The Marshfield Chamber of Commerce met in regular session last evening and transacted a large amount of routine business.

A large number of communications were read and discussed, and much important work was done. The meeting was well attended, considering the bad weather.

After the Wild Man

(With apologies to the Enterpriser)

Ed Husey of Myrtle Point, has been awarded the contract to obtain the hide of the wild man in the Sixes. He took his departure Tuesday last loaded with codfish and molasses, and proposes to entrap the demon of the El Dorado by remearing the above ingredients on the moss purported to have grown on the back of this wild man of "Borneo." Mr. Husey will then be an aspirant for the office of Joint Senator.

Alliances Boiler Repaired

A persistent rumor was current in Marshfield that the steamer Alliance could not go to sea owing to some difficulty with the engineers, who refused to go out.

Upon investigation this was found to be made from whole cloth. A COAST MAIL reporter made inquiries of the officials and found everything serene and that there was not the least thing true as to differencers reported.

The steamer had the misfortune to have one of the plugs blown from one of her boilers just before she was about to sail yesterday, and it became neces-

ary to empty her boilers, put out the fires and wait their cooling off before the repairs could be made. The steamer was ready to sail this morning but the bar was rough and she was unable to get out as expected this morning.

LIGHT RUN OF FISH

ON THE COLUMBIA

A Late Astoria dispatch says: The run of fish still continues exceptionally light and the canneries are cooking only every other day, a thing that is necessary to keep the fish from spoiling. The old-time theory is being advanced that the slack run is occasioned by the flood carrying fresh water so far out to sea that the fish will not come in.

There is considerable driftwood floating in the lower river and this interferes greatly with the gillnetters and trappers. The Corbett seining ground on White Island and the Elliott ground near Stevensen have begun fishing, as they are so situated that the high water does not interfere with them. The Altoona Packing Company's new cannery at Altoona, Wash., is not yet completed, but it will be ready for operation the latter part of the week.

Mullen, the baker on the Alliance, has gotten on the water wagon again; he does it every once in a while. We presume it is because he kneads the dough.

A Beautiful Bird

John Herron, of the Bell Cord saloon, shot a beautiful Northern Diver yesterday. This is the second one that has been shot in the bay this season. These birds seldom come up the bay this far. Mr. Herron and a Nimrod who goes by the name of "Heck", sallied forth to capture the beautiful bird, an art at which both proved themselves very proficient, especially "Heck", though he only engineered the gunner. The bird will be mounted in the latest style of the taxidermist, and will adorn the Bell Cord bar.

Has a Tooth for Chicken

The large golden eagle which Clay Moore turned loose recently, out of sympathy and pity for the captive bird, has been committing depredations on several henneries in Marshfield. He recently appeared in South Marshfield and got away with two chickens for J. L. Waite, and two for J. Gammill. A few days before he investigated Mrs. S. H. Hazard's flock, but she showed his golden highness a thing or two with the broom and he concluded to depart. This bird was in captivity just long enough to become somewhat civilized and comes right into the door yards. Several Marshfield Nimrods are on the lookout for the eagle and it will be all off with his highness if he meets them.
