FINNEY OF THE FORCE By F. O. Alexander (© by Western Newspaper Union.)

Well, Goodbye, Then

East River Now Heated by Big Power Plants

Back in 1776 the East river at New York city froze sufficiently to allow an army to cross over the ice in safety. But nowadays the stream obstinately refuses to freeze, even when the temperature reaches its lowest extreme.

One reason for the warmness of New York's adjacent waters may be the action of the nine power plants along its shores. For every ton of coal consumed in making steam for the turbines, about 400 tons of water —which is drawn from the river—are needed to condense the steam back into water after it has served its useful purpose. The water is heated about 25 degrees before it returns to its original habitat and at least 400,000 tons of water pass in and out of the power plants every hour. It has been computed that this has the effect of raising the temperature of the whole river at least 10 degrees, in spite of the strong tidal current which changes its waters twice daily by influx from Long Island sound and New York harbor.

Easy for Woman to Find Parking Space

It was a busy corner and there were parking space for just one car. A gentleman espied the space, counted it his own and proceeded to ease his car into it. To do this he had, it seems, to back, turn, wheel, run forward, shift gears, and attack on the right and left flanks.

While he was going through this very elaborate maneuvering, a woman driver arrived and cleanly usurped the parking space by the absurdly simple method of driving her automobile straight into it without flourishes or trouble.

A moment or so passed and then the gentleman realized for all his strategy the position was lost. "Say, sister . . ." he began, and he was still talking as the woman snapped the door of the car and got lost in the crowd afoot.—Baltimore Sun.

Every community has at least one sucker who will do all the work if given a few chairmanships.

The Office Cynic, who tires of smart people very quickly, says a wisecrack is only a bromide under age.
