

JEALOUSY CAUSES SLAYING OF GIRL

Salesman Tells Story of Crime in Hotel.

Washington.—Dexter Churchill Dayton, a twenty-five-year-old insurance salesman, is under arrest here, having confessed, according to authorities, to strangling Miss Marjorie Lucy O'Donnell, twenty-three, an employee of the National Geographic society, in the Roosevelt hotel. The young man is said to have told police he committed the crime through jealousy of another suitor, heightened by indulgence in liquor.

In a voluntary statement to police Dayton said he had repeatedly enticed Miss O'Donnell to promise to marry him, saying he would soon be earning enough money to care for them both, but that she had many times refused, indicating that she "might marry another man."

What Dayton did between the time he strangled the girl in a fit of jealousy, and the hour he called police, apparently is still cloudy in his memory. He is certain they began to quarrel shortly after midnight. At that time, Dayton said, he upbraided the girl for her reluctance to become engaged to him, and she replied by referring to the other man.

Wake Up at Noon.

Dayton said in his confession to police that he had been drinking heavily meanwhile, although the girl had taken only a few drinks. He declared that when he became so incensed he could no longer control himself, he seized the girl and they struggled about the room.

"I woke up later that day," Dayton told the police. "It must have been getting on toward noon, because the sunlight was strong outside. Then I began to realize what I had done. The thought was so awful I made up my mind to kill myself, but I found I couldn't get up the nerve. He said he sat for a moment contemplating his pistol then turned it to his temple and pulled the trigger.

"It wouldn't go off," he declared. "Although I snapped the hammer on several shells. Then I knew I couldn't kill myself and decided to call in the police. I telephoned for a bell boy; he came in a moment later, and I told him to call in the officers."

Writes Note in Hotel.

Dayton declared he started drinking early the day before the murder and went to the hotel about 11 a. m. that same day and registered. He continued drinking during the afternoon, he said, and later met the girl, inviting her to come to his room for drinks before going out to dine.

During the hours between the crime and its discovery Dayton wrote an incoherent three-page note on hotel stationery in which he told of his quarrels with the girl, his love for her, and his determination to commit suicide.

The note said in part: "I am going to kill my sweetheart and then myself. I know I love her. Without her love I cannot live. We both have deceived and hurt one another. Now that the effect of the liquor is wearing off I shall begin drinking again and get up the Dutch courage to kill myself.

"She cheated on me, I cheated on her; we both cheated on each other."

Polish Mourning Traditions

Polish tradition is very strict as regards mourning, at least in the case of women. Mourning is signified above all by a black hat and veil. In the hard post-war years poverty compelled women to accept any dark-colored dress and coat, even at the funeral itself.

The hat and veil are worn, not only by women but also by girls of all ages from ten upward. It is quite common to see a schoolgirl running about with a veil trailing behind her such as only an old-fashioned widow would wear in western Europe or America.

This custom does not affect working women, since they rarely wear hats but only shawls over their heads.

Burbot May Oust Codfish

The nearest fresh water relative of the cod, the burbot fish, may strip its kin of honors in producing medicinally valuable oil.

Scientific experiments, reported to the bureau of fisheries, have demonstrated that burbot liver oil is eight times as potent as cod liver oil in the treatment of rickets.

The burbot, inhabiting the Great lakes and considered a pest by fishermen because it tears their nets and preys on small fry, may become a significant part of the commercial catch it is believed.

The annual catch of the fish, known also as luter or eel pout, was 510,972 pounds in 1927.

Cigarette Statistics

The United States Department of Agriculture says that burned or burning cigarettes are discarded in the United States at the rate of 1,000,000,000 a year, or \$30,000,000,000 a year. A nation that made up pads of dry grass showed that a burning cigarette butt would start a fire in 90 per cent of the cases with a wind velocity of three to four miles an hour. The cigarette is one of the greatest fire hazards the forester knows. A trifling fraction of the enormous number of butts discarded is enough to do immeasurable fire damage to forests, wood lands and grass lands.

