Gov. Meier Raps School Unification

(Continued from page one)

hope to have an enrollment exceeding 600 or 700, with the result that it would be required to operate a plant with 30 large buildings, a central heating plant and a 100-acre campus with overhead that would be prohibitive.

The loss in fraternity houses estimated at \$1,100,000 would be practically complete. University employees now owning homes in Eugene would be compelled to sell in a ruined market and establish new homes in a congested market at Corvallis. Families transferred from Ashland, La Grande and Monmouth would sustain similar losses. Public security values estimated at over \$5,000,000 would be disastrously affected. Housing facilities and additional buildings and equipment on the campus at Corvallis would have to be provided at a cost estimated at \$2,000,000 within the next few years.

Furthermore, it has been the history of consolidated schools that the university functions submerge all other functions. The probable result of the proposed consolidation would be the loss of identity of the Oregon State Agricultural college. I reiterate, therefore, that after a careful study of the matter, I am of the opinion that the proposed measure would not be conducive to savings to the taxpayers, but on the contrary would result in large economic losses, greatly increased taxes and decreased efficiency in the functions of the university, the college and the normal schools.

For Management Merger
In my opinion, both the taxpayers of the state and higher education will be better served by the merger of the management of these higher institutions of learning under a single chancellor, as contemplated by the act creating the state board of higher education.

After all these years of bickering and straggling, we are now on the eve of a consummation of this constructive program. I feel that it is extremely regrettable that a movement should now be launched which will achieve nothing in the way of saving and efficiency in education and which will precipitate the people of this state at this critical period into a feud which will array section against section and class against class for years to come.

Advices have been received by me that the group now espousing the consolidation measure threatens to oppose the meritorious tax program sponsored by the Oregon Taxpayers Equalization and Conservation league and myself unless the president of the league refrains from expressing an opinion against the education merger legislation.

I sincerely regret that any such threats have been made, and I sincerely hope that they will not be carried out. The tax measures were framed and designed for only one purpose, and that is to give genuine tax relief to the owners of farms and small homes, which tax burdens have become so excessive that they have become confiscatory. Although we may have honest differences of opinion, we should not allow either passion or prejudice to enter into our disagreements and should consider all proposed legislation solely on its merits.

In the present crisis confronting our nation, Oregon, in common with all other states of the Union, is faced with difficulties which will require our best efforts to surmount. It is no time at this critical period to precipitate a controversy that will divide our people into bitter factions when our united support is so urgently needed to meet the manifold grave and perplexing problems which confront this state on every hand.

ONTARIO—The potato acreage of Malheur county will be materially increased this year, particularly the acreage of Bliss Triumphs. Most of this variety will be planted with seed grown last year by P. Tensen of Nyssa from certified Montana grown seed. The acid mercury dip treatment has been recommended by County Agent R. G. Larsen and will probably be put in general use in Malheur county this year.

Pendleton—City Cleaners opened at 124 West Alta St.

In Oregon Homes

MYRTLE POINT—Alocal aspirant for huckleberry recipe honors has sent a huckleberry cream cake recipe to the home economics extension service at Corvallis. It reads as follows:

Huckleberry Cream Cake
3 eggs beaten until light and lemon colored
1 cup sugar, beat into eggs
1 cup sweet cream
2 cups pastry flour
½ teaspoon salt
2 teaspoons baking powder
Mix ingredients in order given and beat well. Then turn into ring mold and bake in moderate oven for ½ hour.

Filling
1 quart huckleberries
2 cups sugar (use only 1 cup sugar if berries are canned)
Let come to a boil and thicken with corn starch. Pour into cake shell and let cool. When cool top with whipped cream

GRANTS PASS—A traveling cannery to aid in conserving surplus foodstuffs of the county is an original idea being promoted jointly by the Josephine county extension service and the granges. Boiler, pressure cooker, tin cans, sealer and other needed equipment are being assembled on a four wheel trailer which will shortly establish a schedule for visits to various communities. It is expected that a majority of the 445 families enrolled in the year round garden project will take advantage of this portable cannery to preserve their garden produce. A charge of a few cents per can will be made to cover cost of operation and supplies, to be paid in cash or in produce. Directing this program are Mrs. Sara Wertz, home demonstration agent; H. B. Howells, county agent; and a Pomona grange committee composed of George Wertz, Ernest Calhoun, Ben Coutant and Pette Dorsay.

BEND—That homemakers of Deschutes county are actively promoting the idea of a "homemade living" is evidenced by the gathering of 170 women who met to obtain the latest scientific information and methods on canning, drying and curing of home produced foods. The meeting was conducted by Lucy A. Case, nutrition specialist of the State college extension service, who demonstrated the various methods of canning strawberries, peas, rhubarb, salmon, meat, vegetable soup and sieved spinach for infant food. Models of homemade dryers and smokehouses were also shown.

ST. HELENS—Homemakers building inexpensive evaporators for fruit and vegetable drying. Within the past three weeks approximately 500 mimeographed directions for constructing homemade dryers have

been given out at the office of Mrs. Sarah Case, county home demonstration agent. Two of the dryers recommended were invented by Lucy A. Case, extension specialist in fruit crates, galvanized wire, a few nails and some hay wire.

Hood River—Apple growers association cannery to start operations about June 15.

Pendleton—Work underway on grading of middle sector of Camas Creek grade on Pendleton-John Day highway.

America spends
3 TIMES
AS MUCH FOR
SMOKE
as for
ELECTRICITY

THE annual per capita expenditure for electricity in 1929 amounted to \$5.00. In the same year the American public spent \$16.50 per capita, or more than three times as much, for tobacco. We spent \$8.00 per capita for ice cream—about one and three-fifths times as much as for electricity; \$8.50 per capita for candy—\$3.50 more per person than for electricity.

There is no other source of energy as any price that will light the house, refrigerate, wash and iron clothes, heat bread, run a clock, clean the rug, cook the food, heat water and provide the world's finest music in your own home at an average cost of about three-fifths of one cent for each dollar the family spends. Electricity is the cheapest thing you buy.
