

Observation Cars.

On and after November 15, 1907, the observation cars between Portland and Oakland California, on trains Nos. 15 and 16 will be carried through instead of being cut out, as heretofore, at Roseburg.

Southbound, under this new arrangement, passengers holding proper transportation and Pullman accommodations may occupy these cars on the night leaving Portland until reaching Eugene at 12:32 a. m.

Skin Disease of Twenty Years' Standing Cured.

I want you to know how much Chamberlain's Salve has done for me. It has cured my face of skin disease of almost twenty years' standing. I have been treated by several of the smart physicians as we have in this country and they did me no good, but two boxes of this salve has cured me.—MRS. FANNIE GRIFFIN, Troy, Ala. Chamberlain's Salve is for sale by Mary A. Mee.

Methodist Church Services.

Preaching services every Sunday at 11 a. m. and every other Sunday evening at 7:30.

Sunday School every Sunday morning at 10:00.

Epworth League at 6:45 every Sunday evening.

Junior Epworth League at 8 p. m. every Sunday.

Prayer meeting every Thursday evening at 7:30.

What to Do When Bilious.

The right thing to do when you feel bilious is to take a dose of Chamberlain's Stomach and Liver Tablets. They will cleanse the stomach and regulate the liver and bowels. Try it. Price, 25 cents. Samples free at Mary A. Mee's drug store.

Harry Orchard Again.

Caldwell, Feb. 5.—Plans are being laid for the prosecution of Harry Orchard, the confessed murderer of former Governor Frank Steunenberg. The prosecuting attorney insists that Orchard has no immunity contract and that he will have to pay the penalty for his crime. The trial will commence in March or April.

It has been freely predicted that Orchard would be freed by the prosecution on immunity contract purchased by his testimony against Hayford and Pettibone. The prosecution denies this and Orchard himself has repeatedly sworn that he made no agreement with the state before giving his testimony.

Orchard is now being held in the penitentiary at Boise.

Chamberlain's Cough Remedy a Favorite.

"We prefer Chamberlain's Cough Remedy to any other for our children," says Mr. L. J. Woodbury of Twinning, Mich. "It has also done the work for us in hard colds and croup, and we take pleasure in recommending it." For sale by Mary A. Mee.

Neglected Colds Threaten Life.

[From the Chicago Tribune.] "Don't trifle with a cold," is a good advice for prudent men and women. It may be vital in the case of a child. Proper food; good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by Mary A. Mee.

A Stone Baby.

While performing an autopsy on the body of a woman 82 years old, whose death was thought to be due to tumor, Dr. Raymond Barnum, resident physician of the West Jersey Homeopathic hospital, at Camden, N. J., discovered that the real cause was the body of an unborn babe which had turned to stone. During 50 years it had been slowly calcifying. Similar cases are almost unknown in medicine.

For Rheumatic Sufferers.

The quick relief from pain afforded by applying Chamberlain's Pain Balm makes it a favorite with sufferers from rheumatism, neuralgia, lame back, lumbago, and deep seated and muscular pains. For sale by Mary A. Mee.

ON THE UPPER ROGUE.

Bargains in Fruit, Farm and Timber Lands.

Below will be found some real bargains in timber and fruit lands which are worthy of your attention.

238 acres—On Rogue river, 30 miles from Central Point. Good two-story frame house, good barn and other buildings, good well of excellent water, family orchard of apples and all kinds of berries. About 100 acres of fine alfalfa land. Valuable water right on Pogue river with ditch constructed to place. Tri-weekly mail service passes door. Excellent hunting and fishing. Price \$20 per acre.

160 acres—3 1/2 miles from Prospect, on Crater Lake Park wagon road and within 1/2 mile of Ray ditch and power site. Good two-story frame house and other buildings. Good fences. Some fruit on place. Good well of water. 40 acres in timothy. 1,500,000 feet of pine and fir timber. Good outside range. Price \$1800. A snap.

160 acres—Same neighborhood. Good house and barn, good fruit and berries on place. 2,000,000 feet pine and fir timber. Price \$1800.

160 acres—Good fruit farm. All good alfalfa land and watered by living springs. 25 acres in cultivation. Good house and barn. Near post office and good school. 3,000,000 feet fine red fir timber. 30 miles from Central Point, on Fort Klamath road. A most desirable home. Price \$3,500.

For further information, inquire at the HERALD office, Central Point, Ore.

Our Big Clubbing Offer.