Hunters in Red at Funeral

Hunting horses and mourners in hunting costume attended the funeral of Mrs. Anna Isabel Jones, a member of the Quorn Hunt club, at Gladens, Wales, recently. Complying with her request that there be no indications of mourning, the corpse was dressed in her riding habit and reposed in a Russian caquet of polished wood. The hearse was a hay cart, painted red, the estate colors, and covered with moss. Mrs. Jones' two favorite hunting dogs were attended by a groom in red hunting costume. Burial was in a wild and isolated place on a mountain side.

Hard to Picture Orient.

Without the Date Tree

For untold ages the date has been a staple article of diet in the Orient. It is said that a half-pound of dates and a half-pint of milk make a sufficient meal for a person of sedentary habits. The date needs milk to round out its food balance. An intensely hot climate and plenty of water are necessary for the production of dates. As an old Arabian saying goes: "A date palm must have its head in fire and its feet in water." Some believe that when Adam and Eve subsisted very largely upon the date, they lived in the Garden of Eden, which produces to this day the best dates as regarded as the probable site of the Garden of Eden. Archeologists, in making excavations in this region, have uncovered ruins thousands of years old, among which have been found broken sculptures of the date palm, together with references to the use of its fruit as a food. According to an old Arabian story, after God had created Adam, some of the soil clung to His hand's and He molded it into a date palm. The leaves were set in a feathery crown at the top the same as He created man. So it is only natural that the palm should be as nearly perfect a tree as Adam was a human being.

Seam of Burning Coal Keeps Mountain Warm

A unique Australian phenomenon is the "Burning Mountain" at Wingen in northern New South Wales, which scientists say has been on fire 1,000 years.

According to a party of geologists, who have just returned from an exploration of the mountain, says an Associated Press dispatch from Sydney, there lies below the surface a burning coal seam. Long before European settlement in Australia "Burning Mountain" was known to the aborigines, and to them it owes its name, Wingen, signifying "fire."

The geologists report that the summit presents the appearance of the debris of a vast block of buildings consumed by fire with an explosion or two thrown in. Smoke and steam continuously are issuing from different points, and there are numerous deposits of alum and sulphur. The burning seam probably is 30 feet or more in thickness, say the geologists, and is being consumed at the rate of from 120 to 130 yards each century. The warmth of the mountain in winter time attracts cattle, horses, and wild animals.

Gems Always Desired

Brilliant objects have always inspired man with a passion for their possession, and precious stones have occupied an important position on account of their form and color. The history of gems runs parallel to that of humanity and has been associated with the development of religion and science from the most remote times. Their connection with the church can be traced from the offerings of jewels in temples of the ancient gods to their place by the emeralds of the Fifteenth century as the chief possession of the "treasury" of Christian churches.

Authentic Giants

Ella Ewing, known as the Missouri giantess, was born in Scotland county, Missouri, of normal parents, and at birth weighed 6 1/2 pounds. She grew abnormally to the ages of 8 and 22 years until she reached the enormous height of 8 feet 4 inches. She wore a number 24 shoe. It took 30 yards of silk to make a dress for her. When she stopped at hotels two ordinary beds had to be placed side by side so she could sleep across them. She made a fortune traveling about on exhibition and died at the age of 40 years.

Grades of Ebony

Ebony is the wood of a number of related trees, found in nearly all parts of the tropical world. Its northernmost range is northern Bengal, in India and in localities of similar latitude and climate. The best grades are from a certain species native to southern India and Ceylon. Another much appreciated variety is from Madagascar. Other places where ebony grows are in Africa, especially Angola; in the East Indies; and, the poorer Jamaica variety, in the West Indies.

