THE OLD HOME.

It sleeps beneath the sunny hill
As in a tranquil dream;
The giant oaks are spreading still
Above the meadow stream.
Wild birds that join in music sweet
And quiet sheep and cows
Find grateful shelter from the heat
Beneath those leafy boughs.
All day among the scented grass
The crickets leap and sing,
And green and golden shadows pass
Like shadows on the wing.
How calmly in the sheltered nook
The summer hours may go,
Yet bright and joyous as the brook
That sings with deepening flow.
O world, with all thy cities' pride,
Thy plains and valleys green,
Thou hast not in thy boundless wide
So sweet, so fair a scene!

The Tariff.

It is not strange that many men want to know what the tariff is, and what it does. The New York Tribune says this inquiry is made of it almost every day. Most of the men employed in protected industries know full well that they owe much to the tariff—a larger demand for their labor, better wages, and happier homes. But some even of these working men do not see clearly how the system operates. On the other hand, there are a great many workers who do not see how the tariff affects them at all. They are laborers, porters or clerks in towns, hands on railroads or in shops, mechanics in the various trades, and hands on farms, and they fail to realize that the system which lifts the rate of wages for the men in various branches of manufacture, raises the rate paid for all labor, and so lifts their wages also. For more than a quarter of a century this question has been thrust aside in popular discussions. The republican party made the tariff in 1861, only 11 years ago; it was in the house only 2 Douglas democrats favored the bill, while all the other democrats, 40 in number, and only 1 republican, voted against it. By similar votes many bills of improvement or revision have been passed, greatly strengthening and broadening the protective system; republicans always support it, and democrats always oppose it, almost unanimously. At the same time, the democratic party has made amendments designed to weaken the efficiency of the system in various particulars, and at times they have succeeded, as they did when the wool duty was cut down. Every time the democratic party has obtained a majority in the house it has tried to tear down the tariff.

It is not strange that many men want to know what the tariff is, and what it does. The New York Tribune says this inquiry is made of it almost every day. It is not strange that many men want to know what the tariff is, and what it does. The New York Tribune says this inquiry is made of it almost every day. Most of the men employed in protected industries know full well that they owe much to the tariff—a larger demand for their labor, better wages, and happier homes. But some even of these working men do not see clearly how the system operates. On the other hand, there are a great many workers who do not see how the tariff affects them at all. They are laborers, porters or clerks in towns, hands on railroads or in shops, mechanics in the various trades, and hands on farms, and they fail to realize that the system which lifts the rate of wages for the men in various branches of manufacture, raises the rate paid for all labor, and so lifts their wages also. For more than a quarter of a century this question has been thrust aside in popular discussions. The republican party made the tariff in 1861, only 11 years ago; it was in the house only 2 Douglas democrats favored the bill, while all the other democrats, 40 in number, and only 1 republican, voted against it. By similar votes many bills of improvement or revision have been passed, greatly strengthening and broadening the protective system; republicans always support it, and democrats always oppose it, almost unanimously. At the same time, the democratic party has made amendments designed to weaken the efficiency of the system in various particulars, and at times they have succeeded, as they did when the wool duty was cut down. Every time the democratic party has obtained a majority in the house it has tried to tear down the tariff.

purposes exclusively." It is taxation which is not intended to help the laboring people, or to prevent the depression of wages toward the level of the overcrowded countries of Europe. In another article it will be shown how the tariff affects the rate of wages, not only for labor in the manufactures, but for all labor.

Conkling and Blaine.

Ex-Senator Conkling is absolutely convinced that Blaine will be elected and that he can easily carry New York. Conkling has always been against the policy of hunting up nonentities for candidates of any party. His friend quotes him as saying: "It is only the bold who deserve to win in politics. The republicans at Chicago took a square position upon the tariff question; a position that admits of no misconception, and then upon top of that placed in nomination two men with the longest records as public men of any men in the party. This is wholesome aggressiveness and opposed to the timidity of the democrats in making a tariff platform which is absolutely meaningless, and putting in nomination an unknown man of third-rate ability."

Conkling likens Cleveland unto the R. B. Hayes order of statesmen. Conkling is so well satisfied with his law practice that he has had his political dislikes in a measure softened. He will not be at all displeased to have Blaine elected. Meanwhile his satirical methods of thought find sources of amusement in inciting frolicsome editorial paragraphs in the New York World, with whose editor he has within the last year maintained something of an intimacy. He will not make any speeches in the campaign for either side.

Conkling, in an incidental way, very neatly turned the charge that Blaine is a tattooed man. "Blaine is tattooed," said Conkling, "but he is tattooed from head to foot with republican scars. He has been at the front in every fight which republicans have been obliged to wage for the last 20 years." This is no exaggeration of the naked fact. Blaine has been in the fore front of every fight for the union and good government waged these many years.

