Duty of Parents

The following, from the Dawson, Minn. Sentinel, has been handed in with the request that we publish it: President Northrop of the state university used vigorous English in a talk to the Woman's Federation a few days ago. Among other things he said: I would wipe out of existence every club on earth if necessary to make mothers faithful to their girls and boys. Neither church nor state is doing what it ought to for the young. Children are thrown into the public schools like clothes into the laundry to be fitted for life. They come to school without any character training and mothers are sitting calmly down, seeing things not done. You have no right to quit your home and go out into society to become intoxicated with an effervescent womanish feeling. The God-given power of parents to train their boys and girls to be noble men and women is above every other object in life.