Nation's Honey Production

In the United States the greater part of the honey produced is alfalfa honey from the western states, where several million dollars' worth is sold every year. Sweet clover, white sage and other mountain flowers, also contribute to the western supply. In the central states it is white clover, sweet clover, Spanish needle and heartsease honey. In the southern states, cotton, mesquite, horsemint and sweet clover, and in the eastern states, northern white clover are the leading honey flowers. Orange blossoms, clover, aster and basswood complete the list.

Just Another Example of Unrewarded Genius

Mankin has a habit of ignoring its benefactors and allowing its geniuses to die in want, Benjamin Dancer, who died in poverty and blindness in 1887, is a case in point. Dancer, whose name is practically unknown, would, if he could survey the world, see one of his inventions used untold millions of times daily. Every time a button is pushed to ring a bell and the ringing stops when the pressure is released, it is time to ring up one more for Dancer. He invented the spring electrical contact interrupter, which is the basis of all push buttons. This device was also used for years on automobiles and X-ray machines. He invented the porous cup used for years in wet batteries. Among other things he invented various appliances for research work by scientists.

OREGON STATE NEWS OF GENERAL INTEREST

Principal Events of the Week Assembled for Information of Our Readers.

The 1930 Lane county fair will be held September 16 to 19, inclusive, it was decided at a meeting of the fair board.

Carl Haberlach has been reelected secretary-manager of the Tillamook County Creamery association. This will be his 27th year.

Coo's Bay's 1929 lumber export exceeded by 10,000,000 feet the record of 1928. The figure for 1929 was 111,383,136, valued at \$2,068,300.

By a vote of 2 to 1 the Coos county court has decided to include in the 1930 budget \$23,000 for a new road from Marshfield to the beaches.

The Albany chamber of commerce is having printed 6000 12-page booklets, including a map of Linn county, for distribution during the coming year.

Prospects for a large building program at La Grande during 1930 are good. The Union Pacific will start work on the new depot early in the spring.

Lou Isaacs, oldest Indian on the Klamath reservation, died at Chilquinn. Her exact age was unknown, but she was at least 115. No relatives survive her.

Marion county will spend approximately \$785,000 in the improvement of its roads and bridges during the year 1930, according to estimates made public recently.

Notwithstanding the restriction on production last year the cut of the Bend lumber mills was approximately 26,000,000 board feet, a gain of 16,000,000 over 1928.

The tax levy for the city of Medford for the coming year will be 15.2 mills, a slight decrease from the 1929 levy, which was 18.3 mills. The tax will raise \$143,762.

The Umatilla county court recently set the 1930 tax levy at 12.3 mills, the lowest since 1918. This will bring in \$675,717.67 for the county for state and county purposes.

The Lane county court is asked by the Grants Pass chamber of commerce and the Josephine county court to oppose the proposed highway from Medford to the Oregon coast.

The Willamette Valley Sheep & Goat Breeders' association held its annual meeting at McMinnville January 11. Breeders are up in arms against sheep and goat-killing dogs.

The semi-annual meeting of the Sandy Pioneer and Early Settlers' society will be held in the Sandy grange hall Sunday, January 26. The program will be composed of numbers by old-time settlers.

It is reported that The Dalles that the government has secured a large tract of land on the Oregon side of the Columbia river south of Umatilla rapids and is planning a large airport for the use of mail planes.

The Dundee Walnut association recently shipped out the largest single carload of walnuts and nut-meats that has ever left Oregon. The single carload totalled 35 tons and was consigned to a Boston firm.

Improvements contemplated in Salem by the Oregon-Washington Water Service company during the next few months will cost approximately \$300,000, according to announcement made recently.

The first baby born in Vale in 1930 will start the new year with considerable worldly possessions, which will include a bank account, a savings policy, several trade accounts and numerous gifts, the donations of Vale business and professional men. The contest started the first and is open to all, providing the baby is born in Vale.

The whiskey racket helped Umatilla county about \$3115 worth in 1929. This much was turned over from the collection of fines for sale, possession and transportation during the year.

