SPORT CHATS

by Bill Askwith
The top ten teams of the national college football teams should look like this when the 1950 season comes to an end: Notre Dame, Oklahoma, Illinois, Duke, Tennessee, Army, Michigan, Maryland, Southern Methodist and Stanford. Three of these teams went through the 1949 season without defeat; Notre Dame, Oklahoma, and Army.

ALL STATE SEMI-PRO TEAM:

Central Point baseball fans should be interested to learn this past week the Portland Journal picked two of the Cheney studs players on their all state semi-pro team. The two were Frank Roelandt, catcher, and Clyde "Moose" Blevins, outfielder.

POINTERS DRILL—

Coach Leonard Warren is putting his high school squad through daily scrimmages in preparation for the opening game this Friday afternoon against Rogue River High at 3:00 p.m.
Warren has a good size squad but lacks experience both in the forward wall and in the backfield. In scrimmages this week Bob King,

Herb Trautman and Chuck Walker have been looking very good. This trio will pack the leather for the Pointers this season. Walker will handle the passing and will call the offensive plays from his quarterback position. Trautman and King have improved each practice session in running the ball back.

On September 30th the Pointers meet Weed at Weed and then on October 13th they open their conference schedule against Sutherlin in the Pointers home opener. Warren hopes the two contests with Rogue River and Weed will give the Pointers a good deal of experience before the Sutherlin opener. The squad has shown enthusiasm and spirit in all their workouts. As Coach Warren stated at the opening practice of the season, a team with drive and hustle will come along through the season. He will not tolerate anything but a hustling team.

The season schedule for the Pointers is:

Sept. 22nd—Rogue River at Rogue River, 2:00 p.m.
Sept. 30th—Weed at Weed, night
Oct. 13th—Sutherlin at Central Point, night
Oct. 20th—Eagle Point at Central Point, night
Oct. 27th—Kerby at Kerby, 2:00 p.m.
Nov. 3rd—Phoenix at Central Point, night
Nov. 11th—Myrtle Creek at Myrtle Creek, 2:00 p.m.
All night games at 8:00 p.m.

ANOTHER ROOKIE SCORES:

Ted Tappe, ex Washington State College star basketball and baseball player up from a minor league club to the Cincinnati Reds, hit a home run against the Brooklyn Dodgers. This was his first time up in the major leagues. Last spring he hit a home run against Joe Cheez in the Pacific Coast Conference play-off. Our Clarence Mellbye played ball with Tappe in the Canadian League a year ago. Mellbye said Tappe takes a terrifically hard swing at the plate and hits a very long ball.

WORLD SERIES—

The 1950 World Series will open in the park of the National League winner, Wednesday, October 4th at 1:00 p.m.

The starting date for this classic was announced by baseball commissioner Chandler after he met with representatives of the big leagues. Chandler said that in event of a tie in the National League and a resulting three game playoff, the World Series would start one day later on October 5th. The American League rules provide for a single game playoff in event of a tie, so the World Series would start as scheduled.

The first two games will be played in the National League park and the next three, if all are needed, in the American League winner's park. If more games are necessary, the teams will return to the National League park. Chandler said no day off for travel would be taken unless it is an East-West series.

are you forever dedicated to the dishpan —
OR is your wiring planned for a dishwasher?

Who of us isn't looking impatiently to the time when we'll have many more electrical appliances at home working for us? Wouldn't it be an awful shock, though, if, one of these days, as you keep adding more equipment, you find your wiring "can't take it"?

That will happen—if your home hasn't Adequate Wiring. But, in a home that's Adequately Wired you can make extensions to service quickly and cheaply. You're assured of a wiring system having enough power and provision for enough circuits to supply all your electrical needs efficiently, comfortably and economically, now and in years to come.

Plenty of power and easy extension of service are only a part of Adequate Wiring. Every Adequate Wiring installation includes a scientific system of outlets, permanent lights and switches which assures maximum safety, comfort, convenience and beauty in all your use of lights and electrical equipment throughout your home.
