

Gold Hill Notes

by Mildred Tilley
853-1902

The County road grader has been busy on Galls Creek Road---snow and rain had done some damage to the road, but thanks to the County the road is in good shape again.

Mr. and Mrs. Leslie Vaterlas, who live on the Old Stage Road near Gold Hill, enjoyed a visit in Ashland at the home of Mr. and Mrs. John Skibby.

Mrs. Vaterlaus and Mrs. Skibby are sisters.

Mr. and Mrs. Vaterlaus also visited their son, Gordon Vaterlaus, while in Ashland.

Mrs. Mary Robinson of Foothills Creek and Mr. and Mrs. Malcolm Caldwell of Dardanelle Trail Court visited Mrs. Lola Guy.

Mr. and Mrs. Raymond Dusenberry and little son, Lane, of Eugene spent a short time on business and visiting friends and relatives in the valley.

They also visited the home of Mr. Dusenberry's sisters, Mrs. George Tilley of Galls Creek Road, Gold Hill, and Mrs. Raymond Biles on River Banks Road in Grants Pass before returning to Eugene.

Spending the evening at the home of Mr. and Mrs. Don Aarseth and children were Mr. and Mrs. Swede Hendrickson and children.

Bob Unger of Medford, Mr. and Mrs. Earl Accorne of Central Point and Mrs. Leroy Sutton and son, Bobby, and daughter, Shirley, of Old Stage Road visited at the home of Mr. and Mrs. Jack Hendrickson and children, Cheryl, Steven and Michael.

A meeting for all Gold Hill Volunteer firemen will be held at seven o'clock in the evening on January 24 at the Gold Hill City Hall.

Guest speaker at the Gold Hill Parent Teacher Association meeting held January 10 was Miss Hortense Zepeda, a stu-

dent at Crater High School. Miss Zepeda is an exchange student of the American Field Service and is from Costa Rica. Founder's Day was observed.

Recently a student panel from Crater High School visited the Hanby Elementary school to discuss problems that will face the eighth grade students when they enter Crater High School.

The panel of students consisted of all Gold Hill students who are at Crater High School, with the exception of Sandra Ganong, who is a former resident of Gold Hill, but now a resident of Central Point.

The discussion consisted of Mike Turner, a senior, who discussed good working habits and what you can do to make studying easier; Darrell Kiger, a senior, discussed sports; Suzanne Kinney, a senior, discussed the honor club; Judy Corona, a freshman, discussed the freshman girls physical education; Eileen Kell, a junior, discussed art; Sandra Ganong, a junior, discussed music.

Members of the student body council at the Hanby Elementary school are Kelly Talbot, Cindy Kellogg, Renee Holderness and Janice Cznowski, who are the officers. Student representatives are Randy Little and Mike Henderson from the eighth grade; Steve Hall and Susan Martini from the seventh grade; Bill Kalista and Bill Weis from the sixth grade; Janice Zimmer and Kimbra Straus from the fifth grade.

A new student this year at Hanby Elementary school is Helen Hunter. The family lived at Las Vegas, Nevada, where she attended the Jim Bridger school. The family moved from Nevada to Grants Pass, and now make their home in Gold Hill.

Girls in Mrs. Linne's class of Home Economics have been discussing material, color and fashion. Each of the thirty-seven girls in the class have a project and a notebook to hand in at the end of each nine week period.

Boys in the eighth grade class recently spent six weeks in mechanical drawing and three weeks in shop. They made models of joints; also bookends.

The new school in the Sams Valley area are scheduled to be opened soon has been under discussion on the name for it. Members of the P. T. A. suggest that it be called the Sams Valley Elementary school as it will house the fourth through eighth grades. The old school could then be called the Valley Primary school as it will house the first through third grades.

Linda Stokes is a new student this year. She attended the Sierra Junior High school in Fresno, California.

Practice is underway for the Sams Valley Basketball team for seventh and eighth grade students of the Sams Valley area.

Students will participate in the present Sams Valley school gymnasium until the new gymnasium is completed at the new Sams Valley school.

Varsity members will consist of students who are able and to meet certain scholastic and behavioural qualifications. Any student who does not keep themselves eligible scholastically and misbehaves in school, during practice and in general should not expect to be on the team.

