**Bright's Disease**

The largest sum ever paid for a prescription, changed hands at San Francisco, Aug. 30, 1901. The transfer involved in coin and stock \$112,500.00 and was paid by a party of business men for a specific for Bright's Disease and Diabetes, hitherto incurable diseases. They commenced the serious investigation of the specific Nov. 15, 1900. They interview scores of the cured and tried it out on its merits by putting over three dozen cases on the treatment and watching them. They also got physicians for judges. Up to August 24, eighty seven per cent of the test cases were either well or progressing favorably. There being only thirteen per cent of failures, the parties were satisfied and closed the transaction. The proceedings of the investigating committee and the clinical reports of the test cases were published and will be mailed free on application. Address John J. Fulton Company, 420 Montgomery St., San Francisco, Cal.

**MAGNIFICENT DONATION FOR NEW HOSPITAL**

One Thousand Dollars Pledged From The Great Central and Allied Companies

Father Donnelly informs the MAIL that Major Kinney, of the Great Central, expresses the liveliest approval of the project of establishing a hospital in Marshfield, and guarantees a donation of at least \$1000 from the companies which he represents. This is a material lift from what might be termed an unexpected quarter, as the Great Central was unknown when Fr. Donnelly launched the hospital project, and is a matter of great gratification to that gentleman, as well as to all who wish to see the hospital established.

**Parcels Post**

London, Sept. 2--The various attempts of the British Government to conclude a parcels post arrangement with the United States having resulted in failure, the British Postoffice Department has arranged an independent service which was inaugurated today. The new arrangement provides that the Cunard and White Star lines shall convey the parcels to the United States, to be delivered in that country by the American Express Company. The weight and size limitations of parcels accepted under this service are the same as those now adopted in the British inland parcels post--a maximum weight of eleven pounds, and a maximum of six feet for length and girth combined. A similar service is to be inaugurated from the United States to Great Britain.

I purchased a bottle and took two doses, one before starting and one on the route. I made the trip successfully, and never felt any ill effect. This office received a call the other night from a party who had been led, by persons who are jealous of the success of the little daily, to believe that he had a grievance against the COAST MAIL. He came to headquarters, like a man, and departed considerably mollified. We commend his example. You will find the COAST MAIL people in the COAST MAIL office, and always ready to "talk it over." Don't allow yourself to be "stuffed" by mischief-makers.
