Recent frosty mornings were something of an innovation for this season in the Rogue River valley, 28 degrees above zero being unusual for November. Visitors from the east, however, can hardly believe that such weather is not in the regular order.

M. J. Womack and associates are getting work under way on the mining property recently bonded by them on the mountain west of town. They are getting some splendid prospects, which may indicate that they have struck the mother lode which has fed the old Willow Springs p'acers which proved so rich to the early gold seekers.

Walter Painter returned from Bellingham, Washington, Friday, where he has been employed in a shingle mill for some time. Mr. Painter's friends were surprised to see him on the street with two good feet under him, as a report reached here and was published a short time ago to the effect that he had lost a foot in an accident in the mill. As a matter of fact, he met with the accident all right and the foot was all but severed, the wound being so serious that at first the surgeons intended to amputate, but later they undertook to save the member and succeeded. Mr. Painter was in the hospital but 14 days, and within six weeks he is walking around without a cane.