Based on figures of the telephone company the population of Klamath Falls including suburban areas is estimated at between 19,000 and 20,000. There are 3400 telephones in use.

A dairy herd improvement association has been launched among the farmers of Lane county, the aim of which is the weeding out of non-producing cows from the herds, and the employment of a full-time tester.

Postal receipts in Pendleton were \$59,318 during 1929, according to Postmaster Thomas Thompson. This was a slight increase over the receipts of 1928, but not quite enough to boost the office up into another grade.

Woolgrowers of Union county met Monday at Union for their annual meeting. The Union county association represents about 20,000 of the 30,000 sheep in the county, most of the largest operators holding membership.

Otto E. Hathway, 31, Portland insurance salesman, was instantly killed at McMinnville when his automobile, beneath which he was working, slipped from the jacks. The transmission struck his head, crushing it and breaking his neck.

The old Sanborn-Cutting company packing plant and warehouse, one of the largest salmon canneries on the Columbia river, was destroyed by fire at Astoria, with a resultant loss of more than \$250,000. The loss was fully covered by insurance.

It is said that at some points in central Oregon baled hay is retailing at \$50 a ton. Stockmen declare it is the most hay ever sold for in the Gateway section. At this place hay in the stack has been selling for \$18 to \$20, and delivered at \$25.

State prohibition officers participated in 93 arrests during the month of December, according to a report prepared by George Alexander, state prohibition director. Fines were collected in the amount of \$9300, with jail sentences aggregating 2355 days.

Notwithstanding Medford's collective bank account of \$3,838,422 is \$4,132 short of what it was January 1, 1929, regular 8 per cent annual dividends have been declared by the Jackson County bank and the First National and Medford National banks.

The Fat Elk Oil & Gas company, with a capitalization of \$300,000, will commence immediately sinking of a 24-inch well in the hope of opening an oil field in Coos county. Theerrick and machinery are on the ground on a hillside three miles southeast of Coquille.

A two-point buck deer was lassoed in the middle of the Columbia river by Captain Fritz leaving of the ferry Tourist. The capture took place two miles from Astoria. At Astoria a state game warden loaded the deer in his car and took it to the Tillamook game preserve.

There will be available for public improvements in Oregon during 1930 approximately \$29,500,000, according to a telegram prepared by Governor Norblad in connection with President Hoover's recent appeal for a speeding up of federal, state, county and municipal projects.

There are 825 prisoners in the Oregon state penitentiary, which establishes a new high population record in the history of the institution. As a result of congested conditions in the prison it has been necessary to establish sleeping quarters in the barber shop, commissary and hospital.

First power from the city's \$1,300,000 hydro-electric plant on the McKenzie was sent over the Eugene system last week. Five hundred kilowatts of current was generated to augment that from the old plant, and it will be increased gradually as the canal is being cleared of obstructions.

C. M. Nelson, Coos river dairyman, whose herd captured high percentage in butterfat production two successive years, has a cow, Bonnie June, which produced 912 pounds of butterfat in 12 months, a weight greater than the cow. Mr. Nelson said the clear profit this cow furnished him was \$355.52.

School buses, if operated exclusively in transporting children between school districts, are exempt from payment of what is known as the additional fee or excise tax, according to an opinion handed down by the attorney general at Salem. The opinion was requested by Secretary of State Hoar.

Depositors in the defunct Jefferson State bank have been paid 100 per cent of their savings accounts and 83 per cent on commercial accounts, according to announcement made by A. A. Schmitt, state superintendent of banks.

All records for a dry year at Corvallis since the soils department started keeping weather data in 1889, were broken in 1929 with a total precipitation of only 24.08 inches compared with the average normal amount of 41.78 inches.

Heavy losses in valuations of timber lands, tillable and non-tillable lands and in shares of stock, which are only in part offset by gains in the valuations of town and city property and improvements on both rural and urban property, account for the decline of approximately \$2,000,000 in assessed valuations in Oregon this year, exclusive of utility properties according to a recapitulation prepared by the state tax commissioner from reports submitted from the county assessors of the state.

