

NOW IS THE TIME

...TO BUY...

SHERMAN COUNTY LAND

Here is a Partial List of Properties For Sale

You will not have the chance to buy this at these figures six months from now.

\$1,000—160 acres, all well fenced; sink land in sec. 4, 1 s., 18 e.; \$500 cash; balance in two payments.

\$1,000—160 acres, all fenced, all in cultivation; this is the J. I. Miller farm in sec. 14, 1 s., 18 e.; \$500 cash; balance in two payments.

\$1,000—160 acres, all under fence; first-class wheat land; \$500 down; balance in two payments; C. P. Ragsdale land in sec. 10, 2 s., 18 e.

\$1,000—160 acres, all fenced; 100 acres now in cultivation; small house; 2 miles from railroad station, in sec. 26, 3 n., 17 e., Jasper Garrison land.

\$1,100—160 acres, all fenced; 140 acres now in cultivation; this is a number one wheat ranch, two miles east of Biglow; R. W. Taylor farm.

\$2,800—480 acres of wheat land all fenced; two miles from railroad station; house and barn on place; quite a number of fruit trees set out; this is one of the best bargains ever offered; this land can be bought on the best of terms.

I have for sale 920 acres ten miles east of Wasco, along Grass Valley canyon, or I will sell this land in small lots; this land is well watered.

I have for sale 830 acres in one body lying along the Grass Valley canyon—along on the north side of the canyon, and on the south side, taking in one mile of the canyon. This is known as the Mercer farm; a good house and barn on this land; this could be made one of the best stock ranches in Sherman county, yet all the land except along the canyon can be farmed; this land can be bought on the best of terms.

I have for sale the Ellis-Neece land, south of Moro 1 1-2 miles, 160 acres, \$1,100; all good wheat land.

\$24,000—320 acres, all under fence; 300 acres in cultivation; a never failing stream of water running through the place; this is a first-class wheat farm; good two-story house with six or eight rooms; good well of water at house; five miles from railroad station; this is one of the best bargains in Sherman county.

\$1,600—160 acres all under fence; 140 acres under cultivation; small orchard and plenty of fruit; eight miles from railroad station; this farm can be bought on easy terms, to suit purchaser.

\$2,000—320 acres; well fenced; all under cultivation; three miles from railroad station; small house and barn; the soil is dark sandy loam, of good quality; the land is somewhat rolling, but is a good wheat ranch, no better in Sherman county.

\$3,500—480 acres, all first-class farm land, and is known as the sink land; in sec. 16, 2 n., 17 e., at the Scott well; now called the Klondike farm.

\$1,000—160 acres, se. qr. of sec. 6, 1 n., 19 e.; 150 acres in cultivation; one of the finest grain ranches in Sherman county; ten miles east of Wasco; A. B. Able farm; 640 acres can be bought adjoining this farm.

\$2,000—320 acres, Henkle & Thompson land; 12 miles east of Wasco; 300 acres in cultivation; \$500 cash; balance to suit purchaser.

\$800—160 acres, 9 miles east of Wasco; small house; good barn; here is a wheat farm for \$5 per acre; wheat will soon be sold for \$1 per bushel; here is a bargain for someone wishing to buy a wheat farm.

QUIEN SABE?

Quien sabe—who knows—is a phrase in very common use among the Spaniards, and helps over many, many difficulties. It is expressive. What the weather may be coming winter, who knows? It may be snowy, wet, stormy, cold, or it may be sunny, warm, and clear. Who knows? Some of us today, hale and hearty, may lie on beds of torture, or hobble about on crutches, who knows? Before the autumn merges into winter many may have symptoms of approaching trouble, of the old rheumatism coming on, or of first attacks of sciatica, who knows? That's a conundrum. But there is one thing everybody knows, the best thing to do is to be ready for the weather coming and to take hold of it early. Everybody knows what is best. With St. Jacobs Oil in the house, everybody knows they have a sure cure for rheumatism, sciatica, or chronic. It is likewise known that in any stage of it, the great remedy does its work perfectly. If we suffer, we need not ask who knows, when it is so well known what is best.

