TOLO ITEMS

The Kirkland Farm entries of Milking Shorthorns was one of the most complete exhibits by a single concern with 13 head of cattle. This herd is headed by the senior bull Count Matchless out of Clementine IV by Count Tickford, an international grand champion of 1922; the junior herd sire Columbus, is a son of Oleta by Peerless Knight. The dam is a grand champion milking Shorthorn of California State Fair in 1923 and has also taken grand championship here twice. Oleta, Betty Clay and Jewel in this herd are in milk, the balance of the exhibit being young stock. Mr. Alex Sparrow, manager of the farm, was looking after the stock. They also had a fine exhibit of horses.

Newell Whetstone, wife and little daughter, returned a few days ago from Oklahoma where they had been visiting with relatives, and was glad to get back to Oregon again, as while they were there they had a few electric storms that did not look good to anyone from Oregon.

Mrs. Alex Sparrow returned last Thursday from a week's stay at Rose, California, which place she had taken Miss Frances to attend school.

The school closed last Friday to give the children an opportunity to visit the Jackson county fair.

Quite a number from this locality attended the Jackson County Fair held at Medford last week. Most all thought the display of fruit the finest they had ever seen.

The Ladies' Club will meet Thursday afternoon at the club house, the first meeting to be held since June. We hope to see a large attendance.

STOP AT TRACKS! HANFORD ORDERS

An ordinance requiring all drivers to bring automobiles to a complete stop before crossing railroad tracks has been passed by the Hanford, California, city council, according to R. J. Clancy, officer in general charge of safety for Southern Pacific company.

"It is the belief," Clancy said, "that requiring the driver to stop will result in looking in both directions and making observations which will safeguard against accident if a train is approaching. It is the further belief that when required to stop drivers will not approach crossings at a speed so high that they cannot stop before running into train, a condition existing in more than one-fifth of all grade crossing accidents.

"In the last eight years ending December 31, 1925, 1,678 automobiles struck trains on the Southern Pacific instead of being struck by trains, and 197 skidded into trains, resulting from approaching track at speed above braking power of their machine."

WOMAN'S RELIEF CORPS SOCIAL
