Answer This Question!

All Automobiles and Furniture are Painted by Air Pressure. Why not Your Home and Barns?

We Save You Real Money!

Think of Painting your Home or Barn with the Best Paint obtainable at a cost for both Labor and Material at very little in excess of the cost for the Paint you might buy from a mail-order house!

The Air Gun for Painting is a Great Labor Saver. The Finish is Beautiful. While Protection Value is Superior.

We use the best Paint Materials—both Oil and Color. If you doubt this statement, we permit you to select samples from what we are using and send them to the Oregon State College at Corvallis for Analysis.

Call us up at phone 102 Moro for estimates. This will put you under no obligation to us. Ask our customers about us. We refer you to the school boards of the DeMoss school, the Moro school, the Boardman school, the Grass Valley school, and the Grass Valley Elevator Company.

Our Air Brush, run by power, is a Master Painter, the "last word" in excellence in painting roofs or buildings. All the cracks, crevices, and inaccessible places are reached by Paint, driven under high pressure, like rain driven by a windstorm. A first blast of air gives a CLEAN SURFACE while the immediate following of the Air Driven Pressure Painting gives a CLOSE CONTACT, resulting in neat, beautiful work!

All Work done on a Guarantee and at very reasonable prices and easy terms.

Years of service in MODEL T FORDS

THE Model T was so strongly and sturdily built that it is still rendering reliable, economical service to motorists in every section of the country. Millions of these cars can be put in shape for two, three and five more years of use at very small cost.

So that you may have this work done economically and satisfactorily, the Ford Motor Company is still devoting a considerable section of its plants to the manufacture of Model T parts. It will continue to do so as long as they are needed by Model T owners. The following list gives the approximate labor charges for reconditioning the Model T Ford:

Engine	
Tune motor (including replacement of commutator case, brush and vibrator points if necessary)	\$1.00
Grind valves and clean carbon	\$3.75 to 4.00
Overhaul carburetor	1.50
Reline detachable car transmission bands	1.50
Install new pistons or connecting rods	6.00
Tighten all main bearings	6.00
Overhaul motor and transmission	\$20.00 to 25.00
Rear System	
Replace rear axle assembly	2.50
Install universal joint	3.00
Reline brake shoes	1.50
Replace rear axle shaft, drive shaft pinion, or drive gear	5.00
Overhaul complete rear axle assembly	\$5.75 to 7.00
Rebush spring and perches	1.75
Oil and graphite springs	5.00
Front System	
Overhaul front axle	\$4.00 to 5.00
Rebush spindle boxes and arms (both sides)	2.50
Replace or straighten spindle connecting rod	.75
Tighten radius rod or steering ball cap	.60
Tighten all sockets and joints of front-end	1.50
Replace front spring tie bolt or new leaf	2.50
Straighten front axle	3.00
Chassis	
Replace rear fender	1.75
Overhaul steering gear	3.50
Repair muffler	1.00
Overhaul radiator	7.50
Repair Coupe	25.00
Repair Touring Car	25.00
Reupholster Runabout	8.00
Reupholster Touring Car	15.00
Replace top deck (Coupe or Sedan)	4.00
Overhaul starting motor	3.00
Overhaul generator	2.60

These prices are approximate and are for labor only, because the need and number of new parts depend on the condition of each car. The charge for these parts is low, however, because of the established Ford policy of manufacturing and selling at a small margin of profit.

FORD MOTOR COMPANY

High Place Won By Moro Student

Harold Bryant, O. S. C. Graduate, Selected For Eastern Job

Moro is represented by one of the 534 graduates of the class of 1929 completing work for degrees at the sixtieth Oregon State College annual commencement June 3. Of the total number being graduated 489 will receive the bachelor of science degree, 23 the master of science degree, and 22 the degree of pharmaceutical chemist.

Men outnumber women in the graduating class 336 to 198, though the latter are scattered among seven of the 10 degree granting schools of the college. To get the bachelor of

Harold Bryant

science degree at O. S. C. students must not only complete four years of studies but must maintain an average grade of 80 or above. The result is that those in the graduating class are only those who have survived a four-year "weeding out" process that has eliminated the less determined students.

