CENTRAL POINT, OREGON, THURSDAY, JULY 22, 1909.

NO. 14

WILL MANUFACTURE CONCRETE BLOCKS

A new industry, that gives promise of developing into an institution of much importance, was launched in Central Point this week by Messrs. D. E. K. D. and W. E. Jones who are recent arrivals in this community from Walla Walla, Wash.

They will engage in the manufacturing of cement blocks, and now have their plant in full operation and are turning out cement building blocks at the rate of 400 every twenty-four hours. Their plant is fully equipped with mixing machines, moulds and in fact every thing that is needed for the turning out of a first class product. The plant is located just below the Creamery building, where they now have a force of six men working day and night. As soon as possible they will operate their mixing machine and pumps with an engine, thus giving them a greater speed than at present. When they first conceived the idea of operating at this place they thought that only a small plant would be necessary to meet the demands but their first order was for 11,000 blocks for the new Freeman building, to be erected on the corner of Front and Pine streets, which makes it almost imperative that they secure machinery of a greater capacity.

These gentlemen have contracted with S. H. Murray for gravel from his ranch below town and are shipping cement by the carload lots from Napa, Calif., two car loads having been received already.

With the machinery that they now have they are prepared to turn out anything in the line of cement building material from a brick to a porch column and as all are experienced cement men we feel sure that their enterprise will develop into one of the leading ones in Southern Oregon.

Terribly Scalded.

Is something we hear or read about every day of our lives. Burns or scalds either slight or serious are bound to happen in your family, be prepared by having a bottle of Ballard's Snow Lintment handy. It relieves the pain instantly and quickly heals the burn. Sold by Mary A. Mee.

"Ford 2" Car Passes Here.

The "Ford 2" car, winner of the New York Seattle automobile race, passed through Central Point Wednesday evening on its return trip to New York, via the southern route. B. W. Scott, who drove the car across the continent was at the wheel, and at his side was C. J. Smith, the machinist who accompanied him on his trip. The car is making the trip by easy stages and will go as far south as Los Angeles before starting east.

The "Ford 2" made the trip from New York to Seattle in 20 days and 52 minutes, a distance of 4006 miles. Other than being very dusty and dirty the car shows very little effects of its long trip and was able to go through Central Point at a rate that does not conform with the speed regulations of automobiles in most cities. The car stopped over Wednesday night at Medford continuing its journey Thursday morning.

For Sale.

(Man or woman.)

A 320 acre South African Veteran Bounty Land Certificate—Issued by the Department of the Interior, government of Canada, Ottawa, under the Volunteer Bounty act, 1908. Good for 320 acres of any Dominion land open for entry in Alberta, Saskatchewan or Manitoba. Telford, 131 Shuter street, Toronto, Can. 12d15

Says Timber Will Never Run Out.

Fredrick Weyerhaeuser, takes issue with Gifford Pinchot on the statement there is danger of exhausting the timber supply in 20 years. Weyerhaeuser says he believes the timber supply of the United States will never run out, states exchange.

Well Weyerhaeuser ought to know. He has about as much of it as any of us common pligs.

FOR SALE—Good horse and buggy, two milch cows, five stands of bees. Enquire of Mark P. Welch, Central Point, Ore. 4tt

CITY COUNCIL ADOPTS STRINGENT ORDINANCE

The city council met in adjourned regular meeting Friday evening, at which time the long looked for fire and building ordinance was brought up and passed. The passing of this ordinance has taken up much time of the council and has required a great deal of deliberation as a portion of the territory covered by the fire limits extends into the residence portion of the city and it is not the intention of the council to work a hardship upon any citizen of the town and as a consequence a few exceptions to the general provisions of the ordinance were necessary.

The ordinance first provides and describes the fire limits of the town as follows: Commencing at the center of the intersection of Oak and Front streets in said town, running thence in a northerly direction along the center line of said Front street to the intersection of the center of Manzanita street; thence in an easterly direction along the center of said Manzanita street to the intersection of the center of Fifth street, thence in a southerly direction along the center line of said Fifth street to the intersection of the center of Oak street; thence in a westerly direction along the center of said Oak street to the place of beginning.

