Perils Of the Mariner

Most Dreaded Of the Ocean's Terrors

be relied upon to keep their place, and from Balda, if ships do not go to them they will not go to the ships. Sheals and high winds are heralded beforehand, the former by lines of brenkers and the latter by

WHAT ATLANTIC LINERS FEAR signs that every seaman knows. Hut who is to guess at the path of the dere-

At the present moment there are many of these grim wanderers at large. Many a ship is abandoned at sea, yet their fate by running into derelicts in continues to live after the crew has midsens. Governments do what they

Take, for instance, the big Norwegian bark that is troubling the minds of liner captains. She was abandoned of the Norway coast some mentles ago abandoned and drifted about the North because she was hopelessly waterlog- sen for a year, sinking one ship and ged. The crew thought she would go damaging another so much that it was down, but she did not.

Not long since she was reported in mid-Atlantic, right in the track of the her. great liners that run to America. The ship that saw her had no means of was in the North sea eight months and dealing with her, and any morning you was collided with in a fog by a collier may read at breakfast that a mighty The collier was so injured that she had ocean greyhound has struck the dere- to run for the negrest land and was lict and sunk, dragging down with her beached on the coast of Holland near hundreds of lives.

That vessel has been reported five for a port. times and at places hundreds of miles | Derellet steamers are rarge by a long

apart. She appears to tragel on an av

erage 16 miles a day. Then there is the Memanhib. She vas a British full rigged ship, a elipper famous for weatherly qualities and good passages, and she mostly traded

About five years ago she spring t and leak, which soon got altogether be youd control, and the erew abandoned her about 50 miles from the coast of British Gniana. They reached land safely, but the Memsahib did not sink. She got late a northerly current and drifted up nearly as far as the Florida keys, where a consting schooner feeling her way along the trackless coast can listo her at night. One of the hands jumped on board the derellet when they struck, and he was left there by he coasting erew, four of whom es caped out of six and landed ten days later on the mainland.

They had a fearful time before they got there, nowever, for they had he time to take water or provisions. The man on the Memsahib had the best time of it, for he found plenty to eat and drink. He actually lived aboard two weeks, during which time the vessel fell in with a westerly wind and was blown 500 miles into mid-Atlantic. The man, whose name, by the way,

is Max Peterson of New York, ran up signats of distress and was taken off, together with a chest of valuables he had annexed, and taken to Porto Rico by a trading yeasel. He is still alive-it was only four years ago-and the Memsabib is yet affort.

She was reported some time ago of St. Heleva and a year before that at a point 120 miles east of St. Helena. where she all but caused the loss of the American tramp steamer John Cammock. The latter vessel had her bow stove in by a collision with the derelict, but managed to keep affoat all the way to Vigo, in north Spain.

Still stranger is the history of the fanotes Esterling, a Danish brig that eaught fire off the Faroe islands, north of Scotland. She burned nearly to the water's edge, and the crew were taken off by another brig that came to the

In some way the Esterling escaped sinking and was seen a month later off the Forth. It was remarked of this derellet that she must have passed right down the English coast and through the channel. Imagine a dere-CLOTHING, FURNITURE, STOVES liet passing through the strait of Do-

Anyway, an orient liner reported her off Cape Finisterre, in northern Spain. and a year later news came that the charred bulk was knocking round the seas a few score miles out from the Cape Verde islands. She was evidently a tight vesset. At last she came north again after a collision in the Atlantic THE A COURSE STORMER AND WAS SUNK by First-class workmanship guaranteed, a French gunboat in the Bay of Bis-

In all 35 different vessels reported having seen her in one place or anothr. She had no musts standing and was more like a raft than a ship. Her decks were nearly flush with the sen. Another derellet of which much has been heard is the Katisha, a Russian wheat laden full rigged ship. A fine vessel she was, over 2,000 tons burden. On her way to the river Platte, however, she fell in with a ship stricken with Submerged yellow fever and took off the crew, five in number. The fever ship, a Spanish bark, thus also became derelict, but she was never heard of again.

