How to Cure a Cold.

Be as careful as you can you will occasionally take cold, and when you do, get a medicine of known reliability, one that has an established reputation and that is certain to effect a quick cure. Such a medicine is Chamberlain's Cough Remedy. It has gained a world wide reputation by its remarkable cures of this most common ailment, and can always be depended upon. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and aids nature in restoring the system to a healthy condition. During the many years in which it has been in general use we have yet to learn of a single case of cold or attack of the grip having resulted in pneumonia when this remedy was used, which shows conclusively that it is a certain preventive of that dangerous disease. Chamberlain's Cough Remedy contains no opium or other narcotic and may be given as confidently to a baby as to an adult. For sale by Mary A. Mee.

Teaching Morality.

The recent assembling in London of a congress to discuss the problems of moral culture in the public schools is significant in an age when men and women on every hand are insisting that the world is growing better. It goes without saying that the statesmen, professors, educators and humanitarians gathered at the congress are factors in movements already in operation for the uplifting of public morals. If the older agencies of good are doing yeoman service already the congress may stimulate them to doing better, or if, in spite of the optimism of the few, things are really going backward it may point out weaknesses in the present systems and suggest remedies. It is well to take stock of our assets now and then, and even though it turns out that the congress was only a conference and not a parliament, good must come of it.

Some one has observed that the wisdom or unwisdom of trying to regulate public morality by law depends altogether upon the existence of public morality to begin with. It is a comparatively modern notion, in practice at least, that education is a process of drawing out rather than of putting in. Applying this to the question in hand, there must be a basic morality in the human material handled in the public schools before any results powerful enough to give bias to the general trend can be roaped. There is always an educational force at work below and behind the public school. The fruits of this force when good may be increased and vivified by the organized system and if evil ought to be neutralized in some way.

Old newspapers for sale at the Herald office. Bundle of twenty-five for 15 cents.

A Chicago health physician a short time ago issued a bulletin in which he warned the people of the city against the danger of the spread of scarlet and typhoid fever, diphtheria, tuberculosis and other contagious diseases by means of the common house fly. He recommends as an effective method of exterminating this omnipresent pest a plan discovered by Dr. Delazare, a French army surgeon, who has found that if one part of formal (also known as formalin or formaldehyde) is mixed with nine parts of water and put on plates which are to be set wherever the flies are likely to congregate they can easily be exterminated. The insects seem to be attracted by the mixture as if it were sugar. Even the emanations of the mixture are deadly to them. In one large room in which the doctor tried this method the number of flies killed averaged 4,000 a day.

Following a protracted dry spell which has been characterized quite generally the country over with numerous forest fires and parched pastures, there will be a tendency to stuff the young pigs with a heavy ration of green and immature field corn. Better let them go hungry and stay thin than make this mistake. Immature corn may be fed, but in limited quantities, and the ration should not be increased until the food is dry and hard. A pig's digestive apparatus is just as likely to be upset as is that of the human being who jumps of a sudden from a diet of pork, potatoes, soda biscuits and dried apples to all the green cucumbers and sweet corn he can stuff. In the latter instance there is quite likely to be violent disturbance. It's just so with the pig, only that he doesn't have sense enough to quit eating the stuff that has upset his stomach. In which case his owner should have sense enough to quit placing the corn within his reach. Feed the pigs sparingly of the new corn. It will mean a saving of dollars to the end.