An engineering course was chosen by Harold Bryant when he enrolled, and he is now one of 116 graduates in his class. This school trains men in civil, electrical, mechanical, engineering and industrial arts. Mr. Bryant, choosing the electrical engineering department, His training has led directly to the various fields of public work involved in the future development of the country, especially the Pacific northwest. The curriculum he followed was developed according to the standards of the national engineering societies, the first two years of which are devoted to basic courses and the last two to more specialized applications. Many graduates this year were selected for advanced work and training with some of the leading corporations of the east.

Mr. Bryant was selected by the Westinghouse Electric Co. and will report this year to the company at Pittsburgh for further study and practical work, under a salary allowance to be paid by the electric company.

In addition to the regular class work, Mr. Bryant has taken an active part in campus affairs, belonging to Eta Kappa Nu, national honor fraternity in electrical engineering, the greater Oregon state committee and the associated engineers as well as the American Institute of electrical engineers. He served as rook basketball manager in his freshman year. Bryant is a member of Sigma Alpha Epsilon, national social fraternity.

Farmers Value Electric Appliances

The American farmer wants electric service, not only for what it will do on the farm, but because of its importance in making rural life more comfortable and complete, says F. D. Farrell, president of the Kansas State Agricultural College.

In a recent survey of 324 electrified farms, according to Mr. Farrell, it was found that 100 per cent of the farmers had electric lights in the home, 71 per cent had lights in their barns, 89 per cent used electrical irons and 69 per cent had electric washing machines. Other electric labor saving appliances were found in large numbers.

The farmer is manifesting as great an interest in the social values of electric appliances as in machinery for lessening or expediting farm work. In the past, rural life has suffered in comparison with urban existence only because of the lack of modern living comforts. Electricity is rapidly changing this.

From a dream a few years ago, farm electrification has become a proven fact. It is, to a great extent, out of the experimental stage. Each year thousands of additional farmers are enjoying the civilizing benefits of electricity with its saving in time, effort and money.

JUST A MINUTE

"I have only just a minute, Only sixty seconds in it, Forced upon me—can't refuse it, Didn't seek it, didn't choose it, But it's up to me to use it. I must suffer if I lose it, Give account if I abuse it, Just a tiny little minute—But Eternity is in it"

County Notes

Kent Local Items

Fred Brown is home from a trip to Salem.

Judge McKee and Justice of the Peace Smith were callers in town Monday.

C. R. Belshie the Moro stock buyer shipped out a mixed car of stock Saturday night.

J. E. Norton made a trip to the Valley last week, taking the children down where they will visit with relatives during the summer.

Phoebe Lyons, daughter of Alfred Lyons, was taken to The Dalles last week and operated on for appendicitis. She is reported as getting along nicely.

Carl, Earl and Joe Gregg made a trip out to Bend last week, taking their uncle who is here from Tennessee with them to show him some of Oregon.

W. G. Helyer and wife are home from Medford where they attended the session of the I. O. O. F. grand lodge and the Rebekah assembly. They report a nice trip and a good time.

William Mitchell and family, J. R. Dellinger and family were among those from here that went out to the fish fry on the DesChutes Sunday. They report that there was plenty of trout for all.

J. L. Davis, A. A. Dunlap, J. H. Gregg, G. C. Young and their families, Fred Haynes and wife, Dick Abell and Frank Haynes all motored around by the Clarno oil well, Fossil, Condon and Arlington Sunday. Of course they all stopped in Condon to see the ball game, and were pleased to see Wasco win, especially after watching the actions of a lot of the Condon fans.

Steam Shovel Uncovers Human Skulls

Tuesday afternoon a railroad steam shovel which is excavating preparatory to the laying of a double track about a mile east of Arlington, unearthed two human skulls and a quantity of human bones, according to W. A. Roberts, a timekeeper for the outfit.

