# COLONEL QUARITCH, V.C. By H. RIDER HAGGARD.

The old gentleman staggered for a moment, and caught at the mantel piece, for the blow was a heavy one, and as unexpected as it was heavy. But he recovered himself in an instant, for it was one of the peculiarities of his character that his spirits always seemed to rise to the occasion in the face of urgent adversity-in short, he possessed an extraordinary share of moral courage.

"Indeed," he said, indignantly, "indeed, it is a pity that you did not tell me that at once, Mr. Quest; it would have saved me from patting myself in a false position by proposing a business arrangement which is not ac-ceptable. As regards the interest, I admit that it is as you say, and I very much regret .tt. That stupid fellow, George, is always so dreadfully behindband with his accounts that I can never get anything settled." He did not state, and indeed did not know, that the reason that the unfortunate George was behindhand was that there were no acc to make up, or rather that they were all on the wrong side of the ledger. "I will have the wrong side of the ledger. "I will have that matter seen to at once. Of course, busi-ness people are quite right to consider their due, and I do not blame Mesers. Cossey in the matter, not in the least. Still, I must say hat, considering the long and intimate rela-.ionship that has for nearly two centuries ex-isted between their house and my family, they might-well-have shown a little more eration."

"Yes," said Mr. Ouest, "I dare say that the step strikes you as a harsh one. To be perfectly frank with you, Mr. de la Molle, struck me as a very barsh one, but of course I am only a servant, and bound to carry out my instructions. I sympathize with you very much-very much, indeed."

"Oh, don't do that," said the old gentleman, "Of course, other arrangements must be made; and, much as it will pain me to terminate my connection with Messrs, Cos-sey, they shall be made."

'But I think," went on the lawyer, without any notice of his interruption, "that you mis-understand the matter a little. Cossey & Son are only a trading corporation, whose object is to make money by lending it, or otherwise-at all hazards to make money. The kind of feeling that you allude to, and that might induce them, in consideration of long intimacy and close connection in the past, to forego the opportunity of so doing, and even to run a risk of loss, is a thing which belongs to former generations. But the present is a strictly commercial age, and we are the most commercial of the trading nations. Cossey & Son move with the time, that is all, and they would rather sell up a dozen families which had dealt with them for two centuries than lose five hundred pounds, provided, of course, that they could do so without scandal and loss of general respect, which, where a banking house is concerned, also means a loss of custom. I am a great lover of the past myself, and be lieve that our ancestors' ways of doing business were, on the whole, better and more charitable than ours; but I have to make my living, and take the world as I find it, Mr. de

"Quite so, Quest; quite so," answered the squire, quietly. "I had no idea that you looked at these matters in such a light. Certainly the world has changed a good deal since I was a young man, and I do not think it has changed much for the better. But you will want your luncheon; it is hungry work talking about foreclosures," Mr. Quest had not used this unpleasant word, but the squire had seen his drift. "Come into the next room," and he led the way to the drawing room, where Ida was sitting, reading The Times.

"Ida," he said, with an affectation of beartiness, which did not, however, deceive his daughter, who knew how to read every change of her dear father's face, "here is Mr. Quest. Take him into hincheon, my love. I will come presently. I want to finish a nota."

"I do not pretend, Miss de la Molle, that it is a pleasant task for any young lady to un-dertake. I quite understand you shrinking from it. But sometimes one has to do unpleasant things, and make compromises with one's self respect. It is a question whether or no your family shall be utterly ruined and destroyed. There is, as I honestly believe, no prospect whatever of your father being able to get the money to pay off Cossey & Son, and if he did it would not help him, because he could not puy the interest on it. #### CHAPTER X. THE TENNIS PARTY.

Ida shook hands coldly enough with the lawyer, for whom she cherished a dislike not unmixed with fear. Many women are by nature gifted with an extraordinary power of intuition, which fully makes up for their deficiency in reasoning force. They do not conclude from the premises of their observation, they know that this man is to be feared and that trusted. In fact, they share with the rest of breathing creation that self pro-tective instinct of instantaneous and almost automatic judgment given to guard it from the dangers with which it is continually threatened at the hands of man's overmastering strength and ordered intelligence. Ida tively watching her face, said to himself that was one of them. She knew nothing to Mr. Ocest's disadvantage, indeed, she always are the moken of with great respect, and,

They went into the old dining room, where the luncheon was set, and while Ida allowed Mr. Quest to cut her some cold boiled beefan operation in which he did not seem to be very much at home, she came to a rapid conon in her own mind. She had seen clearly enough from her father's face that his interview with the lawyer had been of a most serious character, but she knew that the chances were that she would nover be able to get its upshot out of him, for the old gentleman had a curious habit of keeping such un-pleasant matters to himself until he was absolutely forced by circumstances to reveal them. She also knew that her father's affairs were in a most critical condition, for that she had extracted from him on the previous night, and if any remedy was to be attempted it must be attempted at once, and on some heroic scale. Therefore, the made up her mind to ask her bets noir, Mr. Quest, what the truth might be.

"Mr. Quest," she said, with some trepidation, as he at last triumphantly handed her the beef, "I hope that you will forgive me for asking you a plain question, and that if you can you will favor me with a plain answer. I know my father's affairs are very much involved, and that he is now anxious to borrow some more money, but I do not know quite how matters stand, and I want to learn the exact truth."

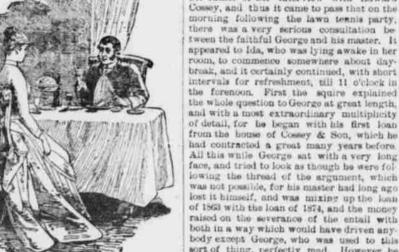

"I am very glad to hear you speak like that, Miss de la Molle," answered the lawyer, "because I was trying to make up my mind to broach the subject, which is a painful one to me. Frankly, then, forgive me for saying it, your father is absolutely ruined. The interest on the mortgages is a year in arrear, his largest farm is just thrown upon his hands, and, to complete the tale, the mo gees are going to call in their money or fore-

At this statement, which was almost brutal in its brief comprehensiveness, Ida turned pale as death, as well she might, and dropped her fork with a clatter upon her plate.

"I did not realize that things were quite so bad," she murmured. "Then I suppose that the place will be taken from us, and we shall -shall have to go away."

"Yes, certainly, unless money can be found to take up the mortgages, of which I see no chance. The place will be sold for what it will fetch, and that nowadays will be no great sum." "When will that be?" she asked.

"In about six or nine months' time." Ida's lips trembled, and the sight of the

No more business was discussed by the squire that afternoon. Indeed, it interested Mr. Quest, who was above all things a stukind dent of character, to observe how wonderfully the old gentleman threw off his trouble. To listen to him energetically arguing away with the Rev. Mr. Jeffries as to whether or no it would be proper, as had hitherto been the custom, to devote the proceeds of the harvest festival collection (£1 18s, 3d, and a brass button) to the county hospital, or whether it should be applied to the repair of wrong side. the woodwork in the vestry, was, under the circumstances, most instructive. # THE SEA-SERPENT AGAIN.

A sea-serpent, 103 feet long, covered with allvery, shining scales, and having embryo wings on its shoulders, was seen to coil itself up in slippery folds on the coast of Florida last month. Three reliable persons saw this creature distinctly. After rolling and twisting its bulky form around on the beach for a few minutes, it slipped off into the water and disappeared in the cast, followed by a path of foam which could be seen for an hour afterwards.
