEF GENERAL NEWS

The Reed slush fund committee will recommend that Senator-elect Frank L. Smith of Illinois be denied his senate seat.

All broadcasting licenses have been extended to March 1 by the federal radio commission. The licenses would have expired February 1.

A million and a quarter persons attended last week's national automobile show in New York. New cars worth at least \$2,000,000 were ordered. Bishops of the Church of England have agreed to revise the prayer book, removing misapprehensions which caused its recent defeat in the house of commons.

Senator Willis, of Ohio, has announced that he had requested Carmel Thompson, of Cleveland, to take charge of his campaign for the republican presidential nomination.

Mrs. Ruth Snyder and Henry Judd Gray died in the electric chair of Sing Sing prison seven minutes apart. They were executed for the murder of her husband, Albert Snyder.

Span Proposed at Mouth of Columbia.

Astoria, Or. — A proposal of E. M. Elliott and Associates Inc., of Chicago, for the erection of a toll bridge across the Columbia river at Astoria was submitted to the city commissioners in the form of a communication addressed to the city manager and a resolution presented for passage by the commission. If approved, this measure will grant a blanket approval by the commission for a right of way for a bridge approach at a point to be selected by the company in connection with its proposed construction. The matter was referred to the city attorney for report.

Hickman and Hunt Face Joint Trial.

Los Angeles. — Former pals who plundered and murdered together and then "squealed" to bring each other to justice must face the state together. Superior Judge Carlos Hardy so ruled when he denied the petition of Wally Hunt, 16, who sought to be tried separately from William Edward Hickman for the murder of Ivy Thomas, drugist, shot to death in a holdup, Christmas eve, 1926.

Reorganized Milwaukee Line Elects.

New York. — The reorganized Chicago, Milwaukee, St. Paul & Pacific Railroad company began its career with the election of 14 of its 15 directors. Harry E. Byram of Chicago, ex-president of the road, became chairman of the board. Henry A. Scandrett of Omaha is the new president.

TARIFF CUT FAVORED BY VOTE OF SENATE

Resolution Declares for Downward Revision of "Excessive" Rates.

Washington, D. C. — By a vote of 54 to 34, the senate went on record in favor of immediate downward revision of "excessive" tariff rates.

Without power to initiate tariff legislation, the senate formally transmitted a record of its action to the house, which is in a somewhat perplexed mood on this question. Some farm republicans there are prepared to vote for higher tariff rates on agricultural products, but administration leaders apparently are heeding the opposition of President Coolidge to any tariff legislation at this session.

The senate acted on a resolution by Senator McMaster, republican, South Dakota. Modified to provide for downward revision only of "excessive" rates, which were not specified, the resolution was supported by 12 republicans, one farmer-labor and 41 democrats.

The administration group voted almost solidly against the proposal, but it was supported by only two democrats—Broussard of Louisiana and Kendrick of Wyoming. The republicans who voted for the resolution were: Blaine, Borah, Brookhart, Capper, Frazier, Howell, La Follette, McMaster, Norbeck, Norris, Nye and Pine.

Republicans supporting McMaster in his fight for the resolution generally complained of agricultural conditions, but opponents of the proposal insisted downward revision of tariff rates, even though other than those on agricultural products could not assist the farmers.

The six days of debate found republicans and democrats generally again fighting the old tariff issues.

MANY DRY AGENTS FAIL TO PASS TESTS

Washington, D. C. — At least 75 per cent of the government's prohibition agents, inspectors and supervisors, have failed to pass the recent civil service mental examinations, Commissioner Doran announced, and, unless a re-examination can be arranged, he said his force is threatened with complete disruption.

Doran estimated that the application of civil service rulings would cut out of government employment 1500 agents out of a total of 2000, and leave him unable to continue the present system of enforcement.

Doran stated that he was making every effort to give those who had failed, including some he valued highly, another chance. He again sharply criticized the form of the examinations, declaring that he would have been unable to answer some of the questions himself.

A clean sweep of the prohibition force in Carolina territory would result from the civil service commission examinations, Doran explained.

In New York, 50 per cent of agents in service failed. In Philadelphia, where the same percentage of failures obtained, Doran said that one of the unsuccessful government agents was a graduate of the University of Iowa and an ex-United States marshal.