Great Gifts to Education.
M. Religious Georgieff, the founder of the Sofia University, who died recently, bequeathed 3,000,000 francs to the Bulgarian government to be applied to the country's needs; 6,000,000 francs for a technical school to be established at Sofia and large sums for other public institutions.

HOME PRODUCTS AND PURE FOOD.
All Eastern Syrup, so-called, usually very light colored and of heavy body, is made from sugar cane and is strictly pure. It is for sale in drug stores, in cans only. Manufactured by the Pacific Coast Syrup Co. All genuine "Ela Gorda Syrup" have the manufacturer's name lithographed on every can.

A Fair Inference.
When the continual and unreasonable attacks upon the courts are considered, orderly people are apt to take a liberty with the poet and make up a couplet read: "No rouge e'er saw the halter draw with good opinion of the law."—Stockton Independent.

ITEMS OF INTEREST.

Omnibuses were introduced in New York city in 1820.

The first copper cent was coined in New Haven, Conn., in 1687.

Plants grow more between 4 and 6 a. m. than at any other time of day.

Of 73 historic kings of Scotland 61 are said to have died in battle or to have been murdered.

The German emperor declared in a recent speech that his grandfather was a chosen instrument of heaven.

An outlaw, three moonshiners and two other men were arrested at the Sunnol camp meeting at Kingwood, W. Va.

It is estimated that the lumber cut of the Miramichi and tributaries, Canada, will this season amount to 112,000,000 feet.

An ostrich lives about 30 years, and the average annual yield of a bird in captivity is from one to four pounds of plumes.

Caesar did not say "Et tu, Brute." Eye witnesses of the assassination deposed that he died fighting, but silent like a wolf.

Nearly every man, woman and child in Egypt is a smoker of cigarettes, and a pipe is hardly ever seen in the mouth of a native.

The largest winged insect in the world is the Atlas moth of Central Brazil. Its wings extend 14 inches from tip to tip.

One of the severest penalties to which criminals in Holland were in ancient times condemned was to be deprived of the use of salt.

A strong microscope shows the single hairs of the head to be like coarse, round ropes, but with thick extremely irregular and jagged.

Great Britain and Ireland contain 380 banks, the most important being the Bank of England, which has a capital of \$79,000,000.

The Coliseum at Rome was built by Vespasian to accommodate 100,000 spectators. It covers an area of a half acre and was 120 feet high.

The oyster is one of the strongest creatures on earth. The force required to open an oyster is more than nine hundred times its weight.

While asleep in the woods, a sawyer of Evansville, Ind., was bitten on the chin by a spider. He died of the effects of the bite some days later.

After forty years of hard, dangerous, and expensive missionary work there are in Japan today about 110,000 native Christians, in a population of 42,000,000.

Attempts have been made to produce spider silk, but have failed, the enormous nature of these insects not permitting them to live together in communities.

It is computed that all of the houses in London and New York could be built of the lava thrown out by Vesuvius since the first recorded eruption in A. D. 79.

Try Schilling's Best Tea and baking powder.

Paper Underwear Tested.
During the war, between Japan and China the Chinese soldiers were underclothing made of paper. Experiments made with these goods in the Prussian army proved unsatisfactory, as they were found to last only two or three days.

ADVICE TO WOMEN.
You cannot have nerve trouble and keep your health. In ninety-nine cases out of a hundred the woman's ovaries and the bladder are affected. They are not vital organs, hence they give out sooner.

Mrs. Lydia E. Pinkham's Vegetable Compound, by building up the nerves and restoring woman's organization to its natural state, relieves all these troublesome feminine symptoms. In confirmation of this we, by permission, refer to the following women, all of whom speak from experience: Miss CELIA VAN HORN, 1015 Sherwood St., Philadelphia, Pa.; Miss GRACE COLLINS, 1024 Eastern Ave., Cincinnati, O.; Mrs. NEWELL, 50 Ryerson St., Brooklyn, N. Y.; Miss ISABEL OBERG, 230 Chestnut St., Woburn, Mass.; Mrs. A. H. COLE, New Rochelle, N. Y., and many others.

