

Many Oregon Communities Present Their Claims.

No state in the Union is spreading more high class advertising matter than Oregon. The splendid booklets issued to present the claims of Yamhill County, Albany and Linn County, Grants Pass, Roseburg, Medford, and Ashland are superior to those issued by the commercial bodies of other states. Eastern Oregon is not being neglected, and this character of advertising cannot fail to have an advantageous effect, and other communities should see that their claims are not overlooked.

Dayton has come into line with the other live centers of Yamhill County by organizing an active commercial club. Manager M. O. Lowmesdale of the Yamhill County Development League held a meeting there the other night and raised \$650 for advertising purposes.

Forty-four different people competed for prizes offered by the Cherry Fair at The Dalles, and there were 681 boxes of cherries on the tables.

Albany College begins her first annual Summer Bible School July 17th, continuing until the 27th. The speakers are from Oregon and six other states. It is a new idea, an out-door school.

Portland people generally celebrated the Fourth at other points. The holiday was universally observed and the city was practically deserted.

County Judge C. J. Trenchard of Astoria suggests that the Oregon Development League take up the matter of good roads throughout Oregon. The judge makes the suggestion that some capable men be employed by the state to educate the people of every community in the commonwealth along these lines.

The big warehouse being built by Cranfill & Bonnett and Freeman and Wiley is rapidly nearing completion.

Mrs. Caldwell's new residence in Pattison's addition is nearing completion. Sanderson & Sons are the contractors.

Butte Falls celebrated the Fourth in grand style. B. H. Harris, who was in town Monday, estimated the crowd there at from 1500 to 2000. A \$5000 school house is in course of construction and the saw and planing mill is running full time. Mr. Harris stated that Mr. Dewing will shortly either get the money due him from the P. & E. R. R. or will get the road, and in either event he will build an electric line from the nearest S. P. point to the Falls.

CURL LEAF.

Spraying For Control of This Disease of the Peach.

A very important complication must be considered in spraying for blight control. This is the occurrence of another peach disease, the curl leaf. The effects of this trouble are too well known in California to need description. The control of the disease is very successfully accomplished by spraying in February or March, just before the buds unfold, but a time which is too late for blight prevention.

Treatments Given.

In the experience of 1905 the one fall spraying controlled both diseases—a most satisfactory condition. In the spring of 1907, however, a very virulent attack of curl leaf occurred, especially in the lower Sacramento valley, while the blight fungus proved somewhat less active than in the previous season.

The result of this attack is plainly shown by the results of spraying—viz, that the November or December application did not entirely hold the curl leaf in check, although as successful as before with the blight. Consequently some orchards sprayed properly and successfully for blight were badly injured by curl leaf, while others sprayed later were protected from curl leaf.

All that had been expected of the blight treatment held good when its effects were differentiated from those of the other disease, but the necessity of two sprayings rather than one for the positive control of both diseases has become evident.

Prune if possible before spraying, but do not delay the work on account of pruning.

It is recommended by the California experiment station to spray again for the prevention of curl leaf about Feb. 15, or just before the buds open, with bordeaux, 20-20-200, or lime, salt and sulphur.

The Albemarle Pippin.

The apple which has made Virginia famous at home and abroad is the Yellow Newtown, otherwise known as the Albemarle Pippin.

Whether pomologists accept the name Albemarle Pippin or persist in calling this apple the Yellow Newtown makes little difference, for it will always be known by Virginians and in the trade by the name of Albemarle Pippin. The high state of perfection attained by this apple fully merits this distinction and the almost fabulous prices often received for it. It is not usual for our growers to sell their fruit for \$10 per barrel, and sometimes brings as much as \$12, \$15 and even \$20 per barrel, about two to three times as much as the average red apple.—Professor J. S. Phillips.
