

ROYAL BAKING POWDER

Absolutely Pure

No inferior or impure ingredients are used in Royal for the purpose of cheapening its cost; only the most highly refined and healthful.

Royal Baking Powder imparts that peculiar sweetness, flavor and delicacy noticed in the finest cake, biscuit, rolls, etc., which expert pastry cooks declare is unobtainable by the use of any other leavening agent.

Alum is used in making cheap baking powders. If you want to know the effect of alum upon the tender lining of the stomach, touch a piece to your tongue. You can raise biscuit with alum baking powder, but at what a cost to health!

A Harvest Supper.

Yesterday afternoon we accepted an invitation to take supper with the harvesting crew of Gibbens, Bayne & Co. We found the separator and engine on the farm of Mrs. Eagy. The crew consists of thirty hands, ten wagons are employed to deliver the grain and five stail-wart men known as "elevators" deliver the bundle in the field. An average days work is 1200 bushels. Work commences at 6 o'clock a. m. and the evening whistle sounds at 7:30 p. m. The first man we met was Francis Bayne, the engineer. He is ably assisted by Mr. Mike Coon (Hayne sits around and Coon does the work.) Mr. E. S. Davis, of Oakville, in chief of the water department; he has two gas tanks and the engineer has not had to foot for water this season. The next man we met was the commissary general of the company, Mr. Geo. E. Gibbens, his work is to supply the men with food and water; he buys butter, eggs and vegetables from the farmers and always has a supply ahead. Messrs. Holgate and Whyte stand in front of the cylinder to regulate the feed. Porter and Howard run the "bagging" department. Ralph Cole is bag figger. Messrs. Deady and Tharp carve the bundles as they enter the cylinder. After the evening whistle sounded we were ushered into the large and commodious cook wagon where we found our old friend O. A. Johnson looking happy and contented. Mr. Johnson is chief cook and is ably assisted by Mr. S. S. Myers, a supper good enough for a king was on the table and we don't wonder that the harvest hands are all healthy. Twenty-four men are seated at the table which is as completely furnished as a restaurant; cups, saucers, plates and a complete set of glassware, also as nice as silverware as can be secured in the state. Mr. Johnson does his own baking and always has a large supply of pies and cakes, warm biscuits served every morning. Forty pounds of beef is used every day besides bacon and chickens, coffee, tea and milk are always on the table. Mr. Johnson has had thirty five years experience as cook, nine harvests with Gibbens & Co. The company have had fourteen days run and will have ten more. They are doing first class work. Mr. W. E. Githens is a general superintendent and J. W. Wolfe is superintendent of separator.

GRAFTS.

The greatest fault with some men and boys is their association.
There are sharps in the Albany Band.
The more troubles are nursed the greater they grow.
The man learning to play a horn also plays terrifically upon his neighbors ceilings.
Some people overdo everything they do.
The best man boast the least.
Nine Albany women out of ten would get mad if their friends told them what their mirror does, everytime they look into it.
Good nature can be seen in the dark.
The man driven to desperation always has a big hand in it himself.
The envious person sees no good in anything.
It is what you are that counts, not your ancestors.
The best moral to a good many books in our midst is "Don't read them."

A Close Call.

Mr. L. T. Berry, of the Albany Dressed Beef Co., met with a close call to a fatal accident yesterday afternoon. He was coming to Albany and was between this city and Tangent when he came to the S. P. track near the Munkers farm. A barn obstructed his view and he was almost to the track before seeing the approaching overland. His horse became frightened and sprang across the track directly in front of the engine, which struck the rear end of the wagon, throwing Mr. Berry upon the ground and breaking the wagon. The train stopped and brought Mr. Berry to the city. He bruised some but not injured seriously. It was only a few inches of death though.

W. A. Spencer, engineer with N. H. Bateman's steam threshing crew of Brownsville, was in town over Sunday. He reports threshing well along, and gives an interesting account of their last week's run. Mr. Bateman has a brand new Niagara P. Tis Separator, self feeder, and an 18 horse power Russell Compound engine. The machine was started the first of the week at Fletcher's place near Brownsville and threshed down the Calapooia, closing the week's run at Orr's place near Plainville. They threshed 6000 bushels of grain or an average of 1500 bushels per day. With this outfit Mr. Spencer thinks 3000 bushels per day could be threshed in ordinary seasons.

THE BOTTLE BROKE.—Mr. O. G. Burkhardt has received a proposition from the Indiana glass factory people heretofore referred to which breaks the proposition so far as Albany is concerned. A bonus of five acres of land and \$10,000 in cash for a \$30,000 plant is demanded. That might be met, but the ice cry is that the guaranteed soft coal laid down at the maximum price of \$1 a ton, an impossibility by \$4 or \$5, and to be assured of the ability to secure sufficient sand.

ANOTHER RUNAWAY.—Runaways seem to be epidemic these August days. This forenoon an exciting one occurred near the depot. The team of Charles Peebler started from near the brewery and ran east, at the railroad track turning upon the track, and running down it until stopped by a culvert, where the wagon was tipped bottom side up, and the contents some years and boxes, tipped out, while the horses were partially in the water under the culvert. The outfit was a strong one and little damage was done.