Women suffering from any form of female weakness are invited to promptly communicate with Mrs. Pinkham at Lynn, Mass.

You can talk freely to a woman when it is revolting to relate your private ills to a man.

TOPICS FOR FARMERS

A DEPARTMENT PREPARED FOR OUR RURAL FRIENDS.

Grass Needs Mineral Plant Food—How to Keep Fruit in Winter—Hams Should Be Packed in Salt—Have Pure Poultry Stock.

Phosphate for Grass Lands.
Whenever the grass seedling falls the blame is usually laid upon the weather. But that is not always correct, even in part. Grass belongs to the same botanical family as us, and the grain has had a greater development of its seed. All farmers understand that the wheat crop needs phosphate to be grown successfully, year after year, on the same land. To be sure, the soil is cultivated, and there is a new seedling with some manure each year, for the grain crop. Yet farmers think that grass, without reseedling, and without new supplies of mineral matter, will continue to grow. The result is that the grass gradually dies out and is replaced by mosses or other weeds of low organization that can live without mineral plant food. Not only is the amount of grass lessened, but its quality is also impaired by lack of the mineral. On land that has long been without phosphate, the grass will not thrive, and cows which give milk will take to the eating of old bones to secure the mineral nutrition they require. People who have learned that ground bone is good to make hens lay are apt to forget that the more bulky cows have an equally wonderful operation to perform. That is to take from her grass feed the nutrition required to make milk, which is less concentrated than the egg, but contains very nearly the same kind of nutrition. When a farmer begins using mineral manures on grain, we found that the second and third crops of grass seeded with the grain did not run out as they used to. It is far better to apply the phosphate with the grain. The grass seeded with it will get the effects of the mineral fertilizing for at least two years thereafter.

To Keep Fruit in Winter.
If fruit and vegetables must be kept in the house cellar, a room should be partitioned off in the coldest part, if the other is too warm, and made secure against rats and mice. This is best done by having the partition of brick and the floor of good cement, laid so the rats cannot undermine it. No language can describe one's feelings on discovering the work of a family of rats in his cellar. They will eat up your vegetables. Such a room should have a window open to the north, if possible, securely protected by wire screen, so that cold air can be let in when needed.

Keep apples on the coldest side and potatoes on the warmest, if there is danger of freezing. In extreme cold weather an occasional pail of hot water or a lamp or two may be needed, but the colder such rooms are, up to the danger point, the better stuff will keep.

Some think that young grass cannot bear sunshine, and that a grain crop is needed to protect it. A nurse crop in winter is often of benefit by holding the snow, and thus shielding the tender grass from cold, drying winds; but in summer grass likes sunshine as well as does grain. The grain robs the grass of needed moisture when both grow together.—New England Farmer.

Pack Hams in Salt.
Those who intend to keep any smoked hams and shoulders for next summer should use salt for packing. It is more cleanly, and better in every particular, than ashes or other articles commonly used. All that is necessary is to so place the meat that the pieces will not touch each other, covering well the top pieces. The salt will not be wasted, as it may be used over again or taken to make brine. Hams packed in this way will not be musty or dirty on the outside, nor will they take any more salt than had been absorbed before packing.

Pure Poultry Stock.
A great many farmers who keep a flock of Plymouth Rocks are careless in regard to keeping stock pure. Because a hen is speckled, it doesn't necessarily follow that it is a Plymouth Rock. One of the greatest indications of impure stock is a feathered leg. Formerly it was not uncommon to see the Rock with more or less down and even feathers on the shanks, but it has become so rare that it is now taken as a sign of impurity. Impure blood, always avoid a fowl so blooded, or serious trouble in this direction will follow before the difficulty is entirely eradicated. If all poultrymen would be careful and throw out specimens so blooded, it would be a comparatively short time before the difficulty was entirely removed. Nothing can add more to the beauty of the Plymouth Rock than a clean, bright yellow shank.—Michigan Farmer.

