**Scared the Bears.**

Our Tenmile correspondent says of one of the camping parties from here; Numerous hunting and fishing expeditions were indulged in and the ladies appeared to be as expert in the art of fishing as any of the classical sports, having caught no less than 170 trout. (Evidently that many tons.) Two deer were killed, four-legged ones at that, and one day a large bear came down from his home in a nearby canyon to interview the distinguished visitors and was so warmly welcomed that he never returned to his habitude in the forest and the party from Marshfield carried away the memories of a successful bear hunt that will be told and retold to future generations.

**MANY SALT LAKE MEN IN OREGON**

**Quietly Observing Southern Oregon Railway Operations—Much Gossip Afloat.**

(Telegram)

Senator Clark is in Los Angeles, and has given it out that the delay in work on his Salt-Lake Los Angeles line is due to the inability to get the material for construction delivered in time. There is growing feeling in the railroad world that the Clark plan is merely to get a line from Los Angeles to one of Mr. Clark's Southern California mines, and there construction will cease.

Operations in the Coos Bay country seem to be stirring matters up in that direction. Just at present there are many Salt Lake financiers and men of influence dropping into Portland to look over the ground of the Great Central Railroad's plans and ascertain, among other things, from which direction the Oregon seaport line will approach the Morman City. Land speculators from the inter mountain state are arriving in Portland daily, and some of them are kept busy denying any special object of their trip here coincident with the plans of the Great Central, at the head of which is a former Salt Lake man of considerable prominence, L.D. Kinney.

It is understood there have been heavy purchases of land made in Southern Oregon within a recent time. The financiers of the intermountain state have evidently become greatly interested in Coos bay and its railroad prospects. It is believed that the Los Angeles road is being headed off by the plans of a combination to reach tidewater in Southern Oregon.

Much interesting gossip is flying around concerning the backing of the Great Central. The Missouri Pacific Road is frequently conjectured as being the probable backer of the far Western enterprise. That enormous system needs a Western outlet, and along with it there are other great Middle Western lines that might be in a combination to open the Salt Lake gateway. The situation as regards several Eastern lines at Denver is unsatisfactory, and it might be that the Great Central is planning to get to the Pacific Coast for the accommodation of a system or a combination which now reaches Denver and Salt Lake. The Rock Island Road is stated to be an important factor in the situation at Denver, inasmuch as its traffic arrangements are not the most complete, and the Rock Island people would see much to their future interest in being a party to the Great Central combination. Whatever influence is back of the Great Central's mysterious "busing" about Coos Bay will soon come to light, it is thought.