LOVE'S LINGERING.

Some find Love late, some find him soon,
Some with the rose in May,
Some with the nightingale in June,
And some when skies are gray;
Love comes to some with smiling eyes,
And comes with tears to some;
For some Love sings, for some Love sighs,
For some Love's lips are dumb.
How will you come to me, fair Love?
Will you come late or soon?
With sad or smiling lips above,
By light of sun or moon?
Will you be sad, will you be sweet,
Sing, sigh, Love, or be dumb,
Will it be summer when we meet,
Or autumn ere you come?

Evidence accumulates that the Irish are going for Blaine, Judge J. S. O'Connor, an ex-Irish soldier, formerly of Washington and now of New York, thus writes from the latter city to a friend at Washington: "Referring to the political situation, to a look-on it would appear that the back-bone of the democratic party here is broken. The disaffection among our people from the democratic ranks is something wonderful and a cause of much alarm to the old war-horses of the party, which were said, although erroneously, to own our people. No matter where I turn, the success of Blaine and Logan is looked upon as a foregone conclusion. Although immersed in business, and well tired of the excitement of political strife, as you know I have just reasons to be, I cannot resist public feeling, which is something akin to that of the old war days, and, indeed, the results of the next election are to be equally as glorious to the country as the results of the success of the union arms, and so I intend to step off, and do my level best for the party which alone stands between the American workingmen and the condition of semi-serfdom to which the workingmen of Europe have been reduced."

The fire commissioners of New York offered a premium for an invention to throw a life-line 300 feet upward. Several inventors reported readiness to exhibit their contrivances, and the commissioner took them in a boat to the Fallenden, where the bluff bank of the Hudson was 400 feet high by mathematical measurement. Half a dozen of the mortars were tested and their carrying capacity varied. All succeeded in carrying a cable 200 feet, as high as the highest house in New York, but none of them could carry to the top of the bluff. The highest reach was 347 feet, and the commissioners thought that machine would do. It was invented by a member of the fire department and promised to be a practical life-saver.

After thorough personal examination into the political situation in New York, Murat Halstead, editor of the Cincinnati Commercial Gazette, is of the opinion that the republicans have already won the fight. He finds that the independent movement amounts to little, but that disaffection in the democratic ranks toward Cleveland is even greater than it has been reported.

HONGELL & SELANDER,
O'Connell's new building, Front street,
DEALERS IN—
BOOTS, SHOES
—AND—
CLOTHING!

Ladies' fine and coarse shoes, boys boots and shoes, and gent's rubber coats, boots and shoes in great variety. Our ready-made boots and shoes were manufactured especially for the trade. Hats, caps and underwear; stationery, cutlery, crockery, cigars and matches.

Our entire stock is of the latest styles and finish, and as cheap as the cheapest. Come and see us at our new store, in O'Connell's new building, Front street, 209

All Kinds of Kisses.

There's a formal kiss of fashion,
And a burning kiss of passion,
A father's kiss,
A mother's kiss,
And a sister's kiss to move;
There's a traitor's kiss of gold,
Like a serpent's clammy fold,
A first kiss,
A stolen kiss,
Affix the thrilling kiss of love;
A meeting kiss,
A maiden kiss,
A kiss when fond hearts sever;
But the saddest kiss—
A kiss to part forever.

The Manner in Which the Government Pays Out Its Money.

Many people throughout the country seem to suppose that the officials at Washington have direct access to the funds of the government, and that they have only to go to the treasury, put in their hands and fill their pockets. The care in regard to every pension, whether it amounts to \$1 a month or \$100 a week, will show how carefully the money of the country is protected. The same rule holds good in regard to all drafts upon the treasury. The pension must first be found to be all right by the appropriate evidence, which is compared with the muster rolls and the records in the war department. It goes through a number of hands, and, if found all right, a requisition is made upon the treasury for it. This requisition for its payment must go through 13 bureaus before it can be paid. In the first place, there must be a fund appropriated by congress for the payment of the class to which it belongs, and the appropriation must be available before the requisition will be made. Then it must be drawn up and signed by the commissioner of pensions. From him it goes to the secretary of the interior, who signs it and sends it to the comptroller of the treasury. The second comptroller signs it and sends it to the third auditor, who looks it over and passes it on to the warrant division. From here it goes to the register of the treasury, who in turn examines it and hands it over to the division of account. If it passes here all right, it is then presented to the United States treasurer for his signature. Having been signed, it goes back to the division of account to be registered, then to the register of the treasury for his signature, then to the division of accounts again for mailing to the depository of the pension agent who is to pay the claim, and another note must be sent informing the agent that the money is placed to his credit for its payment. This is the modus operandi for every pension claim that is granted, whether it be for \$100 a week, as in the case of the wives of dead presidents, or \$1 a month for the end of a finger.

