THIS FOOLISH FELLOW

WON'T GET FAR

His trouble is obvious — overloading. And it's just as foolish for you to expect an insufficient wiring system in your home to carry the electrical load required by modern electrical living.

To enjoy the full comforts and conveniences, safety and economy which can be provided by electricity, you need a home with Adequate Wiring.

ADEQUATE WIRING PROVIDES:

- AN ADEQUATE ELECTRIC SERVICE ENTRANCE having enough wire to bring in as much electricity as your home may need at any time (though you pay only for what you use).
- ENOUGH BRANCH CIRCUITS having large enough wires to carry electricity at full power to serve efficiently all the needs of your home (which insures economical operation).
- ENOUGH CONVENIENCE OUTLETS to permit efficient and comfortable use of lamps, appliances, radios and other portable equipment.
- ENOUGH PERMANENT LIGHTS at the proper places to reduce eyestrain, prevent accidents, and add beauty indoors and out.
- ENOUGH SWITCHES, properly placed, to give you instant flick control over your electric servants.

ADEQUATE WIRING COSTS SO LITTLE — MEANS SO MUCH
