

New Bulletin Covers Fruit Tree Selection

Thousands of dollars are lost each year by Oregon nurserymen and orchardists because of reduced yields and quality of fruit from trees infected with virus diseases...

The bulletin, "Selecting Stone Fruit Trees Free From Virus Diseases," reports that there are between 40 and 50 distinct virus diseases in North America...

The publication covers procedures for selecting virus-free trees; methods developed for indexing stone fruit trees; the value of using indexed virus-free trees...

Copies of the bulletin are available from county extension offices and OSC.