Ladies of Long Ago The ladies to whom the troubadours sang had invariably half of the color of fax, as soft as silk and shimmering with a sheen of the finest gold in ancient Spanish romances the hair is either of pure gold, or definitely fair. In ancient Germany, Gretchen had to have "fair hair, like gold; long, bright, and curly." There is a famous description of a French lady of the Thirteenth century. "Her hair had the brilliance of gold, and was twisted into rebellious curls"—so evidently permanent waving was known.

Tomahawk Not Indian The tomahawk, which is sometimes considered a weapon peculiar to the American Indian, was originally a club carved into some convenient shape. It was most commonly a stout stick about three feet in length, terminating in a large knob, wherein a projecting piece of flint was often inserted. The hatchets of the Indians that are now called tomahawks are a European device and were not military weapons but mechanical tools.

Gas Frenzy Fires Carbon dioxide, which is expelled from your body whenever you exhale, has been put to use by the Los Angeles fire department to put out fires in which streams of water are of little use, as in chemical and oil fires. The gas is carried in high pressure cylinders and when released a cloud of dry ice like that used in certain kinds of refrigeration is squirted over the fire. This reduces the temperature and prevents oxygen from reaching the blaze, thus smothering it.

LIGHTS By GRANT DIXON of NEW YORK

Matters of Memory

I have a friend who prides himself on a certain quick memory which enables him to remember telephone numbers. He can remember any person's telephone number, when he has heard it once. And this is not idle boasting on his part, as I have seen him demonstrate his ability many times.

The other day I dropped in at a store with him while he bought a new hat. "What size?" asked the clerk. "I don't know," replied my infallible friend. "Seven, or seven and one eighth, or seven and one quarter. Somewhere around there."

Sure Fire

In the old days of vaudeville, a famous act was sponsored on by the "Go into your date" act. It meant that a comedian's first concern getting over very well, but a dance was a sure-fire way of getting out of difficulty. There were whole choruses of comedians who were better than the night club comedians of former days. Some of the best must be found.

As a matter of fact, two life-savers have been found. One is for the person who is drunk and the other is "Go to the top of the mountain and you'll find it." It never fails to bring down the humor.

The other day I saw a New York vaudeville comedian with a partner at a hearing that ancient and honorable tongue, and it is employed every week at the Palace.

The other day I saw a New York vaudeville comedian with a partner at a hearing that ancient and honorable tongue, and it is employed every week at the Palace.

The Big Kick

There are all sorts of practical jokes, but the latest one I heard of is the man who comes here bought an explosive golf ball. He started out for a round with a friend. The friend teased up an old ball. The practical joker said: "You can't play with me with a ball that old. Take this new one."

When the clubbed met the ball there was a loud explosion. That is supposed to be the big kick in the pants. It meant two extra rounds at the clubhouse table.

A Clock Man

There is a man who is energetic and energetic star, has always been a conspicuous pattern of pep even when he was supposed to be sick. Years ago, before he entered the service, he was in the habit of appearing in a public place to appear in a public place. He complained that he could not get up to do it because he felt rotten and was going home to bed. On the way out of the club he spotted over a piano. If it had been one of his good days, he probably would have snatched right over the first piano in the club.

True Luck

"I wish I had a suspicion that" my friend said. "I am not so sure after all. It is a great comfort to think that millionaires are not so lucky as they seem to be. Such a remark is not to be made. I, too, have seen my share of a killing in Wall Street."

One of the most satisfying anecdotes I have heard of is that of a man who telephoned his broker to buy 2,000 shares of something or other. The order was executed and he was, to say the least, disappointed.

"I was a pretty big mistake," he quipped. "I bought 200 or other is not the stock I intended to buy. I don't care where it is now. Sell it at the market."

The order was executed on the spot. Twenty minutes after the brokerage firm had started buying something or other for its customers, all of that stock had again been sold.