The team will compete against Hanby, Shady Cove, Elk, Trail, Evans Valley, Prospect and Eagle Point.

Make-up system has been a part of the Hanby Elementary school system for the past two years.

The frequency of violations

will affect the amount of time given. The minimum make-up time for violations are as follows:

1. Disrespect for authority--- 2 1/2 - 5 hours to suspension.
2. Fighting (circumstances determine)---1/2 - 5 hours to suspension.
3. Destruction of school property---2 1/2 - 5 hours (financial responsibility).
4. Chronic use of vulgarity--- 2 1/2 - 5 hours to suspension.
5. Continued violations---5 hours suspension.
6. School rules, scuffling, tardiness, note passing, designated play areas, undesirable language or actions, disrupting games of others... 1/2-5 hours.

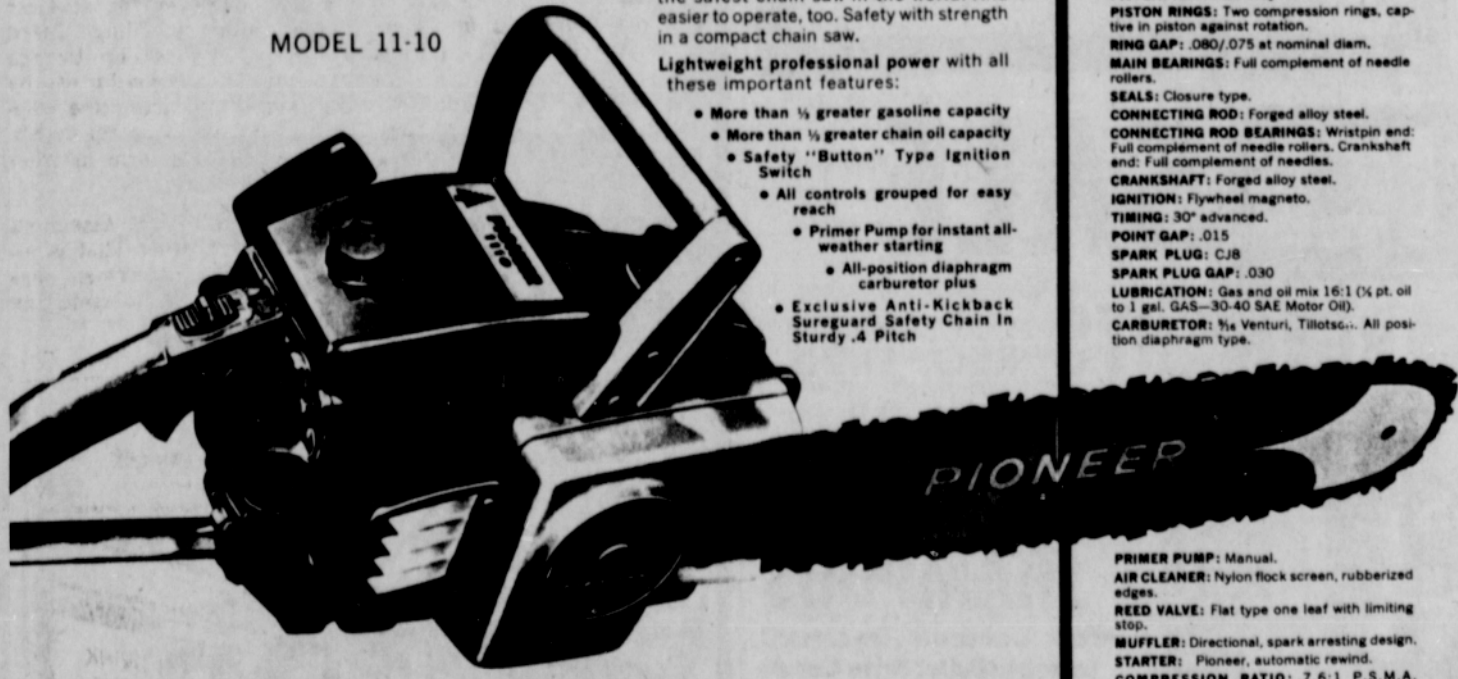

Several teachers were asking their opinions on the matter of make-up. Various answers were: feel it is better than a lot of other punishments and feels it serves its purpose; thinks it is a lot better than making the students stay in, as the then the teacher is also punished by having to stay with the students; you cannot have rules without punishments because some people would not follow rules. This way only the person who violates a rule is punished and not the rest of the student body; one instructor has his unruly students stay in during their recess period, but feels for some students staying after school would be more effective; feels that some students won't work unless pressure is put on them and make-up serves this purpose; feels there should be no need for make-up system, but some students need to put extra time on their work.

The Margaret E. Patrick school library now has 2,150 books.

PIONEER WILDCAT-I

MODEL 11-10

Put a Wildcat to work...

on your farm, your estate, around your cabin or campsite... wherever you need a lightweight chain saw with power to do any cutting job.

Lean, tank, and 12-pounds-light. Yet the Wildcat has the guts and go of professional models! New Sureguard Chain makes it the safest chain saw in the world. And easier to operate, too. Safety with strength in a compact chain saw.

Lightweight professional power with all these important features:

- More than 1/2 greater gasoline capacity
- More than 1/2 greater chain oil capacity
