

**Daily Democrat.**

The English and Canadian press almost universally rejoice over the election of Harrison.

In Philadelphia where protection has heretofore ruled supreme, the democrats cut the republican majority down more than 12,000.

Perpetual roses will not stand severe cold weather without protection. If grown the protection should be applied early in the fall.

Positiveness is a most absurd foible. If you are in the right, it lessens your triumph; if in the wrong, it adds shame to your defeat.

The best paid drummers traveling for Chicago houses are five men in the grocery trade who receive salaries of from \$500 to \$10,000 a year.

Blaine carried Marion county, Indiana (Harrison's home,) four years ago by 226 majority, but Cleveland carries it this year by 378, making a gain of over 600.

When putting away the silver tea or coffee pot which is not used every day, lay a little stick across the top under the cover. This will allow the fresh air to get in, and prevent mustiness.

Mix a little carbonate of soda with the water in which flowers are immersed, and it will preserve them a fortnight. Common saltpetre is also very good preservative.

We will have made a long step towards a true civilization when we begin to regard the moral and intellectual points of our children as critically as we now do the physical points of our stock.

The bed of the ocean, says a foreign writer, is to an enormous extent covered with lava and pumice stone. Still more remarkable it is to find the floor of the ocean covered in many parts with the dust of meteorites.

With very little labor, washing silver in water in which a teaspoonful of ammonia has been added, will keep the silver with a white polish, and glassware will polish much more easily if washed in water to which ammonia has been added.

County roads and the advertising columns of many papers are beginning to be infested with sharpers of all kinds who make a special point of "working the granger" about this time of the year. Look out for them: and by all means do not sign your name for a stranger to any kind of a document.

There is no more distasteful sort of literature than the party papers now coming to hand, printed just before the election, and full of glowing assurances that the obdurate ballot swingers have made a mockery. They suggest the patent medicine illuminations that sometimes adorn newspaper interludes of before taking and after taking remedial nostrums. The curious and those who find anything cheerful in the returns, may take a sort of morbid interest in comparing the predictions with the cold figures.

We frequently hear of buildings destroyed by fire which originated in the ash-box. This box should be lined with sheet iron, and set at least ten feet from any combustible object. It should have a tight cover, that no sparks may be blown from it. It is best to have one-half the cover hinged to the other half and held down by a button. Even then ashes should be searched for fire before they are put in the box; this is a matter about which one cannot be too careful. The top of the box should be tight so that the ashes may be kept dry.

It is said there are at least twenty republicans in Albany who expect to hold office under Harrison. They do say that Capt. Humphrey has his eye on the office of U. S. District Attorney now held by the scholarly and able Judge McArthur. Political service it is said will be the chief strength of an applicant's claim for position and this gives the Captain a dead thing.

The well-known photographer, Anschuetz of Lissa, has for some years been experimenting with photographs of the flight of cannon balls from the moment of their projection to their striking the target or object aimed at. Last month on the trying grounds of the Gruson Works, near Buckau, he demonstrated the perfection of his studies. He succeeded in obtaining remarkable and highly interesting results. His plates were submitted to the expert, Professor Dr. Koenig of the Berlin University, who was perfectly able to make therefrom the desired practical calculations. He established the fact that the projectile thus photographed had a velocity of 400 meters a second, and that the duration of the light thrown on the photographic plate did not exceed the ten thousandth part of a second.

The Field and Farm has this universal warning: Beware of the Eastern fruit tree peddler who is abroad in the land a gain, and acts as if he had come to stay all winter. His greatest fault is that he is always recommending some new variety of remarkable growth, hardness and productive capacity and demands fabulous prices. He is armed with a long list of testimonials from parties one never saw nor heard of to substantiate what he tells you, and, if you will take the trouble to inquire, the chances are you will find your home nurseryman has all the new and choice varieties of fruit they have in the East.

**PREPARING.**—Guiss & Son are receiving a fine stock of holiday goods, consisting of toilet sets, albums, fancy goods, a very large stock of cards, etc., and a splendid stack of perfumeries from the factory, for which they have cases in sets. They propose to carry as fine a stock as there is in the city and will sell at astonishingly low prices.

Look in our corner show window at the vases we give with one of the best baking powders in the market. No lottery scheme; you simply take your choice.

**SOME SUMMER ITEMS.**—It pays to get your groceries at Brownell & Stanard's. You get a five cent ticket with every \$1's worth of goods bought at Brownell & Stanard's.

Special bargains in flooring and rustic C. J. Dillon & Co's. Foot Lyon Street.

**Estray Notice.**

Notice is hereby given that on or about the 25th of June, 1888, one sorrel mare of the age of seven years or thereabout, and marked with a white forehead and white hind legs with light mane and tail, strayed upon my enclosed land 3 miles northwest of Miller's Station in Linn county, State of Oregon, and now remains there upon. Said animal being treacherous and could only be kept out of grain-field by yoking.

Dated this 17th day of October, 1888. HUBERT MILLER.

**HOW TO GO EAST.**