The net profit was \$12,000. This particular stock had long remained quiet, and when all the stock gamblers saw an order for 2,000 shares placed, they figured that something was about to happen. So many of them put in additional orders, and the stock went up.

Ostentation

Peter Gaskell, millionaire socialist and in a lecture in Boston: "Wealth, after all, is chiefly prized for the ostentation and display it lends itself to. Wealthy people in their hearts are very much like New rich."

"Newrich attended a wedding breakfast with an enormous new diamond in his necktie. Nobody complimented him on the beauty of the stone; though he kept adjusting his necktie nobody appeared even to notice it; so finally he rose from his chair and addressed the bride and groom in loud tones.

"May your wedded life, he said, 'be as bright and pure as this.' "And he tapped the diamond with his forefinger."

The Peaceful Colt

Two County boys were in a squabbling party that had followed the main assault. In a large shell hole they found a group of ten or twelve Germans sound asleep, apparently missed by the first wave.

"Well," said Sean "Shall we shoot em or stick 'em?"

"No, no," said Denis looking up at the sky. "It's a foin' day. Let's wake em up and have a fight!" Pullman News.

Money Machine Swindle

Lands Man in Prison

New York.—Although Lester Jefferson, Astoria grocer, admitted under cross-examination that he did "think he was going to make counterfeit money," William Kallas, twenty-nine, who was charged by Jefferson with grand larceny in a "money machine" confidence game, was held in \$10,000 bail for the action of the Queens grand jury.

Jefferson testified that on December 2, 1928, Kallas and another man came into his grocery store in Astoria with a machine which they said was able to reproduce any money placed in it. Bills were placed in the machine in front of Jefferson and the original bills and new duplicates came out. Jefferson testified that at the suggestion of the visitors he withdrew \$1,150 from the bank and placed it in the machine. The men told him it would take several hours for it to operate with so much money, and it was agreed to leave the box in Jefferson's care overnight. He said that in the morning when the men did not return and the machine did not show any signs of producing money, he forced it open and found it full of clipped newsprint.

Cats \$350,000, but Keeps at Odd Jobs Denver.—John W. Vanderlicke, sev-

enty-year-old odd job man, who was notified here that he is heir to \$350,000 from the estate of his brother, the late Howard Vanderlicke, millionaire oil and grain man of Kansas City, Mo., will "keep on working, because I must have something to do." The Denver man received an outright gift of \$100,000 in cash.

English Wanderer Models House After Submarine London.—M. Maurice Gloskera is a wanderer as well as a noted author. To keep up the wandering atmosphere, he has a house and furniture decorated to represent a pullman car. In the submarine room is a cocktail bar arranged around a wheel and periscope.

Easy to Don Coat Two men were chatting. "Why is it that Greeks and Italians can get into a coat easier than anyone else?" asked one. "I don't know," replied the careful one. "Did you ever notice the graceful overhead sweep of their arms as they slip on the coat with one complete motion?" queried the first speaker.

The other admitted that he had noticed the phenomenon in question "it's because their Roman and Greek ancestors used that method in slipping on their togas and they haven't gotten over the idea," asserted Speaker No. 1.—Detroit News.

A type of sweet potato grown in the Virgin Islands achieves a weight of 150 pounds, but we suppose in the seed catalogue it is represented as a good 300, at least.

A London paper says that popular songs reach Russia years after they are forgotten elsewhere. How striking, to see the Russians tramping into Manchuria to "Ramona."

NOTICE TO CREDITORS Notice is hereby given that Helen Deyo has been appointed Administratrix of the Estate of Clinton Clifford Calvin Deyo, Deceased, and has qualified as such.

All persons having claims against said Estate are hereby notified and required to present the same, duly verified, to said Administratrix at Rufus, Sherman County, Oregon, within six months of the date of the first publication of this notice. The Helen Deyo, Administratrix. J. Tracy Barton, Attorney for Estate.
