

The Coast Mail.

SATURDAY, NOVEMBER 13, 1880.

MISCELLANEOUS.

The imported birds' nests from Java cost from \$30 to \$40 a pound.

Hay and vegetables along the Stickeen river are a very excellent crop this year.

Freights are high and shins scarce, over on the Sound, and business materially injured thereby.

Several deaths from diphtheria have been reported from Jackson county.

A New York dispatch says rails and rolling stock have been ordered for the Nevada and Oregon railroad.

In Japan it is talked of to negotiate a foreign loan and retire a part of their paper currency.

It is reported that Fort Colville is to be put in complete repair for the accommodation of three companies of troops.

An elderly shoemaker from Victoria committed suicide at Tacoma by shooting himself. He had refused to give his name.

The average weight of newspaper matter forwarded from the New York Post Office during the past three months was twenty-five tons a day.

A SANTA FE special states that a body of thirty Apaches attacked at daylight in Mexican Territory a platoon of 9th Cavalry and killed two soldiers.

Wesley people have donated ten acres of land for the use of the academy of the Presbytery of Idaho propose establishing, and they expect it will grow into a first-class institution.

Bill Jones owned one of the bill-boards of a Michigan town, but business being dull he was compelled to sell in order to pay his hotel bill. It rather bored Bill to have to sell his bill-board to pay his hotel bill.

An American lawyer is now Attorney-General of the Sandwich Islands. The Philadelphia Chronicle remarks: "If in two years he doesn't own the entire country and hold the King's note for a large sum, he is no credit to the American bar."

J. OLIVER WRIGHT, cashier of ex-civil Sheriff Gauthreaux, of New Orleans, charged with embezzlement of \$200,000 of city scrip, and \$300,000 of taxes collected for the city by the Sheriff, has been discharged on the ground that Wright was only an employe of Gauthreaux, and in no way responsible to the city.

A MAN ON West obtained a divorce from his wife and married again within three days after the decree was granted. An Irishman commenting on the man's action, remarked: "Bed, he couldn't have much respect for his first wife, to be marryin' again so soon after leavin' her."

The London Times in its editorial on the election says: "There are good reasons for believing Gen. Garfield's administration will be like the present one; moderate in policy. The Times regrets that civil service reform and free trade have been thus equally thrust into background during the campaign."

MR. ALEX. HENRY, of South Bay, W. T., informs us that he raised this season, on 260 square yards of land, 65 bushels of onions. He made no account of those which he used and sold previously, amounting probably to five bushels. This, it will be seen, amounts to nearly 300 bushels per acre.

A DUBLIN dispatch says: The Government has decided to increase the constabulary by 2000 men. Walsh and Healy have commenced an action for false imprisonment against the magistrate, who signed the warrant for their arrest, on the ground that Manning's deposition contains no charge of any crime known at law.

The Philosophical Society of Glasgow is to hold an exhibition of gas apparatus on a large scale next autumn, and it is intended also to make a display at the same time of the apparatus which will illustrate the progress made in electric lighting, in the manufacture of mineral oils, in water measurement and regulation, in hydraulic engines, in heating and ventilation, etc.

The Portland Bulletin says: A pedlar was passing the graveyard in East Portland, late on Monday night, when he saw two figures grooving around a new-made grave, and he caught the faint gleam of a lantern. He drove on a few blocks, tied his horse and returned to inspect the place. As he neared the place he heard voices, but the persons speaking had evidently set a spy, for, as he approached, he heard a low whistle, and shortly afterward retreating footsteps. He then boldly advanced and made observations. He found fresh foot-prints and some evidences of ghostly work. He reported his fears that grave robbery was contemplated, so the place was watched. Perhaps some medical colleges need a "stiff" at this time, for our informant is very sure it was no ghost he saw, or if a ghost, a good, lively corpse.

A LISE OF CHANGE OF DATE.—In passing around the earth a day is lost or gained as the course be west or east. Thus, if one goes west, with the sun, when he has gone completely around the earth he has overtaken the sun, so to speak, but in reality he has naturalized the motion of the earth in its revolution from west to east as much as is equivalent to a whole day or one revolution from west to east as much as is equivalent to a whole day or one revolution, and it is the same in effect as though the earth had been motionless for one whole day and the sun had not appeared to move. In this way the traveller would arrive at his starting point a day sooner than would appear to be by his reckoning. And the contrary would happen if he went east, for he would have one more sunrise and one more sunset than if he had staid at home. This will be apparent if one can imagine himself going east as fast as the earth revolves. He will clearly make two revolutions in space and would pass the sun twice in twenty-four hours. In going west the sun would appear stationary, because the man moving as fast as the earth would neutralize the motion. In one case a day would be gained, in the other it would be lost. To equalize this difference, sailors add or drop from the almanac one day in passing the middle of the Pacific Ocean.

There are many people who do not know how to make the most of their surroundings. A German coming out on a steamship last week committed suicide by cutting his throat with a piece of glass. They buried him at sea. How much water and handkerchief would have been had attended to his burial as he had intended by plunging into the sea, in the first place. An English man shot himself on Goat Island on Monday. He got a two-line item in Tuesday's papers. Now, if he had appreciated his advantages and shot dead first down the cataraet, or taken a boat and gone over the falls in a dramatic style, or jumped from Table Rock, dragging a backman with him, or dived from one of the suspension bridges, what a sensational article it would have made. A column at least, and a three-line head. Some people have no nose for news.—Detroit Press.

It is well known that fluorine acid will dissolve glass, and the practical execution of etching designs on glass may be done as follows: The article must first receive the drawing by hand, stamp, or by transfer, using as a material an oily lac mixed with a little paint, so as to show on a glass. This done, dust over it a powder made of metal, copal, or any substance capable of resisting the acid. When dry dip the glass with the drawing on it in fluorine acid, or paint it on, allow it to remain a few seconds, or until the powder begins to come off. Then rinse and clean with water, and your work is completed.

NOTICE OF FINAL PROOF. ROSKINS LAND OFFICE, Oct. 23, 1880. Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim and secure final entry thereof on Saturday, November 20, 1880, before the judge or clerk of the court of Cook county, Oregon, viz: Peter W.