Cultivation of Legumes.
The progressive farmer, who thinks closely about his business, will not expect any plan to perform miracles for him. He will fully understand that no clover nor peas can ever get from the air the potash and phosphoric acid that long cultivation has robbed his soil of, and he will, while supplying these, realize that it is enabling the plant to get for him, without cost, the nitrogen that he would otherwise have to buy, either by feeding purchased grain to animals, or by purchasing it in the form of a commercial fertilizer. Legumes will give us the nitrogen, and in a soil deficient in vegetable matter, will give us this, and it is found that applications of commercial fertilizers are more effective in a soil well stored with humus, than in a barren soil. But no plants, grown continuously on soil deficient in mineral matters, will ever make that soil fertile in the full meaning of the word. That is, no improver in soil can ever become permanently a fertile one from its own products. If a man is so situated that he can purchase food grown on other land, and feed it on his land, and return to his soil the manure thus made, he can increase the fertility of his acres. But there are few farmers thus favorably situated, and these are mainly dairymen. The man who cannot make a profit in feeding purchased food must get the plant food for his soil, and of a mineral nature, by the direct purchase of the phosphoric acid and potash, of which cultivation and cropping has robbed it. No plant that can grow, will restore any of the things to his soil, and the poorer farmers generally learn the limitations of legume culture, the sooner they will realize the great benefits that come from their intelligent culture.—Hoard's Dairyman.

Dried Corn.
One of the ways of keeping sweet corn in good condition for using is to dry it. The method is very simple and easy. Only those ears should be taken that are still in their succulent stage. If the corn has begun to harden drying

it will harden it still more. It should be boiled fully as long as would be required to thoroughly cook the corn on the ear. Then with a curved knife made for cutting corn from the cob, strip the grain off and put it in an evaporator. The more quickly the drying is effected the less danger there will be of flies laying their eggs in it, as they are apt to do when the corn is house dried. After a few hours exposure of the corn at a temperature of 150 to 160 degrees the corn can be taken out and placed in tight bags, which should be hung up where air can reach them. Two or three days later take out some of the corn. If it is damp, heat it all over again. This dried corn, if put up right, will keep as well as if in cans. It will be better than most of the canned corn that can be bought at stores, for the latter is apt to be too old, as there is much increase of weight when the sweet corn approaches ripening, though it is at the expense of delicacy of flavor and sweetness.

Thin Out the Fruit.
Experienced fruit growers have time and again urged farmers to thin out the young apples on the trees, but such advice is not generally accepted, being regarded as "rationalism," or waste of that which might be remunerative, yet the Massachusetts experiment station, after careful tests, keeping close account of the cost, as well as making a close comparison with trees thinned and not thinned, found that with apple trees there was an extra profit of one dollar by thinning, and a gain of 60 cents with plum trees, besides permitting of better facilities for destroying insects and diseases.

Good Blue Grass Pasture.
Where you have what we call a good, solid, well-matted blue grass pasture, that same land will produce at least twice the amount of feed, for the reason that it catches the snow, holds the rain much better, and not half the rain runs off that does from our short pastures. It holds a greater amount of moisture, because the grass is a mulch for the soil, and it will keep growing for weeks in a dry season, after it has ceased to do so on other land that is grazed to death.—Western Plowman.

Farm Notes.
It requires but a small amount of capital to get a start with sheep, and in opening up a new farm they will help materially to commence the income, consuming much which would otherwise go to waste, both in the pastures and in the stables. Cement floors to stables are said to be cold and uncomfortable in winter, which is an objection, but floors covered with cut straw, leaves or litter of some kind, enables the farmer to construct his floors in a manner to collect the liquids and thus enrich his manure heap.

