Uncle Sam Says

Ten years can make a big difference. That youngster, now in pigtails, will be grown up and ready for college in 10 years. Or you may be ready to tackle that pet project of yours, a new home, retirement, or starting a small business. Yes, 10 years can make a difference in many things. Money, for instance. If you go about it right you can make today's money grow, right along with those plans for the future.

Figure, today, how much you'll need in 10 years. Then put aside the amount in U. S. Savings Bonds each week, enough to equal the total you have in mind, always remembering that for every three dollars you invest today, you will receive four dollars in 10 years. If you are on a payroll, join the Payroll Savings Plan where you work. If you are self-employed, enroll for the Bond-a-Month Plan at your own bank.
