

DILLON FALLS IN THE DESCHUTES RIVER is one of three waterfalls in the Lava Butte area. These were formed when the Deschutes cut a new channel through the lava flow and are one of the attractions drawing increasing number of visitors. Last year nearly 10,000 persons visited the public observation site on top of the volcanic cone.

CENTRAL OREGON'S lava county derives its name from Lava Butte, shown above. The area has been given special classification in recognition of its geological and recreational qualities. The 5,016-foot butte was formed by eruption in a fissure. Most recent eruption is believed to have been 1,500 to 2,000 years ago.

**GEOLOGICAL
ATTRACTION**

An 8,983 - acre area in Central Oregon's lava country has been given special classification under Department of Agriculture regulations in recognition of its geological and recreational qualities according to J. Herbert Stone, Regional Forester, U.S. Forest Service.

This area, is in the Deschutes National Forest is now designated the Lava Butte is seven miles south of Bend. The geological area, containing a variety of volcanic formations, extends west from U. S. Highway 97 to include about seven miles of the Deschutes River.

The area's name derives from Lava Butte, 5,016 feet high, formed by an eruption in a fissure extending from Newberry volcano. It is believed the most recent eruption was 1,500 to 2,000 years ago.

The Forest Service maintains a fire lookout and visitor observation building on the butte. In addition to the observation site there are four campgrounds in the area and two trails for visitors - the Phil Brogan Trail and Crater Rim Nature Trail. There are three waterfalls, formed when the Deschutes River cut a new channel through a lava flow.

The area is one of increasingly heavy recreation use. Last year nearly 100,000 persons visited the public observation site on top of the volcanic cone.

Forest Service long-range plans call for further recreational developments including a visitor center near the base of Lava Butte, and interpretive services.

Another geological attraction of the volcanic region is the Lava Cast Forest Geological Area about 15 miles to the southeast. Within short driving distance are winter sports sites wilderness area, and numerous Cascade lakes.

First known white men to visit the Lava Butte area were Nathaniel J. Wyeth and party in 1834. The Forest Service acquired the lands in the early 1930's at which time a fire lookout was built on Lava Butte.

DREAMS

"Behind every advance of the human race is a germ of creation growing in the mind of some lone individual, an individual whose dreams waken him in the night while others lie contentedly asleep. We need those dreams, for today's dreams represent tomorrow's realities." -- Crawford H. Greenwalt.

Bumpers of Rubber

Rubber front bumpers will be standard equipment on the Tempest GTO models for 1968, the General Motors Corporation announced in Detroit. The surface of the bumper is smooth and almost as hard as

VOTING MACHINES FOR OREGON

SALEM-Secretary of State Clay Myers has certified a new voting machine for use in Oregon elections.

Myers issued a Certificate of Approval for the "Vote-A-Corder," which is manufactured by the Datamedia Corporation of Binghamton, N. Y.

The punch card voting device may now be legally sold or leased in Oregon.

Myers made a detailed examination of the machine on July 12. He was assisted by George W. Gleeson, Dean of the School of Engineering at Oregon State University; Clackamas County Clerk, Robert Schumacher; Jack F. Thompson, Oregon director of elections; and Larry B. Bevens, Oregon elections coordinator.

The "Vote-A-Corder" system uses punch cards to record an elector's vote. The cards are taken to counting centers after the polls are closed, where they are tabulated by computers.

Myers said that his office has now certified nine voting machines or systems for use in Oregon elections.

Language of Labor

A new edition of the "Dictionary of Slang and Unconventional English" had some interesting disclosures on the origins of words now common in American industry.

The earliest use of the word "boss" was around 1575 when it meant "a fat woman." Later it came to mean "the leader of a corrupt following; a short-sighted person." "To boss" meant "to bungle."

The word "scab" was first noted in England in 1590 when it meant a "scurvy fellow, a rascal, a scoundrel." For a while it also meant a constable or sheriff's officer. It came to its present meaning in the U.S. in 1811: "A workman refusing to strike, especially one working while his companions are on strike."

In 1786 the word "strike" meant "a measure of eels." In 1622 "foreman" meant "a goose."

**TOWER FOR FAIR
RISES IN TEXAS**

Rising on a tract of land in San Antonio, Tex., is this Tower of the Americas, being built as the centerpiece for a hemisphere fair to be staged in 1968 in the Texas city. When it is completed, the tower will be 622 feet high and will feature a revolving restaurant, two observation levels, and a private club. This picture was taken when the tower had been built to the 311-foot level.

