A very profitable afternoon was spent and much valuable information added to the needle-love of the members. After a season of work a delicious luncheon was served, then the busy needle workers were favored by a few choice instrumental selections by Miss Eickworth. That Schooner Again

A lie well stuck to is said to be better than the truth, wavering. Nevertheless the MAIL will take water on its statement that the schooner Zampa was trying to get into the Coquille. It was an error, discovered after the last paper was out. The Zampa runs to the Umpqua, and as she draws 14 1/2 feet loaded, of course it would be madness to try to get into the Coquille. We hope that Coquillers (with one exception) will accept our apologies. The exception is the polished and erudite editor of the Coquille Bulletin. It would probably be useless to hope for forgiveness in that quarter. When a "journalist" gets so far above all others of his craft that he can fill his paper week after week exclusively with the emanations from his own extraordinary intellect, without recourse to outside sources of information, he is in a class by himself and common mortals can expect no favors at his hands. Even the advice so freely and condescendingly tendered by this being is not applicable in the case of common newspaper men who do not know everything by intuition. We must continue to follow our own misguided way and give our readers the news from whatever source we can draw it. Our "handful of readers" want to find the news in the MAIL even though it has appeared in some other paper first.

Mrs. S. H. Black, of Sumner, returned home from a pleasant visit of six weeks in the Valley. She came in with her son Frank, who drove out for that purpose. He reports the roads getting very muddy from the late rains, and exceedingly rough in the canyon.

MARSHFIELD WILL HAVE THE BANNER CAMP

W. A. Woollever State Deputy Organizer for the Modern Woodmen of America sent in his petition for a charter for the Marshfield camp of the above order containing 127 names as charter members of that order. Mr. Woollever has written applications for over 150 who will be members of this camp. He says that he will not stop until Marshfield has the banner camp of Oregon. Mr. Woollever is one of the most successful deputies on the Pacific Coast and his success is largely due to his gentlemanly treatment of all other societies.

BAD WEATHER DELAYS WORK ON BARODA

The high winds and heavy surf have delayed operations in getting the Baroda off the beach, but Captain Burns, who was in town this week, expresses the utmost confidence that the venture will be successful. It will be necessary, however, to wait for favorable weather. The vessel now lies broadside on to the beach, the high tides the first of this week having floated her and carried her further inland. Capt. Burns says when she is moved her length seaward she will be afloat. She still has 800 tons of ballast aboard, which will be left there until all is ready for pulling her off. The heavy wire and Manila cables still lie at Marshfield. The immense spools have been placed on spindles and the cables will be coiled on board the tug when they are taken, the time depending on the weather.
