THE INFANTILE PARALYSIS APPEAL

The National Foundation for Infantile Paralysis has begun its eleventh annual appeal for funds with which to carry on the people's fight against infantile paralysis.

The dimes and dollars of all of us make possible the continuance of this vital effort to safeguard our national health. And national health means YOUR health, your CHILDREN'S health; and the health of your NEIGHBORS and their CHILDREN.

Too often we forget that the individual forms an integral part of the national pattern and that the nation's physical well-being depends directly upon the physical well-being of its nationals.

Poliomyelitis—infantile paralysis—strikes individually, sectionally or nationally. But whichever the manner of its striking it always ATTACKS WITHOUT WARNING.

Fortunately, through the National Foundation for Infantile Paralysis and its nation-covering network of Chapters, the people of America have built up a strong defense against the ravages of infantile paralysis; while light and day in the laboratories of the nation Foundation supported research workers fight on... fight on so that a full offensive against the disease may be developed.

By contributing to this cause of the people, we all can bring immeasurably closer the day when the CHILDREN'S VICTORY shall be secured.

THE FARM EXPERT

We are not taking a crack at professional agronomists, but at professional interferers when we publish the following clipping from the Lake County Examiner, which credits it to the Springfield, Mo., Press and Leader. O. K. Beals, Josephine county extension agent, recently told this story at a luncheon, and we pass it along to you.

"I am Mr. Brown, the new agricultural expert for this division. Here are my credentials."

"Ah, yes, Mr. Brown. Harvard man, I see. Splendid. Now, which department do you—"

"I think I would prefer the publicity angle. I have some new ideas I should like to give the farmers. Take, for example, our most delicious berries, the potato and the onion. I think we should plant the trees closer and prune the branches in the spring just after the molting season. That would give us more branches to produce more burrs. This same plan would help the peanut tree."

"But, Mr. Brown—"

"However, my chief interest is in bovines or cows. It has been our practice to produce numbers of useless male cows, and this must be discouraged. Such as are produced should be butchered and made into sausage and ham to relieve the pork and mutton shortage."

"We have also followed the wasteful practice of feeding our young female cows a year or more before breaking them to give milk. I think these fillies should be trained to produce milk within 6 or 8 weeks after hatching."

"The whole dairy business needs efficient reorganization. We must teach our dairymen to specialize. The cows in one region should give nothing but milk, those in another nothing but cream, those in a third section nothing but butter, and those in the fourth section nothing but cheese. It will not be necessary to specialize in buttermilk, for we can use ordinary milk and add the butter at a processing plant."

"We have been very wasteful. No doubt you have read about the breakage of milk bottles. This can be corrected by using large rubber containers with rubber cushions around the top. We should not blame the cows, for it must be very difficult to sit on those small bottles."

BUY WAR BONDS
and give the change to fight
INFANTILE PARALYSIS

"Cows are nervous animals, easily disturbed by noise." I think we should disconnect or plug up the horns they use in making that mooing sound, and—"

"Yes, yes, Mr. Brown. That is splendid. But excuse me a moment. I need a little air."—Grants Pass Bulletin
