"These are some of the attractions for the healthseeker and the man of retired wealth but it is substantial with which we are chiefly concerned for the present. From every utilitarian point of view Coos Bay has the solid foundation on which to build a great city. The peninsula will be the business area for Coos Bay; the wholesale district. It has already been mapped out for a great city, and to take advantage of the natural lay of the country."

Beautifully situated for a sloping tableland overlooking the bay from 100 feet to the sea.

**Littanite's Recitation.**  
An old English adage used to say a man's requirements for going to law were ten in number, and he summed them up as follows: First, plenty of money; secondly, plenty of patience; thirdly, a good case; fourthly, a good solicitor; fifthly, plenty of money; sixthly, a good counsel; seventhly, a good witness; eighthly, a good jury; ninthly, a good judge; tenthly, plenty of money.

"The climate of the Coos Bay region is the most equable in the United States. It is never cold in winter, or warm in summer. People wear the same grade of clothing all the year round. The rainfall is about 50 inches per year, and the principal rainy season is from the first of February to the last of March. In the summer the cool winds blow from the northwest and through the winter the winds come warm from the southwest. By some the winter season is considered the more delightful part of the year.

"There is no malaria and no typhoid in that country. People there need never have a cold due to sudden changes in temperature, and the country does not produce consumptives. The salt air and soft climate have a delightfully soothing effect upon people afflicted with nervous troubles.

"As a health and pleasure resort Coos Bay is bound to become famous. There are more natural attractions within a radius of 20 miles of Coos Bay than are possessed by any other section in the United States. All that region is a vast park covered with tall forests, undulating with many hills, cut up by canyons and rivers and interspersed with many lakes. It is all one flower garden. Water leaps from the mountains over falls 300 feet high.

People who have traveled round the world say that for picturesqueness and grandeur, the Eandon beach has no equal. With its caves and arches, seal and pinnacle rocks sticking up out of the ocean, its flat, hard, agate beach, its fine climate, it is bound to become a great pleasure resort. The fishing in that country is the finest in the world. Game is plentiful and its the hunter's paradise.
