Company Coming...

but not a dinner-worry for the calm hostess!

This isn't a fairy-tale, though its beginning sounds like one. Any woman who lives the modern way . . . making use of appliances that mean ease and speed . . . may be a gracious hostess whom everyone likes to know. Automatic ranges eliminate the disagreeable side of cooking. They leave a woman free to arrange her home for company, to set her table invitingly, and then . . . to refresh herself by nap or beauty treatment, and dress without haste. She relies on the marvelous time and oven control features of the new ranges. She prepares the meal, but the cooking is handled by automatic devices. Present utilities rates are so low that the operating of an automatic range is a real economy.

Oven Control . . . the almost human regulator which governs heat of your oven so that whatever is within cooks evenly at the proper temperature.

Time Control . . . the contrivance which a housewife sets to cook a meal in her absence. When the hour arrives the timer starts the operation.

Put your roast in the oven, set oven and time controls, and your meat will be perfectly done.

Put your vegetables in with the roast or separately and find them ready when you are ready.

Make your pie, slide it into the oven, leave it so long as your twin controls are set.

INTERNATIONAL

Showing 1 1/2-ton International
with flat-bed body.

● You would never accuse this truck of being a rebuilt passenger car. You can have the same confidence in every truck in the International line, from the beautiful 1/2-ton de luxe-delivery to the powerful 10-ton dump job. Every International owner will give you emphatic testimony of truck-stamina and power... plus praise aplenty for economy in upkeep and operation. We will be glad to discuss lower-cost transportation with you and demonstrate it for you any time. Come in and say when.