Mr. Roberts stated the skulls and bones were found several feet under the high bank which they are removing. The dirt is being removed from the bank to the opposite side of the track and workmen discovered the skulls immediately after the shovel had dug them up. The skulls are of unusual shape, tapering to a point and very flat. One of them is well preserved, containing all of the teeth while the other has disintegrated with age. It is believed the remains are those of a prehistoric race who lived in this section of the country many, many years ago.

Mr. Roberts has the skulls in his possession and states he will ship them to the University of Oregon, of which he is a former student, for further investigation. — Arlington Bulletin.

Farm Pointers

(From School of Home Economics)

When the warm days of summer and a scarcity of green feed causes the hens to slow up or stop laying, moist mash acts as a stimulant and usually holds up the production or improves it, the Oregon Experiment station finds. It may be fed for about two weeks at the rate of about three pounds to 100 birds, or as much as they will clean up in 15 or 20 minutes. It is mixed with buttermilk or skim milk to a crumbly consistency.

An important factor in the well-being of the young pullets is to have them on the roosts by the time they are six weeks old. Crowding on the floor and in the corners of the brooding house hinders satisfactory growth. It may be necessary to resort to forced roosting for a few nights, but it pays, says the Oregon Experiment station.

Securities Are Best

"I believe that carefully selected securities of well managed companies supplying light, power, gas and other public services, are in many ways the best investment now available, considering both security and yield," declares Roger W. Babson, noted economist and statistician.

"I know of no investment, paying more than 6 per cent, which is as safe as the first preferred "customer ownership" stocks of such companies. "When every user of a product is a stockholder of the company producing it, we shall have a condition about 100 per cent efficient and fair. Soundly formulated customer ownership of this kind is one of the greatest contributions to economic welfare and progress which has been developed in recent times. It is a subject which should be studied not only by economists, not only by financial leaders, but especially by the men and women, the customers themselves, who are the chief beneficiaries of this splendid institution."

Results of Exams For Eighth Grade

Teachers Help To Start New Exempt Plan For Pupils

(By L. W. Rakes.)

As result of the eighth grade final examinations and the exemptions given by the teachers there were 39 eighth grade diplomas issued this week. There were two complete failures, 11 conditioned, and 9 incompletes. A failure is the case when a student fails to make the deadline, which is 70%, in three or more subjects in the examination. These students will be required to take all the subjects over in the next examinations. A conditioned pupil is one who fails to be allowed to take the examinations in those subjects (one or two,) in which he fell low, in the next examination — but he cannot retain the grades which he has made in the other subjects if he does not take the next succeeding examination and pass in the one or two in which he fell low. An incomplete pupil is one who has failed to collect the grades of the Oregon history, physiology, and geography from the county from which he came, or in which he took the examinations in these subjects in the 6th and 7th grades. A diploma will be issued to these students when they have sent these grades to the county superintendent's office. The grades must be those made in the state examinations and signed by the county superintendent of the county in which the grades were earned.

It has been a pleasure to note that the teachers have been very careful in making their exemptions. This has given the newly inaugurated plan of exemptions a good setting. A student knows from the first day of school that he can be exempt if he maintains an average of 90% in his daily work and in all the tests and quizzes that the teacher gives throughout the year, and if his department is satisfactory, and if he has attended the proper number of days in the last three years of his studies in the first eight grades of school, he can have a real aim. Some have taken advantage of it and have earned their diplomas in that way. About 15 of the graduates were exempt in every subject, but many more were exempt in certain subjects. As a common thing, students failed to make exemption in civics. That tells us to go a little stronger in civics government next year. Some of the students, who were exempt, volunteered to take the examinations making, in most cases, higher grades than the exemption grades which were awarded by their schools.

The next regular, uniform, eighth grade examinations will be held in the different school districts where there were either failures, conditions, or incompletes (if those who are incomplete wish to take the examination on subjects instead of writing to the official in the county where they were earned and sending in the duplicate grades) on June 6th and 7th.