The ordinance provides for the appointment of a fire committee, consisting of three members of the council and the mayor, who shall act as ex officio chairman. The members of the fire committee appointed by Mayor Leever Friday evening were Councilmen Jacobs, Hatfield and Pattison. The appointment of fire chief was not made at the meeting.

Under the provisions of the ordinance all buildings of one story must be built of brick, stone, concrete or other non-combustible material and walls must be at least eight inches thick, while building of two stories or more the walls of the first story must be at least 12 inches thick except of the top story where they must be at least eight inches thick. The roofs of all buildings constructed under the provisions of this ordinance must be of tin or other non-combustible substance.

The repairs on any building within the fire limits, exceeding \$25.00, must be made under the supervision of the fire committee, and only after first having obtained permission to make them. Repairs on any building shall not exceed 25 per cent of the valuation of the building. No building can be moved within the fire limits, except from one portion of a lot to another while permanent improvement are being made, and then for only a period of ninety days. No lights are allowed in any livery stable or building where hay is store other than electric lights or where they are covered by a lantern.

The fire chief is given power to enter upon any premises covered by the provisions of the ordinance to inspect any building and to see that all provisions are faithfully carried out. The ordinance also makes it a misdemeanor to burn any trash within the fire limits without first having obtained a permit from the fire committee, and no fire will be permitted within 30 feet of any building within the limits.

No hay can be stored in any building that is not battened or weather boarded and no hay can be stacked on the ground within 100 feet of any building within the corporate limits of the city.

In the residence portion of the city that is covered by the fire limits exceptions to the provisions of the ordinance are made as follows: Any additions, watertanks, wood sheds or other buildings may be erected, where the value of the improvements does not exceed 25 per cent of the valuation of the property.

Many other provisions are made, and as a whole, the ordinance covers the ground pretty thoroughly and we hope to see the most rigid enforcement of all sections.

Another Good Example.

C. W. Jeffers has on exhibition in the Herald office a branch of a Sugar prune tree that is cert inly an excellent demonstration of the productiveness of the Central Point soil, and of what may be accomplished with water in this locality. The branch is about 12 inches in length and has fully thirty large prunes upon it. So prolific is the yield that he finds it necessary to thin the fruit. He states that he has some four-year old seedling peach trees that are now bearing their third crop and that he has found it necessary to thin them the second time this season.

25 Cents Is The Price of Peace
The terrible itching and smarting incident to certain skin diseases is almost instantly allayed by applying Chamberlains Salve. Price 25 cents. For sale by Mary A. Mee.

Wanted—A Fire Chief.

This is the peculiar predicament that Mayor Leever finds himself in. With the passage of the new fire ordinance last Friday night the office of fire chief was created and now the perplexing question is confronting Mayor Leever of whom to vest with the powers of this office. The newly created office carries with it a number of burdens that will require a man with no little ability to fill to the satisfaction of all, as the enforcement of the many provisions of the fire ordinance is left almost solely in his hands. And later on when the city water works is completed and a fire company organized the duties will multiply as he will have the cares and burdens of that organization thrust upon his shoulders. So if any one you know of is looking for such a position kindly send his name to the mayor and earn that gentleman's eternal gratitude.

Bowel Complaint in Children

When six months old the little daughter of E. N. Dewey, a well known merchant of Agnewville, Va., had an attack of cholera infantum. Chamberlain's Colic, Cholera and Diarrhoea Remedy was given and effected a complete cure. This remedy has proven very successful in cases of bowel complaint in children and when given accordingly to the plain printed directions can be relied upon with perfect confidence. When reduced with water and sweetened it is pleasant to take, which is of great importance when a medicine must be given to young children.

Deer Season Open August 1.

