## Modern Magic works in the kitchen

AWAY with the arm-tiring work of beating eggs, whipping cream, mashing potatoes! This little electric kitchen mixer does the work at a touch of the finger, tirelessly, to a perfection the human hand cannot possibly achieve.

AND for the morning glass of orange juice, what can take the place of the electric fruit juice extractor? The old-fashioned "squeezer" is out of date—modern household economy demands modern labor saving equipment in the modern kitchen.
