Change in Pursers

This is the last trip of E. A. Abbott, as purser of the steamer Alliance, and he is accompanied by L. W. Shaw, his successor. Mr. Shaw was purser on the Alliance some five years ago and is not a stranger here. He has latterly been acting as city agent and wharf man for the owners of the Alliance. He and Mr. Abbott will change places on the Alliance's return to San Francisco. Mr Abbott has made friends, during his run here, who will regret to see him taken off the route, while Mr. Shaw is remembered as a pleasant gentleman to deal with.

Better Than Pills

The question has been asked—In what way are Chamberlain's Stomach and Liver Tablets superior to the ordinary cathartic and live pills? Our answer is—They are easier and more pleasant to take and their effect is so gentle and so agreeable that one hardly realizes that it is produced by a medicine. Then they not only move the bowels but improve the appetite and aid the digestion. For sale at 25 cents per bottle by Jno. Preuss.

A well-known judge on a Virginia circuit was recently reminded very forcibly of his approaching baldness by one of his rural acquaintances. "Judge drawled the farmer, "It won't be so very long 'fo you'll hev to tie a string around yer head to tell how fer up to wash your face."

J. W. Cook, who visited Marshfield with a moving picture machine this Summer, is on the north bound Alliance with his team and outfit, on his way to his home in Marion county. He reports a very successful season.

Cause of Lockjaw

Lockjaw, or tetanus, is caused by a bacillus or germ which exists plentifully in street dirt. It is inactive so long as exposed to the air, but when carried beneath the skin as in the wounds caused by percussion caps or by rusty nails, and when the air is excluded the germ is roused to activity and produces the most virulent poison known. These germs may be destroyed and all danger of lockjaw avoided by applying Chamberlain's Pain Balm freely as soon as the injury is received. Pain Balm is an antiseptic and causes cuts, bruises and like injuries to heal without maturation and in one third the time required by the usual treatment. It is for sale by John Preuss.

MARSHFIELD DOCK AND WAREHOUSE CO

To Provide Better Facilities for Handling Increasing Volume of Freight

The Dean Lumber Co. have accepted the offer of F. S. Dow to lease the shipyard and the present Dean warehouse and dock. It is understood that Mr. Dow will turn his lease over to the Marshfield Dock & Warehouse Co. who will also be lessees of the Standard Oil Co. dock, and Mr. Dow will probably have charge of the business of the new company at this point.

Work will be commenced at once to

enclose the ship shed and put a floor therein, and to enlarge the shipyard dock and make all necessary slips, and approaches to properly handle the business. The wharf will have a frontage of 250 feet south of the present Dean dock. This with the present dock and warehouse will give ample dock room for all boats calling here.

The U. C. & N. steamers will land at the new dock, and the company expect to be able to furnish dock and warehouse space for any other steamship company who may desire it.

Rat-proof rooms will be put in for the storage of flour and other goods liable to be damaged by rodents. A winch will be provided to facilitate the handling of heavy freight. Mr. Dow will move his office and his flour and feed business to the new warehouse using the present warehouse for the storage of oils, principally.

Marshfield has long been in need of adequate dock and warehouse facilities, and this new move to provide them will be welcomed by all shippers.

From Friday's Daily.

C. L. Albrecht went up yesterday to the Laughead brickyard on Catching slough, where work has been discontinued. Mr. Albrecht will look over the ground to see if the situation is favorable enough to warrant resumption of operations.

Sweet are the uses of advertisement. The following gem has been found in the pages of a prominent German paper: "Any person who can prove the Measers. Blank's chocolate is harmful to health will receive a free gift of one pound of the chocolate."—London Tatler.

John F. Willard, representing the Hercules Gas Engine Works, of San Francisco came to the bay on the Alliance and is looking after the interests of the company. Mr. Willard is at the Central hotel, where any one who wishes can see him.

Shot His Hand

Wm. Rodgers, a young man of this place had his right hand quite badly injured by the accidental discharge of a shot gun, while hunting ducks across the bay yesterday afternoon. He had hold of the muzzle of the gun, the charge tore the flesh from the inside of the hand at the base of thumb. It also in

jured one of the bones of the wrist and some of the shot lodged in the upper arm.

Albert Seelig who was also out hunting went to Rogers' assistance and brought him over to town, where his injuries were treated by Dr. Tower.