Down from the walls many a rifle with its coating of some nine months dust is being taken and undergoing its annual cleaning, oiling and general overhauling, preparatory to the opening of the deer season, which will arrive on August 1, promptly on time. And in the kitchens and back yards great preparations are going on for the annual camping trip. Tents are being overhauled and repaired, tramping boots are being dragged from their hiding places in dark corners and sent to be half-soiled; mother is worrying about a list of camp necessities, while father is whetting his hunting knife. The great exodus of the year to the woods has begun and youthful Willie can hardly contain himself.

The deer season will open August 1 and closes on November 1. A few salient points of the game code, relative to deer are noted:

Buck deer—Season open from August 1 to November 1. Unlawful to kill more than five in one season. Unlawful to hunt between one hour after sunset and one hour before sun rise. No deer meat whatsoever may be sold.

Female deer—Unlawful to kill at any time.

It is unlawful to use dogs or to watch stands or trails.
No young deer or spotted fawn may be killed.

MERRY CROWDS VISIT ROGUE RIVER SUNDAY

Many persons from Central Point thronged the banks of Rogue River last Saturday night and Sunday—getting away from the heat of town and enjoying the simple life in all its phases. At the "big rock" above Bybee bridge were half a hundred people, and from the long line of wagons, buggies and automobiles that wound their way around the rocky road from the bridge one would have gained the impression that a German picnic was in session.

The first consignment of campers to leave town was the Ross-Grieve party, consisting of about 30 young people, who were most excellently chaperoned by Mesdames Tom Ross, Jim Grieve and Dewey Pankey. The party left town Saturday evening about 5:30 and drove to the river where camp was made and an evening of solid fun and amusement commenced—and during the night that followed there was not a dull moment for any one. Music, dancing and games were the order of the evening and the spirit of fun was kept alive until daybreak when, exhausted by their exertions the younger people laid down to rest, while the older ones went fishing.

By eight o'clock Sunday morning other crowds began to arrive, until by noon the number of pleasure seekers was augmented to over fifty. At noon a sumptuous dinner, with trout and salmon in every style, was discussed. After dinner the crowd had the pleasure of listening to a very able discourse upon the subject of "Woman Suffrage" by Bert Randall. Mr. Randall proved himself a good entertainer and held his audience in rapt attention. He was ably assisted by J. E. Grieve, who spoke for a few moments upon the question of "Temperance." Comment on Mr. Grieve's speech is unnecessary. The remainder of the afternoon was spent in various ways—some went fishing—some boating—while others lined the bank of the river to watch Ward Hopkins and Aaron Clark do their high diving stunt. In this it was a case of "Hoppy did," but "Monk didn't" as Hoppy made the thrilling leap from the top of the rock into the cold waters of the Rogue below, while Monk sought a place of less altitude from which to

Bank Declares Dividends.

One of the best indications of the financial condition of any community is condition of its banks. If they are prosperous then it is safe to say that the community in general is prosperous, while on the other hand, if the banking institutions are struggling along making only a half-hearted effort at existing, the business and financial condition of the community is reflected through it.

The splendid showing that the Central Point State Bank has made under the present management not only reflects credit upon those connected with the bank but with the community as well. At a recent meeting of the stock holders a dividend upon the stock was declared—the amount of which was not made public, but it is understood that it was a good one. A law in Oregon provides that 10 per cent of the undivided profits must be set aside for a reserve before a dividend can be declared but in this case 30 per cent of the undivided profits were first set aside. Such conditions reflect credit on all.

Help For Those Who Have Stomach Trouble

After doctoring for about 12 years for a bad stomach trouble and spending nearly \$500 for medicine and doctors fees I purchased my wife one box of Chamberlains Stomach and Liver Tablets which did her so much good that she continued to use them and they have done her more good than all the medicine I bought before—Samuel Boyed, Folsom, Iowa. Samples free.

make his jump.

After 4 o'clock the various parties began leaving for town and by 5:30 the camp ground, that for the past twenty four hours had been the scene of so much fun and frolic, was completely deserted, and save for the incessant washing of the waves against the shore, quietness reigned supreme. It was over and the merry crowd returned from whence they came, happy and contented—and well covered with dirt.
