**Lifesaving Suits Condemned**

During the last visit of the Life-saving Inspector at the Coos Bay station, he condemned the two rubber suits with which the service was equipped. They are supposed to be the last ones of that class in the service in this country. One of the suits was put onto a visitor and after it was inflated he went into the water and gave an exhibition.

After the trial it was evident the boys could see the uselessness of the old regalia. They would be entirely worthless in the present high state of perfection of the Life-Saving service.

**Building the Temple**

The work of driving the foundation piling for the Masonic Temple began Monday morning. Much of the material for the foundation is already on the grounds and work will be prosecuted with all possible speed before rainy weather begins. Contractor Clausen has the plans all well formulated and will be able to get the best possible results in the shortest time. Peter Loggie will act as general superintendent of the work. The pilings are now being driven and are being sent home to hardpan. The best material obtainable will be used throughout the entire structure from cellar to roof. The original plans will be somewhat deviated from whenever it is found advantageous.

**Not overwise**

There is an old allegorical picture of a girl scared at a grass-hopper, but in the act of heedless treading on a snake. This is paralleled by the man who spends a large sum of money building a cyclone cellar, but neglects to provide his family with a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy as a safeguard against bowel complaints, whose victims outnumber those of the cyclone a hundred to one. This remedy is everywhere recognized as the most prompt and reliable medicine in use for these diseases. For sale by John Preuss.

**Coos Bay Not In It**

Oregon, Washington, Idaho and their Recources is a neat little book of 88 pages and an excellent map of the three states gotten out by the passenger department of the O. R. & N. and the S. P. Railroads, by Rinaldo M. Hall. The book is full of good matter pertaining to the three states and some illustrations.

In the entire book Coos Bay is mentioned but once as follows: "Drain, Douglas County, Oregon., Located at the head of Umpqua Valley, the Point of connection with stage line for Coos Bay towns. Has State Normal School." Of course Coos Bay is of no interest to these railroads and it would not even do to mention the fact that there was such an important point on the Pacific Coast.

**Moving Pictures**

J. W. Cook has arrived from the interior with his Big Edison show, coming in by way of the Umpqua with his own rig, and will exhibit in town Friday and Saturday nights, one night at Empire and two at North Bend.

Mr. Cook has been quite successful with his show since he was here 2 years ago, and has made expensive addition to his outfit. He has recently received one of Edison's latest moving picture-machines of the most approved pattern, in which the vibration which has been such annoyance in moving pictures has been almost entirely, or quite, eliminated.

Putting on his entertainment at popular prices of 25 cents for adults and 15 cents for children, with no charge for reserved seats, he will undoubtedly have good houses. Seats are now on sale at Butler's.

**Dysentery Cured Without the Aid of a Doctor**

"I am just up from a hard spell of the flux (dysentery) says Mr. T. A. Pinner, a well known merchant of Drummond, Tenn. "I used one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and was cured without having a doctor. I consider it the best cholera medicine in the world." There is no need of employing a doctor when this is used, for no doctor can prescribe a better medicine for bowels complaint in any form either for children or adults. It never fails and is pleasant to take. For sale by John Preuss.

**MAIL ROUTE CHANGE**

**Coos Bay Again Warned of Impending Danger.**

Again a note of warning comes to the MAIL from a gentleman out on the Coos Bay wagon road, in regard to the scheme which is said to be no foot to send Coos Bay mail over the Middle Fork route. He says, in part:

"The move is to carry the brass lock pouch over the Coos Bay road, also the way sack, the balance via Myrtle Point. This much accomplished, the brass lock pouch will soon follow, and the way offices on the route be supplied from Myrtle Point.

Our correspondent says other things on the subject that are will worth printing, but at this time the MAIL will simply sound the note of warning.

If the business men of Coos Bay are getting their mail too quickly, and don't care if it is sent over a longer and slower route than at present, the MAIL can stand it with the rest.

Otherwise, something should be done, before it is too late, to head off the whole scheme.

The MAIL would be pleased to print some expressions from the people on this subject.

**Moving Picture Exhibit**

There was a good house last Saturday night at the Liberal Hall to see the double exhibit of the Edison Moving Picture and Illustrated Song Co. by J. W. Cook, and no one was disappointed. Such exhibits are worthy of a better house than they generally bring; but the attendance was unusually large; and all seemed highly appreciative of the entire exhibition. Mr. Cook has had a long experience with this kind of entertainment and adds greatly to its value by his clear explanations. His apparatus is just from the factory, and is of the very latest device. We bespeak for the company success wherever they go.—Silver-tonian.

Mr. Myers has been promised several individual exhibits of the products of Coos County.
