### Americans Are Hard to Scare

By RAYMOND PITCAIRN  
National Chairman  
Sentinels of the Republic

During the past few years there has been advocated in this country a philosophy utterly new to America.

It is the Philosophy of Fear. It is preached by those who would destroy our faith in America as a nation and in the individual American as a self-reliant, self-respecting citizen, able and eager to pull his own weight in the boat.

It seeks to convince us that opportunity in America has vanished, that individual courage and initiative are futile, that we should look to government or other agencies, rather than to ourselves, for guidance and support.

That's what's behind most of the queer social and economic panaceas being urged on us today. That's the emotion—Fear—that the men and women who foster such foreign-brewed nostrums are trying to arouse in the American people. It's a preliminary step—as Europe has proved—toward Communism and Dictatorship and other paternalistic forms of government inimical to our American tradition of individual liberty in thought and in action.

But the effort is doomed to failure. Americans, as a people, are hard to scare. Their history proves it.

Timid men could not have conquered a continent. Timid men could not have built a great nation out of tangled forests and wind-swept prairies and desert wastes. Timid men could not have created our vast agricultural and industrial empire.

It took men of courage, with faith in themselves and in their country, to achieve those things. It took the typical American worker and citizen. And just as it was this typical American—not the demagogue or the theorist—who made our country great, it will be the typical American worker and citizen who continues her progress.

America, as I have said elsewhere, is still full of such Americans. And anyone who thinks he can scare them into acting like the frightened peasants of Eastern Europe simply doesn't get the meaning of our national history.