The Katislar paid heavily for charity. One by one the erew went down with fever, and corpse after corpse was dropped over the side to a in Hell Gate. Sometimes lumber crawls hurried burial service. There was a up and over the sides and is shot down doctor aboard, an Englishman, but he could not check the raging scourge, there are plenty of them, can be guard- and at last the undermanned boat ed against to some extent. Reefs can drove near the Brazilian coast not far

By that time the only man left alive and untouched was the second mate, ceding number add the preceding num-Doctor and all had succumbed. He took the ship's felly boat, being mable to launch the long boot, and reached be const two miles from Babia. A ter-

rible story of suffering was his. The Katlaha did not run ashore, however, for a westerly wind took her to ea. She was next seen 50 miles south of Natal, having in some way drifted round the Cape. At that time she was dismasted, but seemed sound as far as the captain of the Merryweather, a Yankee steamer, could judge when he

Nineteen weeks later a trading steamer, the Throstle, saw her only a few tilles from the Ceylon coast, and another steamer that came luto Colomso in a damaged condition reported having collided a score of miles out with a dereliet bearing the name Katl sha on her stem in Russian characters. so it was said. So it seems the Katisha ande a long voyage of it.

All this time she must have drifted and blood. The powerful scids used in the in round with the skeletons of some of the fever slain crew lying, below, for the escaped mate had not been able to throw them all overboard by himself. is a grim story, the abandoned death ship drifting from eccan to ocean with be a grigaly treight, a "terror that walks | tast perfected a Treatment which when faithfull in darkness" to all that plow the sens, And in all likelihood she is drifting yet, for not many months since an Australian trailing brig fell in with her off Sumatra and nearly ran her down | day senselly reaches the afflicted parts. This into the bargain.

Another Katisha derelict, a small the GUARANTEED CATARRII CURE Daulsh conster, was seen not long ago and is said at the extreoely low price of a near the Shetlands by a Norwegian Dollar, each package containing internal and Umber bark, so there are probably two Katishas rouning the salt water at the present moment. It is to be hoped they feet use will soon go to the bottom.

Of the scores and hundreds of ves- CURE ever made and is now recognized as the sels that sail and are never heard of only safe and positive cure for that annoying again it is likely a large number meet and discusting disease. It cares all inflamma can' but to hunt for an abandoned vessel is a thankless task.

NAPOLEON'S WISDOM

THE GREAT GENERAL UNDERSTOOD THE VALUE OF DISCUSSION.

It Does For the Brain What Exercise Does For the Museles-The Mighty Corstenn's Ideas on Religion and the First Great Cause.

Man exercises his muscles to improve firem. He competes muscularly with his fellows, and rivalry of muscle ends n muscular improvement all around. What exercise does for the muscles discussion does for the brain.

The importance of discussion Napolean appreciated thoroughly.

And when he discussed, he discussed like a big man, selecting questions en exhaust the mind and lead far away nto fields of conjecture and widest peculation. His was no dreamer's brain, giving

to speculation the time needed for do-ing. First came the real work of the lay or hour-the planning and finishing of details, from the disposing of army corps to the smallest final arrangements. Then, free from actual work, seeking

relief from concentrated application his brain sought rest in talk worth On his voyage to Egypt, determined to waste no time, he organized serious discussion as methodically as he ever

organized a fighting plan. The discussions were regularly apsointed affairs. Needless to say, Napoleon arranged everything and controlled everything. He selected the subject for discus-

ion, he chose the three or four on each side to support and oppose any given

There was no answer, and there was no more atheism that night. The man who was to build up the Little Early Risers fill the bill, Purely vegetcode Napoleon could appreciate the able. Do not force but assist the bowels to act.

force and decessity of law. His mind realized the feebleness of man, coping take. Red Cross Drug Store and Sengstackeven with little problems of earth. He felt that great laws and a Great Lawgiver must swing and direct those millions of silent worlds above.

When Napoleon was still a Corsican patriot, the great Paoli said to him: "Napoleon, you are not a modern You talk like the heroes of Plutarch."

Earnestness of the old kind was indeed Napoleon's characteristic-as emperor, planning to rule Asia from the back of an ornamented elephant, or as a poor, balf starved lad, taking off his muddy shoes to enter the presence of the matronly Mme. Permon and listening to her stories of descent from the ferfulls quick to relieve HAY EVER or COLD emperors of Constantinople. Napoleon in his hours of work was a

doer, and in his hours of leisure he was a discusser. He exercised constantly the two sides of his brain, the practical and speculative.