PUSH ORE. 4- H

CORVALLIS - Oregon's 4-H club membership increased by 2,150 boys and girls this year as enthusiastic youngsters continued to enroll in new and existing 4-H programs.

Cal Monroe, state 4-H extension agent at the Oregon State University, said major gains were in the horse projects, the new 4-H Outdoor-sman project, junior leadership and health.

"Other projects showing appreciable gains," said Monroe, "were dog, rabbit, flower growing, vegetable gardening archery, gun safety, electricity, woodworking, empire builders, food preparation and home improvement."

According to Monroe, 36,548 boys and girls are now enrolled in Oregon 4-H activities, a record total. Boys' enrollment increased 1,150 or 11 per cent. Girls' enrollment also jumped by 1,000 but because of the larger number of girls in the 4 H program, the increase was 4.2 per cent.

Monroe said a new TV action program added 1,115 projects in six eastern Oregon counties alone.

"A total of 593 boys and girls were not previously enrolled in other 4-H projects," he added "This information," concluded Monroe, is based on year membership report.

**CARPENTER QUILTS
SPACE PROGRAM**

One of the nation's pioneer astronauts, Cmdr. M. Scott Carpenter, has resigned from the space program and will return to duty in the navy, specializing in underwater exploration. Carpenter made a flight in the one-man Mercury program but three years ago was barred from further flights because of injuries he suffered in a motorcycle accident. He is 42 and a native of Boulder, Colo.

**CHALLENGE AND
COMPETITION**

The governmental system of the United States was originally dedicated to the proposition that the freedom of the individual was of paramount importance and that with due regard for the rights of others, he should be left free to manage his own affairs and profit from his abilities.

All we have to do is look around us to realize that this way of doing things has been an unparalleled success. Our whole system depends on maintaining opportunity for the individual, and it depends on individuals who wish to pursue that opportunity - to compete, to work, to build and to create the things that add up to the material wealth of our nation today. Many people are concerned that our affluent society is not producing enough of the kind of individuals among our young people who will carry on in the challenging competitive atmosphere so essential to the production accomplishment of our economic system.

A Harvard Business School survey has indicated that only 12 per cent of today's college students plan to go into business as a career - 88 per cent were disinterested. Many of them seem to feel that business does not offer a challenge, that it is boring. One typical view being, "Business isn't where the action is." Commenting on this, a well-known industrialist, F. Rockwell, Jr., observes: "Youth says that it wants more than business can offer. It wants a challenge. At the same time youth says that it doesn't like the competitive nature of business life. Somebody needs to tell these young people that 'challenge' and 'competition' go together by definition of the words themselves. And perhaps we all need to do a better job of telling youth about the tremendous contributions to a healthy and dynamic society made by business every day of our lives." In conclusion, he expresses the opinion that a more determined effort should be made "to show the adults of tomorrow that business has much to offer to those who have something to give."

The future belongs to the young people of today. Nothing could be more vital than that they understand, support and work to preserve the private property free enterprise, economic system on which their well-being and political liberty depend.

**CLEAN AND
BEAUTIFUL**

More than a quarter of a million new flowers may be blooming in Washington and Oregon communities this summer thanks to the Chas. H. Lilly Co. and local beautification leaders.

Distribution of thousands of packets of flower seeds donated by the Portland-based firm is being carried out by CLEAN and Beautiful, Inc., the business and industry-sponsored litter-prevention and beautification organization serving the two states.

Clean's Executive Director, Eugene B. Kasper, said Pacific Northwest mayors are being encouraged to pass the seeds along to local beautification chairmen to aid in their community efforts.

Kasper praised the Lilly company, initiative, citing also a 1966 public service project by the company which involved the donation of tens of thousands of flower seeds to the Washington and Oregon highway departments. The seeds were used in experimental roadside beautification projects and were sprayed on high slopes, banks, and suitable areas on rocky cliffs. CLEAN presented its Award of Merit to the seed firm for that effort.

**WOMEN PAST 21
WITH BLADDER IRRITATION
Suffer Many Troubles**

After 21, common Kidney or Bladder Irritations affect twice as many women as men and may make you tense and nervous from too frequent, burning or itching urination both day and night. Secondly, you may lose sleep and suffer from Headaches, Backache and feel old, tired, depressed. In such irritation, CYSTEX usually brings fast, relaxing comfort by curbing irritating germs in strong, acid urine and by analgesic pain relief. Get CYSTEX at drug-gists. See how fast it can help you.