Arrangements have just been completed whereby the Central Point Herald is enabled to make one of the greatest clubbing offers ever made by an Oregon newspaper. Here it is: Central Point Herald, per year, \$1.50. Oregon Journal (semi-weekly), \$1.50. Pacific Monthly - - - \$1.00. Total - - - \$4.00. Our price for all three, only \$2.50.

The Semi-weekly Journal is the leading semi-weekly newspaper of the state. It gives all the general and state news and in addition gives the complete and correct market reports twice each week. In the Friday issue a page of "Funny Pictures" for the children, a page of short stories, and other features make it a welcome visitor in every home.

The Pacific Monthly, published at Portland, is the leading magazine of the West. It is ably edited and beautifully illustrated. Its stories are clean, wholesome and interesting, all with more or less of a flavor of the West. Special articles on irrigation, stock-raising and similar industries are at once entertaining and instructive.

The Central Point Herald is a strictly local newspaper. The HERALD does its best to set forth the advantages of the Rogue River Valley, particularly that portion immediately adjacent and tributary to its town. It labors for the advancement and upbuilding of Central Point and vicinity and is entitled to the support of every citizen of this section of the Valley.

Take advantage of this great offer at once. It will only stand for a limited time. Three Publications that you need for the price of two. You save \$1.50 and that's "worth while."

Coughs, Colds, CROUP, Whooping Cough

This remedy can always be depended upon and is pleasant to take. It contains no opium or other harmful drug and may be given as confidently to a baby as to an adult.
Price 25 cents, large size 50 cents.

Sold by Mary A. Mee.

Coolness in Facing Accidents.

Indignation over the terrible mining calamities which closed the year 1907 seems to have been justified by the reports of the officers engaged in investigating the causes of mine explosions. Reckless exposure of lives has been proved, although perhaps the actual shortcoming on the part of employee or employer which caused any particular accident has not been pointed out. Any one of many faulty conditions may have started or contributed to the horror.

In the case of a fire calamity like that of the Boyertown Opera House the original cause cannot be charged with responsibility for the whole lamentable history of the night. We play with edged tools and handle fire continually in our rapid way of living. Danger lies in not being prepared for the possible. Recently a large public school took fire and was emptied of pupils without accident because the teachers and elder scholars had been trained to look for a contingency of the kind and thoroughly drilled for the exciting occasion. There was no panic. Spectators at a show are usually not in a condition for cool action. They are excited with the pleasure of the spectacle. But there might be a number of cool heads scattered through the house to watch for accidents and not be lost in the play. Being cool themselves, their calm tones would do much to restore confidence, and it would be possible to prevent adding to the horror of the fire by trampling to death the helpless and weak, who but for the madness of the hour might escape. There is always danger in crowds, and every crowd should have monitors on duty, ready for any emergency.

The Atlantic Bridge.

Last year about 3,000,000 passengers crossed the Atlantic, between European and American ports chiefly. This was an increase of 1,000,000 over 1906, which was the record year up to that date. With this stream of humanity constantly increasing and ever in motion between the shores, the time of passage less than five days and a three day ship in sight, the Atlantic ocean is bridged to all intents and purposes. The rate of speed already attained beats that made by a roadster and equals that of the average railway passenger train when long distance trips are made.

And the owners of this bridge will work to maintain and improve its capacity. It is not probable that steamship owners are more alarmed over the possible rivalry of the airship than the cable men are about wireless competition. There is now enough competition right in the field to keep alive the spirit of progress. At the present rate of progress an ocean liner becomes obsolete in ten years. Speed is not the only requisite for the ship which forms a link in the modern Atlantic bridge of boats. Comfort and the safety of the passengers are more important than they were in the old days. People traveling upon urgent business will put up with a good deal. Voyagers for pleasure demand pleasure all along the line. It has come to pass that any one who has the price may depend upon a swift and comfortable passage between the new world and the old. The bridge is never closed for repairs.

A King's Big Job.

It is said that King Edward of England wishes to have it understood that he is no mere figurehead, but a real king on the throne. Recently a sensation was created by the publication of the letters of the late Queen Victoria, and it is found that these letters have been purposely arranged so as to show the great influence of the throne in guiding the foreign relations of the British empire for the past fifty years.

England lives under a constitution, and the people look to parliament on all domestic questions. But with her vast colonial system stretching all over the world, Great Britain's foreign affairs are of vital moment in the life of the nation. King Edward seems to insist upon using the power inherited from his mother in his mother's spirit. While observing loyally the written constitution of the empire, he will reveal to the world that his country has an "unwritten constitution," which has grown around the throne. This unwritten code has been invoked whenever the dignity and security of the whole nation demanded it.

