

Special Range Offer Ends June 15

One of the most successful electric range campaigns in the history of the local power company is rapidly drawing to a close, the final date having been announced as Saturday June 15. The campaign featured the popular Carford automatic range in the latest flat-top model at a price said to be the lowest on record for a modern, fully-equipped range of this type. This special offer coming at a time when every housewife is interested in a cool, clean, convenient method of cooking proved most opportune and many sales have resulted.

"We are highly pleased with the outcome of this campaign" stated J. C. Thompson, local manager of the California Oregon Power Company, today, "and we feel that much of its success is due to the effective advertising which we carried in the local newspapers. The remarkably low price and terms have made possible for many of our customers to purchase a high-grade, electric range, equipped with every modern feature and to enjoy the benefits of our low combination cooking rate. The special price was only possible because these ranges were contracted for last fall. Bought at today's price,

we shall have to sell them at an increase of over 50 per cent. Inasmuch as there are only a few of these special ranges left we are urging our local customers to place their orders at once if they wish to take advantage of this exceptional opportunity."