Many farmers who are sufficiently progressive to invest \$1 or \$2 in a silage of eggs from pure-bred fowls have been ridiculed for their extravagance in so doing, but after they have established good flocks their neighbors who ridiculed them usually promptly come over and request to "exchange eggs," so as to derive benefit from the enterprise of others at a trifling cost.

There is no poorer economy than in buying a poor harness because it is cheap. Well-tanned leather, with due care, will resist dampness and will keep sound a long time. Harnesses should never be kept in the stable. There is too much ammonia in stables, which will quickly cause a harness to rot. When used in warm weather the harness should be cleaned often and kept soft and flexible with oil.

Lowland pastures should always contain redtop in some of its varieties. It makes the cleanest, most looking and sweetest turf of any grass. The fine-leaved varieties should be selected for cultivation in pastures. Meadow fescue is a valuable pasture grass, where the soil is good, and on sandy soils red fescue is perhaps one of the best species we can cultivate, associating with it English bluegrass.

Dehorning cattle is now practiced extensively, but there is a right time for so doing. The horns should never be removed when flies and insects are troublesome, and the instrument should be scrupulously clean. Late in the fall is an excellent time for the operation, and it is better to experiment with a few, instead of dehorning the entire herd. Novices can have the operation performed by a veterinary surgeon, if preferred.

For many reasons fall tree planting is preferable to spring planting. There is much more time to do the work properly. The roots are firmly established during the winter. The tree or shrub is then in condition for immediate growth on the opening of spring. Nearly all deciduous trees and shrubs can be shipped and transplanted in autumn to advantage; also, roses in the open ground, when slightly protected with suitable mulching.

There is nothing "fancy" in breeding animals of pedigree. The animals are bred for merit, and any farmer can be a breeder of pure breeds. But few keep stock for pleasure or "fancy," the object being to secure as large a profit as possible. The loss resulting from the use of unfit animals on farms is larger than all the losses paid by farmers, and the gain of a few more quarters of milk per day amounts to a large sum in a year.

In the winter of 1872 corn would not bring 12 cents a bushel in many parts of the West, and coal was \$11 a ton. In consequence a good deal of corn was burned for fuel. Now coal in some localities can be bought for about one-half the price of twenty-five years ago, while corn is worth rather more. If it was over real economy to burn corn the time has gone by, probably never to return.

A Canine Electrician.
The simplest electrician in the world is a fox terrier named Strip, belonging to a firm of electric lamp engineers in London. She is only 3½ years of age, and her business is to carry the wires through the narrow tubes which connect the dynamos at the central station with the private houses, which she performs with the greatest skill and quickness, never failing to find her way through the most intricate passages.

The Grave of Eve.
The supposed grave of Eve is visited by over 40,000 pilgrims each year. It is to be seen at Jeddah, in a cemetery outside the city walls. The tomb is 50 cubits long and 12 wide. The Arabs entertain a belief that Eve was the tallest woman that ever lived.

A Temperance Climate.
Tea and coffee are very bad for the health in Alaska, and whisky is simply deadly. The only drink which can be taken with impunity is water.

A girl may cry occasionally when a fish gets away, but she doesn't know real sorrow until she is so old she is out of bait.

Important Recent Discovery.
The Smithsonian Institution has received a collection which is of importance to the archaeologist. It is known as the Seion-Kart collection, on having been discovered by this Englishman in Somaliland, on the eastern coast of Africa. The implements were purchased from the discoverer by the Smithsonian Institution. There are about 50 pieces in the collection, made of flint, of quartzite, and ranging in size from an inch or so in length to half a foot, some weighing several pounds. The objects are supposed to be spear heads, battle axes and wedges, truncheons, bird-gongs or whatever they may be termed. The discoverer had this to say on the subject of his find and the locality where the objects were unearthed: "Certain landmarks as to the four rivers mentioned in Genesis led me to think that the Garden of Eden, if it ever existed, may have been here, and that these very tools had been made and used by Adam and his numerous descendants. At any rate, my discoveries in Egypt and Somaliland lead me to the idea that man's original home, or the place where he was gradually evolved, must have been in Africa, or at least, in a tropical land, where clothes were unnecessary and food plentiful to hand."