NAVY TO SERVE VENISON

Reindeer Steaks to Be Tried Out on
Bremerton Sailors.

Washington, D. C. — Alaskan reindeer meat is to be tried out in the mess of the Bremerton, Wash., navy yard to see if it can win a place on the navy ration menu.

Commissioner of Education Tiert has informed a house sub-committee which considered the interior department's appropriation that 1566 pounds of the meat had been sent for test meals for the sailors at the navy yard.

He declared that if the experiment proved successful, it might provide a market for the 631,000 reindeer in Alaska.

Michigan Slayer Hidden from Mob.

Flint, Mich. — Adolph Hotelling, confessed kidnaper and slayer of 5-year-old Dorothy Schneider, is hidden away in a strong cell at the state reformatory at Ionia, Mich. The 46-year-old murderer, who was arrested at his home at Owosso, was rushed to Lansing after a mob of 10,000 enraged citizens stormed the jail here and demanded his life. The move from Lansing to the Ionia reformatory was made when authorities learned another mob was being formed at the capital. Dorothy was kidnapped when on her way home from kindergarten. An alarm spread by her mother and school officials started a search which resulted in discovery of the mutilated body partly submerged in the waters of a creek in a seldom frequented section near here.

MISS JESSIE HOOVER

Miss Jessie M. Hoover, who is Uncle Sam's milk utilization specialist for the Department of Agriculture.

CUBA FAVORS THE MONROE DOCTRINE

Havana. — General Gerardo Machado, president of the Cuban republic, declared that it was not within the province of the Pan-American conference to assume the role of a tribunal to judge the Nicaraguan problem or the general policy of the United States with respect to intervention in small states, as the congress has no such rights. It would be dangerous, he said, to establish such a precedent.

"I desire to regard the Monroe doctrine as representing the noble action of a president of the United States who prevented the reconquest of America at the time of the holy alliance. The Monroe doctrine was, and ought to remain the common defensive policy for the territorial integrity of America. The Monroe doctrine is not only compatible with the sovereignty of America below the Rio Grande, but is a document giving the greatest force to that right."

Cuba's membership in the league of nations, said the president, does not influence Cuba's adherence to Pan-American union. He believed that the conference would be able to accomplish a better understanding between the countries of America in the way of reciprocal aid, making such union a material and moral benefit for true Pan-Americanism.

40 REBELS KILLED FROM AIR

Marine Aviators Drop Bombs On
Sandino Men.

Managua, Nicaragua. — Forty rebels were killed by a marine corps airplane squadron that attacked El Chipote, stronghold of General Augustino Sandino, the squadron's commander, Major "Rusty" Howell, reported on returning here.

The aviators hid 5000 feet in the air behind clouds and dived down when opportunity offered to drop bombs, fire machine guns and even throw hand grenades. This is believed here to be the first time hand grenades ever were used from airplanes.

Sharkey and Heeney Fight a Draw.

New York. — Tom Heeney, New Zealand's hope in the heavyweight title chase, fought a twelve-round draw with Jack Sharkey, Boston sailor man, before 17,000 spectators. The huge crowd boomed the decision heartily, in the belief that the stubby giant from down under had edged out a decision.

High Court Denies Todd Rehearing.

Olympia, Wash. — The state supreme court denied A. Rurle Todd, recalled mayor of Kelso, a rehearing. Todd is under sentence to serve a term in the Cowlitz county jail for malicious persecution.

Again

-the Greatest Sensation of America's Greatest Industry

Again, Chevrolet has created an automobile so far beyond all expectations in the low-price field that it constitutes the greatest achievement of America's greatest industry!

Built on a 4-inch longer wheelbase and offering many improvements in performance, beauty and safety—the Bigger and Better Chevrolet marks an epoch in the development of luxurious transportation at low cost. The engine is of improved valve-in-head design with alloy "invar strut" pistons... hydro-laminated cam-

shaft gears... mushroom type valve tappets... AC oil filter and AC air cleaner.

Throughout the entire car, similar advancements are represented—from the four inch longer wheelbase and the new semi-elliptic shock absorber springs to the four-wheel brakes and the beautiful new Fisher bodies in new Duco colors. Come in! See and drive this great new car. Test its thrilling speed, pick-up, smoothness and power—and like thousands of others you will agree that here is the world's most luxurious low-priced automobile.