Portland Journals "News"

For exclusive news commend us to the Portland Journal. In its issue of Tuesday it says:

The steamer Alliance was due to arrive at Portland last night, but word has been received that she is bar-bound at Coos Bay and cannot possibly get away before tomorrow.

As the Alliance was not bar-bound here for a minute on this trip, the Journal certainly had a scoop on that "news." If the Journal would use less red ink in its headings and more truth in its columns it would achieve a higher standing.

Be Fair

Is there anything quite so illogical as a merchant scoring an editor because he does not get after people who are constantly trading with mail order houses, then see the same merchant unpacking a lot of inferior commercial printing he could have had done at home, far better if not so cheaply. If the editor felt half as revengeful as that merchant he could possibly have some spicy items in regard to business matters. Do not throw stones while living in glass houses.

Chamberlain's Cough Remedy

No one who is acquainted with its good qualities can be surprised at the great popularity of Chamberlain's Cough Remedy. It not only cures colds and grip effectually and permanently, but prevents these diseases from resulting in pneumonia. It is also a certain cure for croup. Whooping cough is not dangerous when this remedy is given. It contains no opium or other harmful substance and may be given as confidently to a baby as to an adult. It is also pleasant to take: When all of these facts are taken into consideration it is not surprising that people in foreign lands, as well as at home, esteem this remedy very highly and very few are willing to take any other after having once used it. Halloween Ball

Don't forget the ball to be given by the A. N. W. club on Oct. 31st. The funds raised at this ball will be added to the drinking fountain fund. The ladies are receiving much encouragement in their endeavors to do something which will be a lasting benefit to the public. Making some kind of a civic improvement each year is on their program, and they could not have chosen a more popular improvement. The ladies have concluded to do one thing at a time, and have started in with the drinking fountain. Mrs. E. O'Connell, president of the society has appointed working committees, who will leave nothing undone to make this ball one of the best social dances of the winter. The hall will be elaborately decorated for the occasion.

Toelle's full orchestra has been engaged for this dance and all going can rest assured that the music will be the best. The admission price will be 50 cents each. Tickets will be on sale at the usual places.

Through the kindness of Mr. L. J. Simpson, arrangements have been made, whereby the Cruiser will run between North Bend and Marshfield to accommodate all who wish to attend Halloween ball. Round trip 25 cents.

The Delineator For November

In the November issue the Delineator sustains its recognized position as the foremost fashion publication and one of the high-class literary magazines. Excellent reading and refined art supplement the display of winter fashions, which are more charming than any previous time. In fiction there is the second installment of the Evolution of a Club woman, An Unpremeditated Engagement, An Interrupted Honeymoon, and a western story by Minna C. Smith. In the second of his remarkable photographic articles, J. C. Hemment relates some of his thrilling adventures with the camera. A House Small but Artistic is pictured and described by Alice M. Kellogg, and in "Carlotta and

Miss Bradford tells the story of an old fashioned Thanksgiving. In addition there are numerous articles by experts treating problems of the home and household.

American Shipbuilding.

At present the total value of contracts under construction at the leading shipyards on the eastcoast of the United States is \$111,304,500, representing fourteen yards. Of this total \$58,507,500 represents naval work and \$52,797,000 merchant marine work.

All the Same.

In an advertisement by a railway company of some uncalled for goods the letter "I" had dropped from the word "lawful," and it read, "People to whom the packages are directed are requested to come forward and pay the awful charges on the same."

The Steel Output.

The Industrie Zeitung says that of all the countries producing steel in 1902 the United States led, with an output of 15,000,000 tons. These figures grow in importance when it is remembered that the world's production in 1894 was only 12,851,000 tons. Germany's production in 1902 was 7,780,000 tons, one-half that of the United States, while England's was only 5,000,000 tons, or one-third the production of the United States.

Lucky Fred.

Fred Worrell was painting the belfry of St. Luke's church at Chester, Vt. recently and slipped and fell sixty feet. No bones were broken, and his skin was not even scratched. He was taken home, and a slight lameness for a few days was the only bad result of the fall.

Higher Temperature With Electricity

Previous to the development of the electric furnace 3,000 degrees F. was the highest possible limit of heat. Now electric furnaces produce artificial temperatures far above this limit, which enable us to fuse and otherwise treat commercially such hitherto refractory substances as chromium, platinum, carbon, and it is even possible to fuse the once indestructible crystalline form of that element, the diamond.
