

GERMANY FRIENDLY TO RUSSIA

Denounced by Member of Reichstag

Berlin, May 9—In the Reichstag today Herr Bebel denounced the government for what he termed repeated breaches of neutrality, in the Russo-Japanese war, which indicated that Germany desires Russia's triumph.

He cited the sale of the Hamburg-American liners to Russia, criticized the Kaiser's telegram to the Czar in which he expressed regret at the loss of the Russian warships, saying that Russia's losses were actually Germany's losses. Bebel took advantage of parliamentary immunity and attacked the Emperor most pointedly. Chancellor Buelow repudiated the charges and added, "If other countries regard Germany with envy and hatred, as Bebel asserts, we have every reason to keep the national sword sharpened."

The Unification of The American People

By United States Senator CHAUNCEY M. DEPEW

QNE hundred years hence there will be a population of over two hundred millions in the United States. Our domain will be sufficient for their support and our institutions elastic enough for their orderly government and their liberty. Intelligence will be keen and high and the state will be very close to the daily life and industrial activities of the people. Co-operation will be working to an extent now thought chimerical.

There will always be differences of conditions, as God has endowed his children with degrees of gifts, but the much abused doctrine that the world owes every man a living will be in general vogue and practice. The lazy, the shiftless and the improvident will grumble and suffer then as now, but there will be a place for all according to the talents bestowed upon them and wisely perfected plans for the care and comfort of the aged and the helpless.

The English language will be the speech of diplomacy and the tongue of a quarter of the human race. The United States and Great Britain, having worked harmoniously together for a long period, will dominate the world. Their rule and example will be for the promotion of commerce and the spread of civilization with its requirements and benefits in Asia and Africa. Year by year will come nearer the realization of the promise which began and has inspired the Christian era, of "peace on earth and good will among men."