- Safety "Button" Type Ignition Switch
- Primer Pump for instant all-weather starting
- All-position diaphragm carburetor plus
- Exclusive Anti-Kickback Sureguard Safety Chain in Sturdy 4 Pitch

Here's how Sureguard works

The new movable guide links, or articulated safety tangs, are the secret. As the chain moves along the bar the center link tail lies flat, (1) filling the gap between cutters. Then, as the chain goes around the nose of the cutter bar the center link tails automatically rise, (2) to keep the cutters from digging in too deep. This prevents one of the major causes of kickback.

See back page for chain specifications.

SPECIFICATIONS

ENGINE TYPE: Single cylinder-two cycle-overhead-valve
BORE: 1.75
STROKE: 1.38
DISPLACEMENT: 3.3 cubic inches
ROTATION: Clockwise facing P.T.O. end.
CYLINDER: Ductile aluminum block with integral head, bore chrome-plated and honed.
CRANKCASE: One piece magnesium die-casting with separate bearing carrier at P.T.O. end.
PISTON: Aluminum alloy.
PISTON RINGS: Two compression rings, captive in piston against rotation.
RING GAP: .080/.075 at nominal diam.
MAIN BEARINGS: Full complement of needle rollers.
SEALS: Closure type.
CONNECTING ROD: Forged alloy steel.
CONNECTING ROD BEARINGS: Wristpin end: Full complement of needle rollers. Crankshaft end: Full complement of needles.
CRANKSHAFT: Forged alloy steel.
IGNITION: Flywheel magnet.
TIMING: 30° advanced.
POINT GAP: .015
SPARK PLUG: C-8
SPARK PLUG GAP: .030
LUBRICATION: Gas and oil mix 16:1 (1/4 pt. oil to 1 gal. GAS-30-40 SAE Motor Oil).
CARBURETOR: 1/2 Venturi, Tiltloc. All position diaphragm type.
PRIMER PUMP: Manual.
AIR CLEANER: Nylon flock screen, rubberized edges.
REED VALVE: Flat type one leaf with limiting stop.
MUFFLER: Directional, spark arresting design.
STARTER: Pioneer, automatic rewind.
COMPRESSION RATIO: 7.6:1 P.S.M.A. Effective.
FUEL CAPACITY: 8 Quart.
CHAIN OIL PUMP: Manual Type.
CHAIN OIL CAPACITY: 2 Quart.
TYPE OF DRIVE: Direct Drive.
CLUTCH: Centrifugal action, dry lining.
SPROCKET: 4 Pitch, 7 tooth, star type sprocket.
GUIDE BAR: Pioneer Durarail® stellite tipped, induction hardened rails, copper fused, lightweight bar.
CHAIN: Pioneer, 4 Pitch SUREGUARD.
CHAIN SPEED: At 7500 rpm=3500 feet per minute.
OPERATING RANGE: Up to 8500 rpm.
