ORDER OF THE "C"

Hamilton Pickett Benson Beall Shores Faber Hover

Everett Faber Paper Manager

CENTRAL POINT STUDENT ON TRIBUNE STAFF

Dorris Hubbard Announces Her Engagement

Class of '24

Everett Faber, attending Willamette University where he is studying law. He has recently been elected manager of the "Collegian," W. U. daily paper. Next fall he is to be given a trip to Salt Lake City to attend the convention of editors and managers of college publications.

Elva Adams, living with her parents in Central Point.

Clara Anderson, studying to be a trained nurse at the Good Samaritan hospital of Portland.

Truman Brenner, working at the Salade orchard, living at home.

Coy Brown, studying mechanical engineering at O. A. C. and is a pledge of Beta Kappa, national men's social fraternity.

Dwight Brown, working in California.

Marie, Wright Collins, married in May, 1923, to Joseph Collins of Central Point, now living at Tolo.

Clifford Boswell, studying forestry at O. A. C.

Kathleen Piele, married, living in Hill, California.

Stirling Richmond, married January 13, 1926, to Esther Musty, '26. He is employed by the California Oregon Power company and living in Central Point.

Donald Ross, married Letha Casebeer, '25, December 22, 1925. Don is employed by the Owen Oregon Lumber company at Butte Falls.

Ernest Rostel, living in Central Point. Ernest is on the reporting staff of the Medford Mail Tribune.

Violet Scott, living at Central Point. Violet has been teaching in the Long Mountain school for two years.

Doil Freely, teaching school in Ekalaka, Montana.

Caroline Heckman Weaver, married Carl Weaver, '23, living in Medford.

Doris Hubbard, living at home. Doris has recently announced her engagement to Richard Copinger of this city.

CLASS OF '21

Verla Walker, is deputy county treasurer of Jackson county, living in Medford. He married Delia Steiner of Medford.

Arlene Hay, has been attend U. of O., and plans to go to San Jose Normal this summer. She will teach in Central Point next year.

Erma Hamrick will be graduated next year from the Good Samaritan hospital in Portland.

Gertrude Wiley is instructing in the San Jose Normal, San Jose, Calif.

Gertrude Mee, living at Applegate, Oregon.

Ruby Timmons, has an interest in the Root Music Studio, Medford.

Edith Ross Deuel, teaching the primary grades at Tolo. She married Luther Deuel of Medford in May, 1923.

CLASS OF '23

Clifford Boswell, studying forestry at O. A. C.

Benton Boyce is farming near Tolo, Oregon.

Charles Cunningham, studying electrical engineering at O. A. C.

Elizabeth Duncan, attending the Los Angeles Bible Institute.

Leola Hesselgrave, will soon finish her studies at San Jose Normal.

Earl Leever, associated with his father, W. C. Leever, in the hardware business in Central Point. Earl married Ruby Porter June 1, 1925.

Lester Mann, it is reported that Lester is driving a truck in Hollywood, California.

Gladys Miller, studying to be a nurse in the Good Samaritan hospital in Portland.

Kathleen Seiler, living in Medford.

Marguerite Simpson, employed as a stenographer in Long View, Wash.

Carl Weaver, working for the Standard Oil company at Medford. Carl married Caroline Heckman, '24.

CLASS OF '25

Lloyd Anderson, spent one term at U. of O. Now employed at Butte Falls by the Oregon Owen Lumber company.

Mabel Armstrong Quackenbush, married Von Quackenbush at Table Rock.

Carl Boswell, spent one term at O. A. C. studying industrial arts. Carl is a pledge of Beta Kappa, national men's social fraternity, and intends to return to school next fall.

Myrna Bush, living in Medford, doing stenographic work.

Mildred Burger living in Central Point, employed in the office of the Jackson county fair association.

Grazia Brenner, married in September, 1925, to Clifford Webber of Central Point. Now living in Klamath Falls.

Buster Brown, working at the McCaskey orchard living in Central Point. Buster plans to attend O. A. C. next fall.

Berniece Burger, employed by the Medford corps of the Salvation army.

Letha Casebeer Ross, married December 22, 1925, to Donald Ross of this city; now living at Butte Falls, Oregon.

Lola Davis, employed in the Walden store, Medford.

Francis Dunlap, studying teaching at the University of Washington.

James Harris, bell boy at Hotel Medford. James intends to enter O. A. C. next fall.

Florence Hamrick, employed by the Paxson Drug company of this city.

Olva Hesselgrave, living at home.

Beulah Hood, taught school last year in the Agate school.

Thelma Pankey, employed in Medford by the Owen Oregon lumber company living in Central Point.

