"Electricity!"
The Master of Mass Production"

Says Dr. Henry Mace Payne
Consulting Engineer, American Mining Congress

"America's prosperity is the fruit of intelligent power development, with skilled direction and mass production, paying the highest wages in the world, her workmen enjoying a higher standard of living than ever before. Wherever we look about us we find the evidences of the co-partnership between brains and business."

ELECTRIC power may rightfully be regarded as one of the world's basic industries. It is mankind's most tireless and efficient servant.

By means of its magic current, forces are unleashed that free labor from excessive burden; homes are made happier and more comfortable, and the wealth of the nation multiplied many times over.

The wealth is that not taken from others by trade, but new wealth, wrung from the treasure house of science, enhancing individual production capacity forty fold and increasing wages proportionately.

It is obvious, therefore, that the

well-being of everyone depends upon the accessibility and abundance of electric power.

Through the foresight, initiative and commercial daring of the electric power companies of this country, American industry today is supplied with more power than all the rest of the world combined—twenty-four times more power than was available twenty-four years ago—and at a cost less than the pre-war price.

To the degree that the principle of individual initiative, under which these companies have functioned is maintained, will the continued prosperity of the nation as a whole be assured.

GIRL ASKS PEACE

Washington.—An unusual plea for peace was recently received by Secretary Davis from a little motherless girl of Pennsylvania, who lives under the dread that her father and uncle Oliver, with whom she lives will be called to war. The little girl was assured by Secretary Davis that "Uncle Sam" will do all in his power to prevent any more wars.
