Thirty-eight years ago in a Methodist church were gathered thirty serious-faced gentlemen struggling with difficulties in trying to form a young peoples' organization. It was anything but a "youth movement" since all its founders were elderly men. When young methods and ideas were introduced, then, evolved the Epworth League. It found an open field in the ranks of the young Methodists and only seven months later, charters had been granted 1,480 chapters; in seven years the number of chartered chapters reached 16,302. The Epworth League stands for a big, growing idea. That idea is that youth is not a mere curtain-raiser for the game of adulthood, but is a big game of life on its own accord. All these 38 years of service has set a standard for future activities and next Sunday the local league will observe Anniversary day at their regular Sunday meeting at 6:45. The topic is "Measuring up to Our Past" and special features will be presented. George Mason, who is president will lead the meeting.

DID YOU EVER STOP TO THINK

By Edson R. Waite
Shawnee, Oklahoma

J. S. Parks, President of the Fort Smith (Arkansas) Times-Record Company, Says:
THAT the best story I have read in a long time on the subject of Thinking was the bulletin issued a few years ago by the American Educational association of Philadelphia. As I recall it, it was about as follows:

Jim was a track-walker. He inspected the roadbed. He had to

think about ties, rails, joints, nuts, bolts and frogs. If he did not think about his work something would go wrong. There might be a derailment or a wreck. The road would become inefficient. It would be his fault. The thinking of Jim, the track-walker, was important.

Smith was a switchman. He stood in the tower-house. He had to think about time-tables, schedules, train dispatches, switches and signals. If he did not think about his work something would go wrong. There would be delays or accidents. The railroad would become inefficient. It would be his fault. The thinking of Smith, the switchman, was important.

Williams was the general manager of the railroad. He sat at his desk. He had to think about income, expenses, property, supplies and equipment. If he did not think about those things something would go wrong. It would be his fault. The thinking of Williams, the general manager, therefore, was important.

Brown was president of the railroad. He sat at a desk in a private office. It was also his job to think. He had to think about the policy of the road, operations of its different divisions, the various problems of transportation and things of that sort that came to him. If he did not think about his work something would go wrong. It would be his fault. The thinking of the president, therefore, was very important.

Now if Jim, the track-walker had stopped thinking about his work the thinking of the general manager could not have prevented an accident. If Williams, the general manager, had stopped thinking about his work the thinking of the track-walker could not have provided the payroll. It can easily be seen that everyone's thinking was necessary.

So it is in any business. Each part of an organization depends upon the thinking of all departments. Everybody has to think.

Summarized, it means that the think-tank is as important as the water-tank.
