The recent rains have been causing a number of serious accidents, among them being the overturning of a light touring car, owned and driven by A. Barnes of Portland, on the Pacific highway near the gas plant when he applied his brakes suddenly to avoid hitting a car ahead and skidded on the wet pavement into an eight-foot ditch. Mr. Barnes suffered injuries to his shoulders and lacerations on his scalp. He was rushed to the Sacred Heart hospital.

Work will soon start on the erection of a standard guard rail, 700 feet long at the hairpin curve at Lookout point where eight people recently lost their lives in the worst auto accident of southern Oregon.

The guard rail will be securely set a short distance the other side of the concrete arch bridge over the river. A plant is also under consideration for running the highway on a route used by an old road which

would eliminate the curve entirely by going straight through from the bridge.

**BONDS BONDS BONDS**

Voters are urged to read Section 4 of the Housewives' Council Constitutional Amendment authorizing the State of Oregon to go into irrigation schemes and into the business of manufacturing and selling light and power:

**Bonds of the State of Oregon, not to exceed five per centum of the assessed valuation of the state, may be issued and sold from time to time to carry out the purpose of this Article and the full faith and credit of the State of Oregon is hereby pledged for the payment of the principal of said bonds as the same mature, and the interest accruing thereon as the same falls due."**

Every voter should know that the assessed valuation of Oregon is \$1,058,880,736, and that the Housewives' Council "Water and Power" board could issue and sell bonds for \$52,944,000. Your property would be a guarantee for the payment of this huge debt.

Oregon's total bonded debt, including that of all political subdivisions, is now more than \$166,000,000. Its State bonded indebtedness alone per capita, \$47.08, is the highest in the Union.

As fast as this political board might retire bonds, it would have the power to issue more; and as the assessed valuations increased the amount of the bonds could also increase.
