They went up on horseback and the snow was so hard and packed that they rode right up to the crater. They reported that there are at least fifteen feet of snow yet at the summit.

EGGS GET CLEANING UP DAY

"After much experimenting, electrical engineers finally applied an electrically operated centrifugal compressor which would direct a blast of sand upon a continuous procession of eggs, moving in stately procession on an automatic conveyor. This blast of sand removes all extraneous substances immediately and imparts a fine, even finish to the most untidw' egg."