A Curious Calculation.

In a recent lecture "On Fixed Stars," Dr. David Gill wanted an illustration of the distance to Centauri. This is what he said: "We are a commercial people; we like to make our estimates in pounds sterling. We shall suppose that some wealthy directors have failed in getting parliamentary sanction to cut a sub-Atlantic tunnel to America, and so for want of some other outlet for their energy and capital they construct a railway to Centauri. We shall neglect for the present the engineering difficulties, and merely detail—and suppose them overcome—the railroad open for traffic. We shall go further, and suppose that the directors have found the construction of such a railway to have been peculiarly easy, and that the proprietors of the interstellar space had not been exorbitant in their terms for right of way. Therefore, with a view to encourage traffic, the directors had made the fares exceedingly moderate, viz., first-class at one penny per 100 miles. Desiring to take advantage of the facilities, an American gentleman, by way of providing himself with small change for the journey, buys up the national debt of England and of a few other countries, and, presenting himself at the booking office, demands a first-class single to Centauri. For this he tenders in payment the scrip of the national debt of England, which just covers the cost of his ticket; but I should explain that at this time the national debt, from little wars, coupled with some unremunerative government investments in landed property, had run up to the national debt of £700,000,000 to £1,200,000,000 sterling. Having taken his seat, he occurs to him to ask: 'At what rate do you travel?' 'Sixty miles an hour, sir, including stoppages,' is the answer. 'Then when shall we reach Centauri?' 'In 48,663,000 years, sir.' 'Humph! rather a long journey.'"

The love of camping out means something more than the occasional desire to kick over the traces of the domestic hearth. "On what other hypothesis," asks the London Globe, "is it conceivable that a man who would resent as a degradation the performance of any mental task in his own well ordered household, should become a veritable Gilekites of his own free will? Not only will he condescend to the hewing of wood and drawing of water, but he will combine in his own person all the offices of the servant's hall. He will eat dinner of his own preparing. He will make his own bed, and lie in it. His home cuisine may be that of a gourmet, his chef may be the heir of all the cooks from Varro to Francatelli, but after he has boiled the roast steak of his own grilling, he will rate it higher than a chef d'œuvre of Ude or Kitchener, and, such is the force of imagination, he will probably assimilate it without a dyspeptic pang."

The fine grades of California wines, Zinfandel, California Tokay, Muscat and Riesling, have advanced 33 per cent. in price during the last five years. Large quantities of Zinfandel, a fine kind of claret, are shipped to Europe, and return with labels that bring fancy prices.

A PREMIUM
FOR
OUR SUBSCRIBERS
Believing that the most acceptable and useful Premium that can be offered to our subscribers is a metropolitan newspaper replete with the news of the day, we have made arrangements with the proprietors of the

SAN FRANCISCO
Weekly Call.
TO CLUB WITH THE
Coast Mail.

The regular subscription price of our paper is
\$2 50 PER YEAR.

Now, we will furnish
BOTH PAPERS FOR ONE YEAR

Including the magnificent "Bird's-Eye View of California," especially drawn for the WEEKLY CALL for
\$2 75 PER YEAR.

Both papers sent to one or two addresses, optional with the subscriber. THE SAN FRANCISCO WEEKLY CALL (8 pages) is the most widely distributed and meritorious weekly on the Pacific coast. It is the weekly edition of that sterling newspaper, THE MORNING CALL, whose reputation among newspaper men is world-wide, and whose circulation is exceeded by only one newspaper (the Chicago News) west of New York. We take pleasure in offering our subscribers this golden opportunity to obtain the news from abroad as well as that at home.

SAMPLE COPIES SENT FREE.

DR. SPINNEY,
KEARNEY STREET.
Treats all Chronic and Special Diseases.
YOUNG MEN
Who may be suffering from the effects of youthful follies or indiscretion, will do well to avail themselves of this, the greatest boon ever laid at the feet of suffering humanity. DR. SPINNEY will guarantee to forfeit \$500 every case of Seminal Weakness or physical disease of any kind or character which he undertakes and fails to cure.

There are many at the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and in some cases a discharge in a manner the patient cannot account for. On examining the urinary deposits aropy sediment will often be found and particles of albumen appear, or the color of a thin milky hue, again changing to a dark and turbid appearance. There are many men who die of this difficulty. It is the cause of weakness, and is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genital-urinary organs.

Office Hours—10 to 4 and 6 to 8, Sundays from 10 to 11 A. M. Consultation free. Thorough examination and advice \$5. Gall or address