When Edwin M. Stanton was secretary of war nobody had any influence with him. Maybe that is the reason why a monument to Lincoln's war secretary has been so long delayed.

It's getting so that if you want an old fashioned winter from start to finish to add to your collection of experiences you'll have to look in the antique shops for one.

Occasionally giving a new member of congress permission to talk out in meeting is like making him the victim of a practical joke.

Last year there were 70,000 applications at our army recruiting stations and over 50,000 rejections of poor timber.

CULL BEANS.

Their Value as a Feed For Young Pigs and For Sheep.

Beans are a very important agricultural crop in Michigan, the total crop ranging between 1,500,000 and 5,000,000 bushels per year. It has been estimated that from 5 to 10 per cent of the total crop consists of culls or damaged beans, the proportion being influenced by the peculiarities of the season and weather conditions at the time of harvest. Of these cull beans about one-half are probably used for feeding purposes.

Fed to Cows and Swine.

R. S. Shaw and A. C. Anderson of the Michigan experiment station, who have recently studied the value of cull beans as a feed for young pigs and for fattening pigs, state:

Mixed with other grains, cull beans may be fed to sheep, and large quantities are used in this state for this purpose each year. It is reported that they are used as a food for dairy cows. They are also fed to swine.

It is not desired to advocate the extensive use of beans as a swine food, especially in the fattening or finishing period. Pork from hogs which have been fattened quite largely on beans is generally soft and lacking in quality. If a considerable portion of the pork produced in the state were of this kind it would lower prices and work serious harm to the swine industry. It is generally conceded that bean fed hogs store up a fat having a lower melting point, and consequently a softer fat, than hogs fed upon many other feeds and that a considerable portion of the element called quality in pork is dependent upon the melting point or character of the fat stored up.

In the case of mutton finished upon beans no such criticism has been made, probably because there is relatively less fat in the carcass of the sheep and its character is not so essential to the quality of the meat as in the case of the pig.

Two Ways of Cooking.

In the Michigan experiments the cull beans used were cooked in two ways—the one by injecting live steam into a barrel containing the food to be cooked, the other by the use of the ordinary feed cooker, consisting of a caldron kettle, with a cast iron stove as a jacket for the same. A large variety of cookers of similar sorts are upon the market. In cooking small amounts the kettle gave the better results, while the steam was more convenient for larger quantities.

Keeping Squashes.

The best luck I ever had storing squashes and pumpkins was in a cellar adjoining a furnace room, says a writer in Orange Judd Farmer. It was very dry, and the windows were all kept open until there was danger of frost entering the cellar. The squashes were gathered just before frost without bruising, care being taken to leave all the stems on. They were set upon shelves about four feet up from the cellar floor. The windows were left open for awhile every warm day during winter to air the cellar. The cellar was kept dry and cool. These squashes kept nicely until Jan. 1; then some of them began to speak. When I wanted one to use I looked them over and used the ones that were beginning to show signs of not keeping very well. By this method none went to waste. A number of them kept until spring. The squashes were the Hubbard, the Hester and the Marlow. There was a fine lot of them, and I do not know that our family ever enjoyed anything better than they did those squashes. The Hester squash especially is a fine keeper and if cooked right is equal to sweet potatoes.

Handy Device.

There is no excuse for straining your back or offering the hired man an occasion to quit because of having to lift wagons and other farm implements with a rail and main strength when you can easily make in an hour a substantial jack such as shown in the cut from "pick up" pieces that are now lying idle, possibly in the scrap pile.

The upright may be 3 by 4 or 4 by 4 inch stuff of such length as will allow

A WAGON JACK.

the handle or lever to rest a little above the axle level of your highest wagon. This upright is cut into with a rip saw, as shown in the sectional drawing, to admit the lever and the lock bar that holds the handle in place after the wheel is raised. Holes are bored, and two bolts are inserted to hold the lever and lock.

The base should be five or six inches wide and twenty inches or two feet long and well braced to the upright from either side, as shown.—Farm and Fireside.

In Southern Orchards.

The fig is a very much neglected family fruit in most southern orchards. No other is so sure and regular in its returns, and the bushes occupy waste spots, bear neglect and yield steadily through the growing season as no other does. Fill up the gaps with figs.—Farm and Ranch.

If You Love Her

Don't be afraid to tell her so. She will not hurt you. Brace up, be a brick and

"Pop the Question"