WAKE UP.
Yes, wake up to the danger which threatens you if your kidneys and bladder are inactive or weak. Don't you know that if you fail to compel them to action, Bright's disease or diabetes awaits your fate? Bright's disease strikes without delay. It has a most beneficial effect upon the kidneys when taken, and upon the bowels, liver, stomach and nervous system.

One of the visitors to the Tennessee Centennial was a Rutherford county man, 84 years old, who, until his trip to the Nashville exposition, had never been on a railroad train.

AN OPEN LETTER TO MOTHERS.
We are asserting in the courts our right to the exclusive use of the word "CANTORIA" and "FITCHER'S CANTORIA," as our Trade Mark. I, Dr. Samuel Fitcher, of Hyannis, Massachusetts, the originator of "FITCHER'S CANTORIA," the same that has borne and does now bear the facsimile signature of CHAS. H. FLETCHER on every wrapper. This is the original "FITCHER'S CANTORIA," which has been used in the homes of the mothers of America for over thirty years. Look carefully at the wrapper and see that it is the kind you have always bought, and has the signature of CHAS. H. FLETCHER on the wrapper. No one has authority from me to use my name except The Centaur Company of which CHAS. H. Fitcher is President.

The relatives of Joe Sullivan, who died in Oakland, Cal., and was seven feet eight inches in height, have put a guard over his grave, fearing that a showman will steal his body.

SEEDS.
The seeds of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is, leprosy. Dr. J. C. Smith's Cure is the only positive cure now known to the medical fraternity. Leprosy being a constitutional disease, requires a constitutional treatment. Hall's "Leprosy Cure" acts directly upon the blood and mucous surfaces of the system, thereby destroying the cause of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one hundred dollars for any case that fails to cure. Send for list of testimonials. Address: J. C. Smith & Co., Toledo, O. Sold by druggists, etc. Hall's Family Pills are the best.

One of the most curious results of the investigations made by doctors in the Russian jails is the statement that each group of criminals has its own peculiar color of the eye.

Piso's Cure for Consumption has saved me large doctor bills.—C. L. Baker, 4228 Regent St., Philadelphia, Pa., Dec. 8, '90.

Diamonds have been discovered, in rare instances, in the meteoric stones which have fallen to the earth.

The sooner you begin to use Schilling's Best Tea and baking powder, the better your opportunity to get some of that \$2000.00.

And the more you will enjoy your cake and eating.

A Schilling & Company
San Francisco

A Confederate Roll of Honor.
An effort is being made to compile a roll of honor for the Confederate Museum, in Richmond, Va., of all the soldiers and sailors who served the Confederate cause, with a verified report of the various commands to which they were attached during the four years of the war. Survivors and friends of those living or dead are appealed to make up the record.

A floral curiosity is on exhibition in the Temple Gardens, London. It is a \$5,000 orchid from Venezuela. It has a white flower which in shape resembles a sea-gull with outspread wings.

Cardinal Richelieu hated children and loved cats; when he died his favorite Angora pet refused to eat and soon perished.

Handel, the composer, used, when traveling, to order dinner for three, or if hungry, for five, in either London or Paris.

Electricity Is Life

The cause of all disease is the waste of energy—the organs of the body have not sufficient vitality to keep their natural position. Therefore, require aid. Electricity gives it through the proper use of

DR. SANDEN'S ELECTRIC BELT
This belt fills the nerves with electrical energy which quickly goes to the assistance of the weaker tissues and restores the system. It is a simple cure and never fails. Dr. J. C. Sanden, famous as a physician and a student of science and medicine for thirty years, has published a book, "Three Cases of Men," upon the cause of weakness and disease and its cure by electricity. It is sent free, closely sealed, to any address or can be had at the office. Call or address
