

"Moo-Moo!"

If the placid looking cows which one sees in the fields, could ever be astonished and give vent to a mild, "moo-moo," they certainly would do so at the thought of the revolution they have caused in the matter of milk in the country.

Time was when it was a sign of shiftlessness for a farmer not to have enough cows on the farm to supply the family with milk. Today, many farmers keep only one cow and some keep none. They have found the value of canned milk—milk which is evaporated or condensed with sugar or dried. A case of this milk is insurance against ever being without that staple of the diet, and big distributors report that more and more canned milk of every kind is being sold in rural districts.

Canned Milk Uniform

While evaporated milk retains the good qualities of fresh milk, it adds some of its own. All that is done to make evaporated milk is to re-

move a large percentage of its water. Consequently, evaporated milk is concentrated. It is also uniform; the first can is exactly like the last one. Because the evaporation breaks up the fat globules into tinier ones, the milk will never separate; yet the milk can be whipped. Because evaporated milk is whole milk it is especially rich in flavor and makes the most delicious gravies and sauces imaginable as well as lending special richness to all dishes in which milk is used.

Condensed milk has been evaporated and has had sugar added in the manufacturing process. Accordingly, it saves in the addition of sugar and also saves time in the preparation of dishes which contain milk and sugar.

Dried milk is known the world around; for this powdery product is simply the solids of milk, from which all the water has been removed. To use dried milk, water must be added, but the amount of water can be varied just as in the other forms of canned milk.

Mann. She is going to Los Angeles for a visit and later in the summer will return to Ashland where she has accepted a position at the Ashland normal.

The Christian church Sunday school held a picnic up on Butte creek last Saturday. About 50 people were there and all had a good time altho the day was cold and stormy. Some enjoyed swimming in the river and everyone had plenty to eat.

The Missionary Society of the Federated church met at the home of the Carlton sisters, Thursday afternoon. Mrs. J. M. Johnson gave a very interesting talk on China and Miss Carlton led the devotionals. Delicious refreshments were served at the close of the meeting.

Stage Cough

One of the highest compliments paid Edwin Booth was accorded him by an old negro servant who went to see him in "RicheMeu" during Booth's visit to Savannah. The next day she expressed to her mistress great concern for the health of the actor. "Poor old man," she said, "he can't last long. Dat cough will carry him to his grave sure."

Gulf Tides Far-Reaching

Tides from the Gulf of Mexico affect the waters of the Bayou Mezipique, in Louisiana, more than 150 miles upstream, says the Dearborn Independent. The bayou is 90 feet deep at a point 70 miles from its mouth, while the elevation of its banks at that point is only 19 feet.

Curious Book

There is a book belonging to the family of prince de Ligne of France that is neither written nor printed. The letters of the text are cut out of each folio upon the finest vellum, and, being interleaved with blue paper, it is as easy to read as print.

Uncle Eben

"De trouble you makes for somebody else," said Uncle Eben, "is allus liable to turn up in yuh own affairs an' make you wish yuh hadn't made so good a job of it."—Washington Star.

Soothing Baby Elephants

A French explorer, back from the heart of Africa, says that the baby elephants captured on elephant farms are frantic when first separated from their mothers, but that the natives gradually quiet their nerves by slinging them to sleep with cradle melodies.

Tom-Tom from Tub

An Indian from Oklahoma recently bought what was thought to be the only remaining wooden bath tub in Kansas. He made it into a huge tom tom, says the Dearborn Independent.

"How Do They Do It?"

Washington (D. C.) News (from the story, "Her Quest for Love")—She held one of his hands in both hers. With the other hand she stroked his rough cheek.

Carried Ice to India

From 1830 until after the Civil war Yankee clippers carried ice from Boston to India. With the advent of artificial refrigeration the trade died out, says the Dearborn Independent.

Simply Too Noisy

Betty Marie has a new baby brother. Saturday night Baby Dick was rather fretful, having cried for some time. Finally Betty turned to her grandmother and said: "Grandma, I simply cannot stand that noise."

Life of Moose and Deer

Moose and deer live to be about eighteen and twenty years of age. Moose reach their full growth in about seven years.

Metals Long Used

Gold probably was the first metal used by man, and the arbitrary value assigned to it for its supposed magical qualities initiated a world-wide search for it and made it a potent factor in shaping the history of civilization. Copper and tin, also found in their relative state, may have been used by prehistoric men.

Ill Health Defined

The long bad time for which you traded a short good time.—Los Angeles Times.

CHRISTIAN CHURCH
