

### Sport Gags

By K. D. P.

It sorta warms the cockles of my heart to know that there are quite a few people in this town who are in favor of starting a softball league for the younger kids of this town. It has been my plan to use players from as low as 8 or 10 to 14 years of age, but with the understanding that the kids must be of good physical condition—one of the most important phases of the game—and also the permission of the parents who may know more about the condition of the kids than I do. Softball can and occasionally does require lots of running and might prove to be too much of a strain on the kids. That is why I prefer to run a five-inning game instead of the regular 7-inning game. But at the same time the game will actually improve the condition of all boys if properly coached.

Everybody has been poking lots of jokes at us because our softball team has not won a game and got beaten badly by Teamsters last Friday night by score of 20 to 2. I am not worrying a bit at all because soon our team will click. The last several games I have been using everybody in our team in order to give them a good workout and there has been no effort on my part to keep the same lineup all the time. And losing to a class A team does not bother me at all because I know that by the time the end of the season comes we can beat any class A

team, because I still maintain that I have put together the classiest infielders I have ever seen. And what is more, we have a darned good pitcher in Bill Landers and a fast coming pitcher in Wilbur Johnstone, who someday will be the sensation of the league with his windmill style, as soon as he can get control of the ball. When Delbert Ayers comes home from Albany College there is going to be a big improvement in the team too.

The hitting of our team is slowly improving all the time and it will not be long that we will rattle off all the hits necessary to produce runs. It has been the weak hitting of our team that has got me slightly worried but lately they are beginning to hit the ball and so I am not worrying now because any time they will suddenly hit the stride which I hope will be on the opening game of the season.

To the members of Faber's Team: I just wish to tell you that all of you should show your appreciation of Everett Faber's work in starting a team and I would not be surprised if Mr. Faber has put in more than \$50 to get started and it is my wish that you put on high class playing during all season and as a warning that any of you who do not show enough spirit, which will demoralize the team, will be promptly dropped for the rest of the season. I had rather use a greenhorn who shows much spirit in playing than the best player in the league with no spirit because a player with spirit will go a long way in producing a fine team. And just think if it has not been for Everett Faber what will we do during the long summer hours to pass our time. Nothing worthwhile.

We played the best game of the season last night when Faber's played against Elks in which we lost by 9 to 6. Up to the fourth inning young Johnstone pitched a fine game and then blew up where the Elks scored 9 runs off him. The next inning Bill Landers went in and completely stopped them cold. Johnstone is really improving all the time and it won't be long before we will have two high class pitchers in Johnstone and Landers.

When the league starts the 6th of June, our team is going to be nattily attired in new jerseys and caps, the color being blue and gold with the name of Faber's on the jerseys and the initial "F" on the caps, which were ordered by Everett Faber for the softball team. From now on watch our smoke.

## HI-WAYS TO HEALTH

by ADA R. MAYNE

### OREGON DAIRY COUNCIL

#### JUNE IS DAIRY MONTH

This month—the month of June—has again been set aside as Dairy Month. All over the country, food stores have designated this special time for helping the six million dairy farmers in the United States to feature wholesome dairy products. Use more butter—drink more milk—eat more ice cream—eat more cheese—will be familiar signs during this special Dairy Month.

The merit of using an abundance of milk and dairy products in the average household is something that cannot be questioned. Many convincing studies of home diets prove definitely that the most enthusiastic users of dairy products are from the families that show more evidence of good nutrition and better standards of health.

The failure to use adequate and protective amounts of dairy products is frequently attributed to an economic situation; but actually it is many more times one of HABIT. When the homemaker is reminded that in a quart of milk she receives more food value and in a wider distribution than she receives in any

other food, she may look upon this product as a definite budget saver, and she is right!

No time is more timely than the summer months for having a pitcher of cool milk on the table at meal times. It not only satisfies a taste for "something" and aids in interesting the entire family in drinking more milk, but it also serves to supply some of the food elements that are often lacking in the lighter summer diets. If you try the milk pitcher on the table idea, you will find that allowing 1 glass of milk in the pitcher for each person is usually not enough.

In building more dairy products into your menus don't overlook the importance of cheese. Made from milk, it contains the same valuable proteins, minerals and vitamins and because of this and along with its low cost, really deserves an important role in home menus. With so many varieties to choose from it is possible to find a cheese that suits every individual taste. Remember, in cooking with cheese that a low temperature should always be used.

## McCormick-Deering Mowers Have Always Been Good and the No. 7 Enclosed Gear Mower Is the Best Yet

Come in and go over the entire  
mower. You'll agree that you  
have never seen anything like it

WE ARE anxious to have all our friends see the McCormick-Deering No. 7 Enclosed-Gear Mower. We think it is one of the finest pieces of farm equipment we have ever sold!

For example: The entire operating mechanism, including drive gears, differential, and countershafts, is assembled compactly in an oiltight gear housing and runs in a bath of oil. There are ten high-grade roller bearings, six on the main axle and four on the countershaft. Operation is so smooth and noiseless that you can scarcely hear the light hum of the sickle!

Special oil seals at the ends of the main axle and flywheel shaft, and the oiltight gear box prevent leakage and protect all working parts against the entrance of dirt and other abrasive materials. Floating action of cutter bar provides ample play without disturbing knife registration.

### WRESTLING NEWS

Marshall Carter, after beating Bob Kenaston two straight, suffered a sharp reversal of form and succumbed to Bulldog Jackson and his vicious hammerlock in a rough, bloody main event match in the armory last Monday night. The victory was Jackson's second in a row here.

In losing to the Portland roughneck, Carter didn't seem like the same person who whipped the daylights out of the world's junior heavyweight champion on the last two programs. With the exception of the first two minutes of action, when Marshall Sonnenberged his way to a fall, his attack had little effect on the Bulldog, and he was unable to stay clear of Jackson's pet hammerlock hold. Jackson, after losing that first tumble, came back to win two straight in 12 minutes and 10 seconds of brawling.

Sailor Dick Trout put the finisher on Sammy Kohen of New York City in the fourth round in their middle event by giving him airplane spins 13 one way and 10 the other way and then flopped on him for the match. Sammy was through for the night.

Jim Spencer lost to Vern Clark in the opener on foul.