The highest average in the eighth grade in the county was 95%. This was earned by a boy scout, Tommy Fraser. Tommy was not only exempt, but took the examinations as well.

Those to whom diplomas were issued are: Chester Coats, Jean Morris, Ray Brown, Gertrude Castañel, Myrtle Garland, Joy White, Harold Dutton, Charles Nunn, Arthur Spencer, Henry Allen, Matilda Holt, Dale Howell, Lester Wilson, Donald Burnett, Doris Fortner, Melvin Hansen, Lerna Peetz, Harry Ragsdale, Phillip Ruggles, Cordes Seethoff, Janet Stephens, Lyle Woods, Russell Belshie, Arthur Belshie, Tommy Fraser, Helen Seary, Grace Cothran, Delbert Rice, Marjorie Nahouse, Bruce Alley, Owen Eain, Anne McLeod, Sylvia Coyle, Rua Helyer, Jerrold Morehouse, Mabel Thomas, Florence Young, Georgia Blaylock, and Irene Payne.

Teachers' Examinations

Notice is hereby given that the County Superintendent of Sherman County, Oregon, will hold the regular examination of applicants for State Certificates at the court house in Moro as follows: Commencing Wednesday, June 12, 1929, at 9 o'clock a. m. and continuing until Saturday, June 15, 1929, at 4 o'clock p. m.

Wednesday Forenoon — U. S. History, Writing (Penmanship).
Wednesday Afternoon — Physiology, Reading, Composition, Methods in Reading, Methods in Arithmetic.
Thursday Forenoon — Arithmetic, History of Education, Psychology, Methods in Geography.
Thursday Afternoon — Grammar, Geography, American Literature, Physics, Methods in Language, Thesis for Primary Certificate.

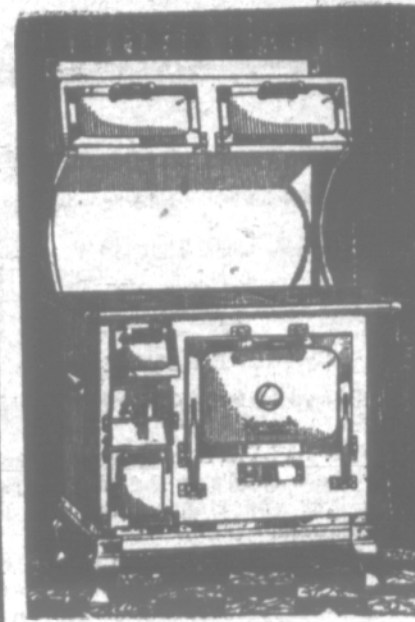

Friday Forenoon — Theory and Practice, Orthography (Spelling), Physical Geography, English Literature, Chemistry.
Friday Afternoon — School Law, Algebra, Geology, Civil Government, Book-keeping.
Saturday Forenoon — Geometry, Botany.
Saturday Afternoon — General History.

Lawrence W. Rakes
County School Superintendent.

Maybe all the tularemia talk is merely propaganda put out by the Rabbit Protective Association.

TWO STOVES

For — The Price of One.

With each Monarch wood and coal range we will give a Colman Aero Gas camp stove, giving you a summer-stove with your wood and coal range. With each Monarch Electric stove we will give an Electric Cooker Pot. This special offer is only good till June eight.

The HOLT Hillside Harvesters Are Here

We want you to see Models 34, 36 and 38 either at The Dalles or at our Moro, Arlington, Condon or Goldendale salesrooms.

These harvesters are of the old reliable Holt line of 40 years standing, vastly improved and now being built by the Caterpillar Tractor company.

Into these advanced machines are going the same high grade of workmanship and material that thousands of Caterpillar users will testify are found in the Caterpillar tractors.

The new features and improvements of the 34, 36 and 38 were not developed from theory, but from actual experience in the field—from the experience and suggestions of wheat farmers, and from an exhaustive study of the problems of the men who operate the machines.

The Result is Here Awaiting Your Judgment!
