**The Moslem Creed.**

A German Christian missionary who has worked for many years among the Mohammedans says: "Honesty compels every candid student to acknowledge that the old view formerly entertained in Christian circles concerning Mohammedanism, according to which the teachings of the great Arabian prophet are nothing but devil's doctrines and dogmas, is altogether incorrect. In reality, Mohammedanism is nothing but a rationalistic type of Christianity in the form of a most unfortunate state religion. The times are past when scolding about the Moslem creed as the production of the devil will satisfy, and the struggle against Islam on these premises is a failure. Practically all of the mission literature that in the sixteenth, seventeenth and eighteenth centuries was written against Mohammedanism is useless."

**Temperature of Forests.**

For many years the Swiss government has been making observations through its forestry stations on the temperature of the air, of the trees and the soil in the forests. These observations show that the temperature in the forests is always below the temperature outside. The temperature also varies according to the trees composing the forests.

A beech forest is always cooler than a forest of larch. As to the trunks of the trees, they are always cooler than the surrounding air. Regarding the temperature of the soil, it is found that in the forest the temperature is invariably below that of the air. Outside the forest the soil is always warmer than the air in summer and colder in winter.

**The Usual Thing.**

"Wasn't that an odd thing for the minister to say just as we were leaving?" asked the Chicago bridegroom of his bride.

"I don't think I noticed what he said," replied the bride. "What was it?"

"He invited us to come again."  
"Oh, that was just ordinary politeness. He always does my marrying."—