Christina Richardson, studying to be a trained nurse at the Good Samaritan hospital, Portland.

Beatrice Seabrooke employed in Medford, Oregon.

Alice Seabrooke, living on the Seabrooke ranch at Table Rock, studying music.

Roy Weaver, studying law at U. of O. At present he is assisting in the Weaver store during his father's illness.

FARM POINTERS

Chicks need plenty of clean fresh water even when they have plenty of skim milk. The skim milk is sufficient as a drink for the chicks for the first few days, but after they get older they need the water too.

Incubators are frequently infested with mites when the eggs are transferred into them. If the mites are present in numbers on the premises they get into the incubators and brooders in storage. These pests live for sometimes without food and multiply rapidly when they have access to the chicks.

The common black leaf spot of alfalfa in Oregon which speckles the foliage of the plant in the early spring has been particularly abundant in the Willamette valley plantings this year, says H. P. Bars, plant pathologist of the experiment station. Many growers cut the first crop a little early to save the leaves which otherwise would turn yellow and drop off. Sunshine and dry weather which keep the plants dry ordinarily check the disease. Alfalfa is seldom troubled after the first cutting.

When canning vegetables in the home best results come by cooking them under pressure. Green beans are cooked 40 minutes under 10 pounds pressure, or 240 degrees, for quarts and 35 minutes for pints, at the O. A. C. horticultural products plant. Greens and spinach are cooked 90 minutes at 240 degrees for quarts, young and tender peas being cooked 50 minutes at 240 degrees. If leafy vegetables are packed too tight in the cans they spoil. Over filling of the jars prevents heat from penetrating.

An important consideration for success in farm or backyard poultry raising is soil. A light, sandy soil through which water leaches is best adapted for intensive poultry raising. A light loam that will grow good grass as also well adapted for chickens. A heavy clay loam is objectionable because the land does not drain readily and it is more difficult to keep the fowls healthy.

GRAIN OFTEN VALUABLE WITH COWS ON PASTURE

"Grain is fed to cows grazed on pasture if such cows give as much as twenty pounds of milk a day or more for Guernseys or Jerseys and from twenty-five to thirty pounds for Holsteins or Ayrshires," says I. R. Jones, assistant professor of dairy husbandry at the Oregon Agricultural college. "It is possible that the immediate results of feeding grain to cows may not be startling at first, but it is clearly shown to advantage over an extended period."

or average producing cows, half barley and half oats is a good ration considering the present price of grain, says Professor Jones. Mill run may be substituted for the oats. For cows producing more than aver-

age amount of milk the addition of some protein food to this ration is recommended by the college. Linseed meal is a high protein containing feed but is not so good as cottonseed or coconut meal when cows are on pasture, as it acts as a laxative. One pound of this mixture is fed for every four pounds of milk the cows produce.

Cows on pasture frequently yield milk which is off flavor, largely due to wild onions, weeds, wild carrots and such in the pasture. These flavors are disagreeable in butter and are removed by aerating the cream. Off flavored milk may be prevented by taking the cows off pasture a few hours before milking.

The college is collecting data upon pastures through out the state and is cooperating with farmers to get the cost of producing milk. On these farms are grown different pasture crops such as medina clover, oats, wheat, reed canary grass, white clover and rye grass. Such investigations are believed to give information on the carrying capacity and comparative cost of production on pastures and dry feed. Studies of the possibility of economically irrigating pastures are also being made. Next year further pasture studies will be made at the college.

OREGON WEEKLY INDUSTRIAL REVIEW

Department of Commerce figures show that in 1924, Oregon's revenues for state purposes were \$24.30 per capita. Washington had \$22.22, California \$17.36, Wyoming \$32.86 and Nevada \$65.58. The state owed \$66,281,042 gross and \$41,552,377 net at the close of 1924. Roads cost \$6,935,464; only two Western states, California and Washington, spent more.

Portland is estimated to have 347,781 population, one of the 12 fastest-growing American cities.

Portland - Oregon - Washington Sugar company plans \$1,250,000 sugar refinery here.

Salem—Plans completed, for \$450,000 10-story First National Bank building.

Portland has shipped 50,282 cases canned fruit to the United Kingdom, since January 1.

Burns—More than 100 new homes have been built here, in 18 months.

Deschutes county votes \$185,000 road bond issue.

FACULTY—1926

Mr. H. P. Jewett, Mrs. Zoe R. Hubbs, Miss Marie Kittredge, Miss Eleanor Saubert, Mr. H. C. Terrell.

Portland and Multnomah county vote for \$4,500,000 road and street projects.

Redmond—Central Oregon Poultry Cooperation association formed, to boost poultry business.

Myrtle Point—City will grade and gravel two miles of streets this year.
