

WHERE LIVING IS A PLEASURE

JACKSON COUNTY OFFERS BIG SETTLERS INDUCEMENT.

Every Opportunity Here Exists for a Contented Home, With Good Health a Prime Factor.

(Continued from page 1) the climate is a constant source of discomfort. They live where the sun parches them in summer, and where the blasts of winter chill the white marrow of their bones. Month after month they go on accumulating birth days without getting any real pleasure out of it all. Just why they are content to do this is past explanation.

There are laws forbidding nearly everything nowadays, but there is as yet no law that denies us the right to move from a poor climate into a good climate. If the scenery where you live does not make you feel glad you have a pair of eyes, you can go where there are mountains, forests, rivers, canyons and valleys as fine as the Creator ever made.

Jackson county, Oregon, is considered by travelers to possess more natural advantages in the way of climate, scenery, soil and water than any other one spot on the maps of the world. This is a sweeping statement to make, but it is so, and when a thing is true it should be emphasized.

If you are a good carpenter where you now live, you can come to Jackson county, Oregon, and be just as good a carpenter here. If you know how to run a farm, a dairy or a truck garden in your present home, you can also run one here, where all Nature works 24 hours a day to make human beings happy. If you are a good doctor, a good grocer, a good chicken-raiser, a good fruit-grower, a good day laborer or a good anything else, you will find the opportunities in Jackson county just as promising as they are back where you are unhappily located now.

The point is this: Why be content with your present dissatisfaction? Why continue to live where you do not have the many advantages that Jackson county offers? You have just one life to live on earth, and if you don't get out of this life all the joy and happiness that belongs to you, it is your own fault.

Jackson county is largely populated by people who have come here from other states. Most of our people are actively employed in some useful pursuit, but we have among us many retired men who have settled here where they can spend their last days

amid surroundings which will keep them on earth much longer than living where Nature was less kindly in apportioning her favors.

Men of wealth, who want summer lodges and retreats can find beautiful spots in Jackson county for sites to build.

We have many ex-residents of California, who changed to Oregon because Oregon surpasses California in climate, scenery, air, water and all rest and resperate, will find many else. You have heard much about the wonders and opportunities of California, and it surely is a great state, but Jackson county, Oregon, has a more equable climate, more beautiful scenery, better air and water and just as many opportunities.

Our population is made up of the progressive class, being almost wholly native American. It is hospitable kindly and always extending the welcome hand. When new folks come here to settle down, we appreciate their presence, and try to make them feel altogether at home.—From county booklet.

Investments

1. Don't be hurried into any investment.
2. Don't put your money into any enterprise on the recommendation of a stranger. When any proposition is good enough to have your money, it should be well enough known to have the endorsements of men in the community you know.
3. But don't buy just because some rich man has. Perhaps he could afford to take a chance, while you can't. And it's just possible, anyway, that the rumor isn't true.
4. Don't be influenced by abuse. The salesman who relies in talking down the other fellow has little of importance to talk up.
5. Always beware of oil wells, mines and patent rights. Of course, it is true that these things have given millions

to some, but equally true that they have taken some millions.

6. Make it a rule to find out more facts about a proposition than the salesman is able to tell you.
7. When a man is trying to convince you about a certain line, leaves his literature and write down on paper the "other points" which he has stressed in the conversation.
8. Have two or three responsible men for financial advisers, and get their honest opinion on every such proposition.
9. Find out from your banker how much you can borrow on every proposed investment. If he won't lend over 60 per cent against what you plan to put in, it's hardly wise for you to bear 100 per cent of that kind of risk.
